

GENERAL INFORMATION

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/information>

The CMS publishes two research journals: the Canadian Journal of Mathematics (CJM) for longer papers, and the Canadian Mathematical Bulletin (CMB) for shorter papers. To be submitted to CJM, papers should be at least 18 pages long. Shorter papers should be submitted to the CMB. All submitted papers are considered subject to the understanding that they have not been published and that they are not being considered for publication elsewhere. To be accepted, papers must treat new mathematical research, be well written, and be of interest to a significant segment of the mathematical community. Papers may be written in English or French. Manuscripts must be prepared in accordance with the instructions for authors provided at

CANADIAN MATHEMATICAL BULLETIN

(USPS # 007527) is published 4 times per year, quarterly (March, June, September, December). Published by Cambridge University Press, One Liberty Plaza, New York, NY 10006 on behalf of the Canadian Mathematical Society. US Mailing Agent: Sheridan Press, 450 Fame Ave., Hanover, PA 17331 USA.

Periodicals postage paid at New York, NY and at additional mailing offices.

US POSTMASTER: Send address changes to Journals Fulfillment Department, Cambridge University Press, One Liberty Plaza, New York, NY 10006.

RENSEIGNEMENTS GÉNÉRAUX

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/information>

La SMC publie deux revues de recherche : le Journal canadien de mathématiques (JCM) qui présente des articles longs et le Bulletin canadien de mathématiques (BCM) des articles plus courts. Les articles destinés au JCM doivent compter au moins 18 pages. Les articles plus courts doivent être acheminés au BCM. Il est entendu que les articles présentés pour publication sont inédits et qu'ils ne sont pas à l'étude pour publication dans d'autres revues. Un article accepté porte sur des recherches récentes, est bien rédigé et s'avère susceptible d'intéresser bon nombre de mathématiciens. Nous acceptons les articles rédigés en langues anglaise ou française. Les articles doivent répondre aux conventions énoncés pour les auteurs au

BULLETIN CANADIEN DE MATHÉMATIQUES

(USPS # 007527) est publié 4 fois par an, tous les trimestres (mars, juin, septembre, décembre). Publié par Cambridge University Press, One Liberty Plaza, New York, NY 10006 au nom de la Société mathématique du Canada. Agent de poste US: Sheridan Press, 450 Fame Ave., Hanover, PA 17331 USA.

Postes payé à New York, et autres bureaux de diffusion supplémentaires.

POSTES AMÉRICAINES: Envoyer les changements d'adresses aux Journals Fulfillment Department, Cambridge University Press, One Liberty Plaza, New York, NY 10006.

1	A Vanishing Theorem for the Twisted Normal Bundle of Curves in \mathbb{P}^n , $n \geq 8$	<i>E. Ballico</i>
6	A Remark on the Dixmier Conjecture	<i>V. V. Bavula, V. Levandovskyy</i>
13	Ultracontractive Properties for Directed Graph Semigroups with Applications to Coupled Oscillators	<i>Jason J. Bramburger</i>
31	Linear Independence of Logarithms of Cyclotomic Numbers and a Conjecture of Livingston	<i>Tapas Chatterjee, Sonika Dhillon</i>
46	Hypersurfaces with Prescribed Boundary and Small Steklov Eigenvalues	<i>Bruno Colbois, Alexandre Girouard, Antoine Métras</i>
58	Spectra of Boolean Graphs Over Finite Fields of Characteristic Two	<i>D. Scott Dillery, John D. LaGrange</i>
66	Rigidity Properties for Hyperbolic Generalizations	<i>Brendan Burns Healy</i>
77	On the Coarse Geometry of James Spaces	<i>Gilles Lancien, Colin Petitjean, Antonin Procházka</i>
94	Triangularization of Matrices and Polynomial Maps	<i>Yueyue Li, Yan Tian, Xiankun Du</i>
106	Embedding Theorems for Dirichlet Type Spaces	<i>Songxiao Li, Junming Liu, Cheng Yuan</i>
118	Infinitesimal Hilbertianity of Weighted Riemannian Manifolds	<i>Danka Lučić, Enrico Pasqualetto</i>
141	Block Decomposition and Weighted Hausdorff Content	<i>Hiroki Saito, Hitoshi Tanaka, Toshikazu Watanabe</i>
157	On Parseval Wavelet Frames via Multiresolution Analyses in H_G^2	<i>A. San Antolín</i>
173	Retract Rationality and Algebraic Tori	<i>Federico Scavia</i>
187	Value Sets of Sparse Polynomials	<i>Igor E. Shparlinski, José Felipe Voloch</i>
197	A Common Extension of Arhangel'ski's Theorem and the Hajnal–Juhász Inequality	<i>Angelo Bella, Santi Spadaro</i>
204	Real Hypersurfaces in the Complex Quadric with Lie Invariant Structure Jacobi Operator	<i>Young Jin Suh, Gyu Jong Kim</i>
222	Orlicz–Besov Extension and Imbedding	<i>Hongyan Sun</i>
242	On Periodic Solutions to Constrained Lagrangian System	<i>Oleg Zubelevic</i>
