Sur les cônes (faiblement complets) contenus dans le dual d'un espace de Banach non-reflexif Richard Becker	321
Properties of axial diameters Paul R. Scott	329
On convergence of the conjugate Fourier series of a function of Wiener's class Rafat N. Siddiqi	335
Morita duality and artinian left duo rings Weimin Xue	339
Subdirect decompositions of the lattice of varieties of completely regular semigroups P.G. Trotter	343
Weakly compact operators and the strict topologies José Aguayo and José Sánchez	353
Deformations of rings Joe Yanik	361
Uniformisation of the twice-punctured disc—problems of confluence Joachim A. Hempel and Simon J. Smith	369
The bisection width of cubic graphs L.H. Clark and R.C. Entringer	389
Property preserving operators Evelyn M. Silvia	397
Besov-type characterisations for the Bloch space Karel Stroethoff	405
Idempotents in bicategories R. Paré, R. Rosebrugh and R.J. Wood	421
On the area growth of a hyperbolic surface Pui-Fai Leung	435
Local boundedness of monotone operators under minimal hypotheses Jon Borwein and Simon Fitzpatrick	439
On the twice differentiability of viscosity solution of nonlinear elliptic equations Neil S. Trudinger	443
Compactness and convexity of cores of targets for neutral systems Anthony N. Eke	449
Inequalities and semigroups W.J. Ralph	461
On the superposition of functions in Carleman classes Mostefa Ider	471
Strongly right FBN rings: Corrigendum Heakyung Lee	479

ABSTRACTS OF AUSTRALASIAN Ph.D. THESES

Information for Authors.

The *Bulletin* of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field. As even minor revisions are generally not permitted, authors should read carefully all the details listed below and on the inside back cover. For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Authors should submit *three* clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,
Department of Mathematics, University of Queensland,
St. Lucia, Queensland, 4067, Australia.

Unless requested at the time, material submitted to the *Bulletin* will usually not be returned. *Note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification.* (1985 Revision)

Abstracts of Ph.D. Theses.

The *Bulletin* endeavours to publish abstracts of all accepted Australasian Ph.D. theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.
