# The Journal of Laryngology and Otology

(FOUNDED in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY  
G. H. BATEMAN

ASSISTANT EDITOR  
LIONEL TAYLOR

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this *Journal* solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgment must be made.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced. Captions to illustrations should be typed on a separate sheet and sent at the same time as original photographs, etc.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951) *J. Laryng.*, 65, 33. Abbreviations of Journals should follow the style recommended in *World Medical Periodicals*, published by World Health Organization, 1952.

It is most important that authors should verify *personally* the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added. Proofs should be returned within 5 days.

4. Illustration blocks will normally be held by the Printers for three years, after which they will be destroyed. Any author is entitled to have these returned to him, but a request for this must be sent within three years of the appearance of the article, to HEADLEY BROTHERS, 109 Kingsway, London, WC2. Coloured illustrations will be charged to authors, unless a special grant is authorized by the Editor.

5. Orders for reprints must be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, WC2.

7. The annual subscription is five guineas sterling (U.S.A. \$15) post free, and payable in advance.

8. Single copies will be on sale at 12s. 6d. each; copies of parts up to Vol. LXIII which are available may be purchased at 7s. 6d. each.

9. All subscriptions, advertising and business communications should be sent to the publishers, HEADLEY BROTHERS, 109 KINGSWAY, LONDON, WC2.

## *United States of America*

Orders for this *Journal* may be sent through local booksellers, or to STECHERT-HAFNER, INC., 31-33 East 10th Street, New York, or direct to the publishers, HEADLEY BROTHERS, 109 KINGSWAY, LONDON, WC2, England.

## Instrumentation for Audiology and Psychoacoustics

**U.K. Distributors of the World's leading makes**

*Our Range includes :*

- Portable Audiometers
- Clinical Audiometers
- Bekezy Audiometers
- Speech Audiometers
- Acoustic Impedance Meters
- Sound Level Meters
- Zwislocki Bridge
- Psychogalvanometer
- Auditory Trainers
- Group Hearing Aids
- Individual Hearing Aids for  
School use
- Silicon Based Aural Impression  
Materials
- Audiometric Examination  
Rooms and many other items

# AMPLIVOX AUDIOMETER SERVICE

**Only Amplivox** provides complete calibration and service facilities for Amplivox audiometers

***Specify Amplivox Service because it guarantees :***

- \* Factory service, reliability and accuracy with constant reference to N.P.L.
- \* The only service centre in the country with Amplivox spare parts
- \* Factory trained service engineers

**Only** by specifying Amplivox will you ensure servicing and calibration by trained operatives and the use of standard parts

***Only Amplivox Service is your guarantee of accuracy and reliability***

# AMPLIVOX

FOR CLINICAL AUDIOMETRY

**Audiometer Booths**

prefabricated to ensure correct acoustic environment for threshold audiometry, research, etc. Available in standard and special sizes.

**Manual Audiometers**

with narrow band masking for highest accuracy and extended resolution. Battery-operated transistor models also available.

**Automatic Audiometers**

As exclusive U.K. distributors, we are able to offer Rudmose Self-Recording Audiometers from the most simple to the most comprehensive Diagnostic Békésy Audiometer illustrated.

**Calibration Service, Screening, Speech & Industrial Audiometers**

Please write for technical literature to meet your needs

# WHEN RECOMMENDING A HEARING AID WHY MULTITONE?

Because as well as a complete range of hearing aids, to suit all types of deafness, Multitone cater for the specialised needs of those patients who suffer from physical handicaps which preclude them from using normal hearing aids.

For spastic and thalidomide children, special fitting devices have been developed in conjunction with ENT Specialists.

For the very elderly, Electronic Ear Trumpets and Communicators considerably ease the problem of communication.

If you would like to know more about these devices or if you have any fitting problems — please write or telephone us.

A 5 year old boy wearing a Multitone spastic fitting device.

Just one of the reasons why Ceporin has an important place in the ENT unit

Please mention *The Journal of Laryngology and Otology* when replying to advertisements

# Ceporin<sup>®</sup> (cephaloridine)

**Broad spectrum**

Ceporin is highly active against many gram-positive organisms—including penicillin-resistant staphylococci—and many gram-negative organisms.

**Bactericidal**

Ceporin rapidly kills susceptible organisms at or near the minimum inhibitory concentration.

**Safe**

Ceporin has very low toxicity and can usually be given safely to penicillin-hypersensitive patients. The injection is remarkably painless.

Please mention *The Journal of Laryngology and Otology* when replying to advertisements

**Clinical success**

In the ENT unit, Ceforin has proved valuable for use in place of more toxic drugs or combinations of antibiotics. In particular, it is an excellent alternative where penicillin might have proved ineffective or dangerous. While Ceforin is effective in the simple staphylococcal or streptococcal infections, its activity among the gram-negative organisms is also very useful in the mixed infections often encountered in the ear, nose and throat.

Please mention *The Journal of Laryngology and Otology* when replying to advertisements

# Ceporin<sub>(cephaloridine)</sub>

## Presentation

Ceporin is issued in vials containing 250 mg, 500 mg and 1 gram of cephaloridine, packed singly and in boxes of five.

Ceporin is a Glaxo trade mark

Detailed literature is available from  
Glaxo Laboratories Ltd  
Greenford, Middlesex

# Why is Penbritin the safer antibiotic in paediatrics?

## Skin and Soft Tissue Infections and Otitis Media

I am glad you called again. I want to discuss Skin and Soft Tissue Infections. How effective is Penbritin in these conditions?

Very effective. In fact a trial of Penbritin in General Practice pointed out that: 'There was a particularly good response to Penbritin in acute otitis media, cellulitis and impetigo.'<sup>1</sup>

What sort of tissue concentrations does Penbritin achieve?

Good ones – flexible too. Penbritin is well absorbed orally, giving effective concentrations in both blood and tissues. Doubling the dose virtually doubles blood levels and increases the tissue concentrations.

That could be very useful. You mentioned acute otitis media just now. Sometimes these cases take quite a while to clear up and are very painful for the children.

Of course, these may well be mixed infections. Recent work has shown that quite frequently *H. influenzae* can be isolated from children with otitis media.<sup>2</sup> Penbritin's bactericidal activity against a wide range of bacteria makes it particularly valuable in this sort of case.

But is Penbritin clinically more effective than other antibiotics?

A General Practitioner recently wrote that oral Penbritin is 'highly effective (even in otitis media when I had found oral penicillins fairly ineffective.)'<sup>3</sup> Also in a trial comparing Penbritin and tetracycline syrups, all the children with otitis media given Penbritin responded within a week, whereas only 60% of those given tetracycline syrup responded in that time.<sup>4</sup>

It seems to me that you're asking me to use Penbritin routinely. Isn't Penbritin too expensive for this?

Well doctor, a dose of Penbritin syrup now costs only 10d.

10d. a dose; it costs less than I thought. I hope this discussion has been useful in highlighting Penbritin's value in treating these infections in children.

It certainly has, in fact all these discussions have been very useful. I have been using Penbritin in certain conditions but had not until now fully realised its wide applications especially in children's infections . . .

**Published trials<sup>†</sup> in this country and throughout the world endorse the effectiveness of Penbritin in a wide range of indications, including:-**

Acute tonsillitis · Laryngitis  
Bronchitis · Pneumonia · Wound Infections · Carbuncles · Furunculosis  
Impetigo · Cellulitis · Erysipelas  
Recurrent Cystitis · Pyelonephritis

### Children's Dosage:

Under 2 years: 62·5 – 125 mg. four times daily, before meals. 2–10 years: 125 – 250 mg. four times daily, before meals.

### Availability: Penbritin (ampicillin B.P.)

Paediatric Tablets containing 125 mg.  
Capsules 250 mg. and 500 mg.  
Syrup 125 mg./5 ml. teaspoonful.  
Syrup Forte 250 mg./5 ml. teaspoonful.  
IM. injection 100 mg., 250 mg. and 500 mg.

### Contra-Indication: Penicillin Allergy
