

CORRIGENDUM

Positive maternal mental health during pregnancy associated with specific forms of adaptive development in early childhood: Evidence from a longitudinal study—CORRIGENDUM

DESIREE Y. PHUA, MICHELLE K. Z. L. KEE, DAWN X. P. KOH, ANNE RIFKIN-GRABOI, MARY DANIELS, HELEN CHEN, YAP SENG CHONG, BIRIT F. P. BROEKMAN, ILIANA MAGIATI, NEERJA KARNANI, MICHAEL PLUESS, MICHAEL J. MEANEY, AND THE GROWING UP IN SINGAPORE TOWARDS HEALTHY OUTCOMES STUDY GROUP

doi:10.1017/S0954579417001249, published by Cambridge University Press, November, 22, 2017

On page 1575 of Phua et al. (2017), the work by Magiati et al. (2015) should have been cited after the brief description of the Q-CHAT administered at 18 months, as this study examined the factor structure of the Q-CHAT in the GUSTO neurocognitive domain sample.

In addition, the Q-CHAT language factor was inadvertently included in Table 6. This factor and findings related

to this factor should not be considered or interpreted, as the Q-CHAT language factor has only four items and low internal consistency. Only the Q-CHAT total social and behavioral factors should be considered in the results and in the results' interpretation.

The authors apologize for these errors.
