

WORKING GROUP FOR PLANETARY SYSTEM NOMENCLATURE
(GROUP DE TRAVAIL POUR LA NOMENCLATURE DU SYSTEM PLANETAIRE)
(Committee of the Executive Committee)

PRESIDENT(ACTING): K. Aksnes

MEMBERS: A. Brahic, M. Fulchignoni, M. Ya. Marov
D. Morrison, T.C. Owen, V.V. Shevchenko
B.A. Smith

CONSULTANTS: J.M. Boyce, G.A. Burba, P. Masson

HONORARY MEMBER: P.M. Millman

It is with great sadness that we have to report the death on 24 August 1990 of the WG's President, Harold Masursky, at the age of 66. Dr. Masursky is known for his many contributions in planetary science and for his many years of dedicated work in planetary nomenclature. During the interim until the next IAU General Assembly the IAU Executive Committee has appointed K. Aksnes as Acting President of the WG.

Since the last IAU General Assembly, the WG has held its 18th regular meeting in Paris and Brittany 19-22 October 1989, with all but two WG members present. More informal adhoc meetings were attended by 3 to 9 WG and Task Group(TG) members in Pasadena on 28 August 1989 during the Voyager Neptune encounter, in Flagstaff on 22 January 1990, in Paris 14 March 1990, and in the Hague 2-3 July 1990. Much of the nomenclature business is carried out by correspondence, with increasing use of telefax and e-mail.

During the triennium most of the activity of the WG and the TG's has been centered on the nomenclature of Neptune's satellites and rings as revealed by the Voyager spacecraft. The emphasis is now shifting to Venus, in preparation for the detailed radar mapping of that planet begun by the Magellan spacecraft in August 1990.

The WG is asking for IAU approval of the following new planetary nomenclature:
