Health & Nutrition Claims

Commentary on the EU Health Claims Regulation

Meisterernst/Haber (eds)

The influence of the Regulation on health and nutrition claims on the law on food advertising, on product development work in food enterprises, on the advertising industry, foodstuff monitoring and on nutrition science, cannot be overestimated. The book comments the Regulation article by article giving an explanation for all the relevant terms, concepts of the law and consequences for the practice. The authors combine legal and scientific expertise. Andreas Meisterernst is senior partner of a food law firm and lecturer on food law at the Technical University of Munich. Bernd Haber, PhD, is state examined food chemist and works for the regulatory affairs department of a multinational food ingredients manufacturer.

EJRR

EUROPEAN
JOURNAL OF
RISK
REGULATION 

A JOURNAL AT THE INTERFACE OF SCIENCE AND LAW

As the European Union is increasingly emerging as de facto global regulator of all kinds of rules concerning the environment, human health and safety, risk regulation is becoming a new lens through which to analyse the European integration process. Indeed, today the most important and widespread form of EU regulation in the internal market is concerned with the government of risk to individuals' health and safety.

The European Journal of Risk Regulation (EJRR) provides an innovative forum for informed and scholarly discussion on how these risks are regulated across policy domains in Europe and beyond. While the central focus of the journal is the European law regulating inter alia Chemicals, Nanomaterials, Pharmaceuticals, Food, Cosmetics, Medical Devices, Pollution, Climate Change, and Public Health, discussion extends to other social sciences, such as sociology, political science, risk analysis, economics, cognitive psychology as well as to the physical and life sciences.

EJRR strikes a balance between the interests of the practitioners, notably those increasingly engaged in advice to the industry and in regulatory drafting, and a more theoretical focus, combining normative articles with timely contributions on legislative and judicial developments, new literature and relevant events.
