## General Notes

### “COLLEGIUM OTO-RHINO-LARYNGOLOGICUM AMICITIÆ SACRUM.”

This Society (a note on the formation of which was published in the January number of the *Journal of Laryngology and Otology* for 1927) holds its Annual Meeting this year in London. By kind permission of the Royal Society of Medicine, their rooms at No. 1 Wimpole Street have been placed at the disposal of this Society for their meetings, which are arranged for 18th, 19th, and 20th July (9 A.M. to 1 P.M. and 2.30 P.M. to 6.30 P.M.).

The Committee of the Society beg to announce that any members of the Sections of Otology and Laryngology will be welcomed at these meetings, and trust that members will accept this general invitation. Inquiries as to further details should be addressed to the Secretary, Professor Dr C. E. Benjamins, Verlengde Heereweg, 143 Gröningen, Holland, or to Dr Albert A. Gray (President for the year) at Ferens Institute of Oto-Laryngology, Middlesex Hospital Annexe, Cleveland Street, London, W.

We have been asked to call the attention of Specialists intending to visit Vienna, that there is in Vienna the American Medical Association of Vienna, which is now a well developed organisation which exists for the purpose of facilitating post-graduate medical work for English-speaking physicians. All of the English medical courses given under the auspices of the University are administered through this organisation.

For further information, address American Medical Association of Vienna, Vienna 8, Alserstrasse 9, Austria.

Eng. and Edin., Additional Honorary Surgeon to Ear, Nose, and Throat Department, at Paddington Green Children's Hospital; Ronald Savege, M.C., M.B., Ch.B., F.R.C.S., D.L.O., Aural Surgeon at the Lewisham Treatment Centre (L.C.C.).

# Models of the Labyrinth

These models (King's College Hospital pattern) were devised by

Mr A. H. CHEATLE

and

Mr NEGUS

for teaching purposes  
and for investigating  
labyrinthine diseases.

The pointers on the Head frame lie parallel with the Frankfort plane, so that when the frame is on the head the models lie in correct orientation in all respects. The patient's head can be put in any position and the exact relations of each of the canals are seen; rotation and caloric tests can be carried out with the frame in position.
