CAMBRIDGE

Fair Division

From Cake-Cutting to Dispute Resolution

Steven J. Brams and Alan D. Taylor

This book treats fair division problems through a rigorous analysis of a variety of procedures for allocating goods or deciding who wins on what issues, when there are disputes.

'everything a layperson might need to know about fair division.' *Discover*

£14.95 PB 0 521 55644 9

Padé Approximants

Second Edition

Geroge A. Baker, Jr. and Peter Graves-Morris

This second edition has been thoroughly updated, with a substantial new chapter on multiseries approximants. There are also newly extended sections devoted to circuit design, matrix Padé approximation, and computational methods.

£65.00 HB 0 521 45007 1 762 pp. 1996
Encyclopedia of Mathematics and its Applications 59

Compliance Quantified

An Introduction to Data Verification

Rudolf Avenhaus and Morton John Canty

Foreword by Francesco Calogero

A self-contained, straightforward account of the mathematics needed to help ensure compliance with international agreements, e.g. on arms control or the environment. The only prerequisites are simple calculus and statistics.

£35.00 HB 0 521 55366 0 270 pp. 1996

The Life and Legacy of G. I. Taylor

G. K. Batchelor

G. I. Taylor's contribution to our understanding of the science of solids and liquids has been profound and long-lasting. This interesting and unusual mix of science and biography helps us to understand why.

£45.00 HB 0 521 46121 9 301 pp. 1996

Iterative Solution Methods

Now in Paperback

Owe Axelsson

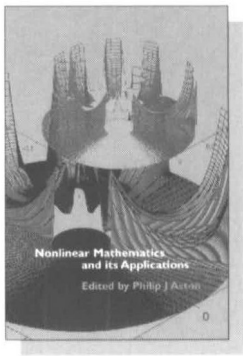
This book deals primarily with the numerical solution of linear systems of equations by iterative methods. A valuable resource for students and researchers alike wishing to learn more about iterative methods.

£22.95 PB 0 521 55569 8 668 pp. 1996

Nonlinear Mathematics and its Applications

Proceedings of the EPSRC Postgraduate Spring School in Applied Nonlinear Mathematics, University of Surrey, 1995.

Edited by Philip J. Aston



Collected here are lectures on nonlinear applied mathematics given by a team of internationally distinguished scientists.

£45.00 HB 0 521 57190 1 264 pp. 1996
£15.95 PB 0 521 57676 8

INSTRUCTIONS FOR CONTRIBUTORS

Editorial policy The **European Journal of Applied Mathematics** aims to publish papers in all areas of applied mathematics, with especial emphasis on the following.

(i) **The exposition of new mathematical ideas relevant to the modelling and analysis of modern technological processes.**

(ii) **The development of interesting mathematical methods with broad areas of applicability.**

There is no restriction in the areas of applicability or the style of mathematics as long as the content is presented so as to be as accessible as possible to the entire community of mathematicians and mathematical scientists. This applies in particular to the introductory section of the paper. Standard mathematical techniques will only be published if they are associated with novel applications or lead to substantial advances in established problem areas.

Submission of manuscripts Papers may be submitted to any of the Editors. Three copies should be sent accompanied by the author's address, telephone and fax number, and if possible an electronic mailing address. Electronic communications can be used for minor corrections and for messages to the Editors.

Submission of a paper is taken to imply that it has not been previously published and that it is not being considered for publication elsewhere. Upon acceptance of a paper, the author will be asked to transfer copyright to the publisher.

Authors are encouraged to submit papers electronically by sending a LaTeX file to ejam@vax.oxford.ac.uk; this file should include the figures (line figures only). Authors using LaTeX must use the EJAM style file which can be obtained using anonymous FTP from the internet address ftp.cup.cam.ac.uk. Retrieve from the directory/pub/texarchive/journals/latex/ejm the style file ejm.sty and the user guide ejmguide.tex. In case of difficulties obtaining these files, there is a help-line available via e-mail; please contact texline@cup.cam.ac.uk. Alternatively, authors may use "article" style. On final acceptance of a paper, authors should send the LaTeX source code on disc to the Editors-in-Chief, together with a hardcopy identical to the file. Discs should be in Apple Mac or PC format and will not be returned. The publisher reserves the right to typeset any article by conventional means if the author's TeX code presents problems in production.

Layout of manuscripts Papers should be typewritten **in double spacing throughout**, on one side of the paper. Please avoid footnotes if possible. Papers must begin with an abstract of not more than 300 words, and they should end with a brief concluding section. The SI system of units must be used throughout. There is no formal restriction on length, but short papers are likely to appear sooner than long ones (over 16 typed pages) which are likely to be subject to delay.

Illustrations Figures should be drawn in indian ink on good quality white paper or produced by computer to comparable quality. Wherever possible they will be reproduced *with* the author's lettering. Originals of figures should *not* be included until the paper has been accepted. A list of captions for figures should be attached separately. Where appropriate, articles may be illustrated by photographs: high-quality glossy black and white prints are necessary.

References The Harvard system of references is preferred. References should be listed in alphabetical order at the end of the main text. Please include the article title in the reference, which should be in the order: author's surname, initials; year in parentheses; article title; journal name, abbreviated in accordance with the *World List of Scientific Periodicals* (4th Edn); volume number (underlined); inclusive page numbers.

Citations in the text Any unambiguous system is acceptable. Three recommended ways of citing a 1992 paper by A. European are: European (1992); European [Eu]; or European [7]; the first two are preferred. In the second case, the reference at the end of the text should be preceded by [Eu], and in the third by [7].

Proof Reading Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors. No page charge is made.

Offprints 25 offprints of each article will be supplied free to each first named author. Extra offprints may be purchased from the publisher if ordered at proof stage.

Information on the *European Journal of Applied Mathematics* and all other Cambridge journals is available on http://www.cup.cam.ac.uk/ and in North America on http://www.cup.org/ .
