NEW

The only anti-CGRP with both quarterly (every 3 months) and monthly dosing options indicated in migraine prevention*.†

AJOVY™
(fremanezumab)
injection 225 mg/1.5 mL

**AJOVY™
PREVENTED
HER MIGRAINE
TODAY**

Indicated for the prevention of migraine in adults who have at least 4 migraine days per month.¹

Backed by the AJOVY™ Teva Support Solutions®
(AJOVY TSS) Patient Support Program!

1-833-302-0121

TSS@ajovycanada.ca

Available from 8:00 a.m. to 8:00 p.m. ET, Monday to Friday

Clinical use:

AJOVY™ should be initiated by healthcare professionals experienced in the diagnosis and treatment of migraine.

Pediatric patients (< 18 years): Safety and efficacy have not been established.

Geriatric patients (≥ 65 years): Clinical studies of AJOVY™ did not include sufficient numbers of subjects aged 65 and over to determine whether they respond differently than younger subjects.

Warnings and precautions:

- › Hypersensitivity reactions.
- › Patients with hepatic or renal impairment.
- › Patients with cardiovascular diseases.
- › Pregnancy.
- › Breastfeeding.

For more information:

Please consult the Product Monograph at <https://TevaCanada.com/en-Ajovy> for important information relating to adverse reactions, drug interactions, and dosing information that has not been discussed in this piece. The Product Monograph is also available by calling us at 1-855-514-8382.

CGRP: calcitonin gene-related peptide

*Comparative clinical significance unknown.

†Fictional patient. May not represent all patients.
