## PESTS OF FIELD CROPS

F. G. W. Jones and Margaret G. Jones

'This book should be invaluable to students in university departments of agriculture and agricultural colleges.' Journal of the Association of Agriculture

'A remarkable volume which, in a commendably short text, covers all the major agricultural pests found in Britain.' *The Guardian*

### THE MECHANISM OF HEREDITY

#### H. L. F. Whitehouse

An excellent synthesis of the evidence for all current beliefs concerning the mechanism of heredity. This aspect of genetics occupies a central position in modern biology and the book is therefore a most important addition to the literature. **55s. net** 

## ELEMENTARY MICROTECHNIQUE

THIRD EDITION

H. Alan Peacock

In this, the third edition of the well-known textbook, the author has added new material and techniques that have been perfected since the second edition, including the Feulgen cytological techniques and notes on embedding by the collodion, freezing, gelatin and resin methods. He has also revised and rationalised the arrangement of much material to maintain the book's usefulness as a concise and handy reference book.

## **CROP SCIENCE**

Crop breeders, plant geneticists and physiologists, and workers in related areas will find *Crop Science* a source of valuable articles in their branches of science. This bimonthly journal carries reports of research in the genetics, physiology, ecology, breeding and management of field crops, turfgrasses, pastures and ranges, and in seed technology. It is published by the Crop Science Society of America.

\$16.00 per year in U.S. and Canada. \$17.00 per year elsewhere.

Crop Science Society of America 677 S. Segoe Rd, Madison, Wisconsin, U.S.A., 53711

The Journal of Agricultural Science is issued every other month in parts of about 150 pages with plates and figures, three parts constituting a volume. Two volumes yearly.

Quotations for available back volumes and parts may be obtained on application to the Cambridge University Press.

Papers for publication should be typewritten or written in a very legible hand, and may be sent to Dr G. D. H. BELL, Plant Breeding Institute, Maris Lane, Trumpington, Cambridge, or to the Associate Editors. Other communications should be addressed to the University Press, Cambridge.

If Plates in excess of one per 24 pages of text or coloured plates are submitted the author may be asked to bear the cost of such Plates.

The lettering on text figures should be clear of the illustration and indicating by blue pencilled lines the desired position.

Bibliography should be given in the form of 'references' in the following form:

Surname of authors (in alphabetical order), initials, date of publication (in brackets), title of Journal (abbreviated according to the *World list of Scientific Periodicals*), volume and page of reference. In the text a reference should be quoted by the author's name and date (in brackets).

All names of Journals and books are set in italics; they should be indicated on the typescript by underlining. Contributors will receive twenty-five copies of their papers free.

The subscription price, payable in advance, is 75s. net per volume (post free); single numbers 32s. 6d. net. Subscriptions may be sent to any bookseller, or to The Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1.

Subscription price in the U.S.A. is \$13.50 per volume; single numbers \$5.50. Enquiries should be addressed to the Cambridge University Press, American Branch, 32 East 57th Street, New York, N.Y. 10022.

Printed in Great Britain at the University Printing House, Cambridge (Brooke Crutchley, University Printer)
