A LEADING PSYCHIATRY PUBLISHER

**AMERICAN PSYCHIATRIC
ASSOCIATION PUBLICATIONS**

Now available through CUP

Diagnostic and Statistical Manual of Mental Disorders (DSM-III)

R. L. SPITZER

This revision of one of the most important publications in psychiatry is unsurpassed in its completeness, clinical reliability, and description of criteria and codes for psychiatric diagnostic classification. It includes diagnostic criteria, a multiaxial approach to evaluation, expanded descriptions of some disorders and many additional categories.

Paperback £25.00 net

DSM-III Case Book

A Learning Companion to the Diagnostic and Statistical Manual of Mental Disorders

**R. L. SPITZER, A. E. SKODOL, M. GIBBON
and J. B. W. WILLIAMS**

Over 200 case vignettes of real patients illustrate mental disorders in adults, children and adolescents. Also included are cases for multiaxial evaluation, diagnostic dilemmas, cases for testing, historical cases. There are a number of appendices.

Paperback £17.50 net

A Psychiatric Glossary

Edited by **A. WERNER, R. J. CAMPBELL,
S. H. FRAZIER, E. M. STONE
and J. EDGERTON**

This glossary incorporates the revised nomenclature of the APA's new *Diagnostic and Statistical Manual (DSM III)*. Diagnostic terms have been arranged and cross-referenced to allow easy use of the glossary by those familiar with the older nomenclature.

Paperback £6.95 net

Quick Reference to the Diagnostic Criteria from DSM-III

R. L. SPITZER

A convenient pocket-sized booklet that contains only the classification, diagnostic criteria, and a list of the most important conditions to be considered in a differential diagnosis of each category.

Paperback £12.95 net

Desk Reference to the Diagnostic Criteria from DSM-III

R. L. SPITZER

Similar to the Quick Reference, but with the following additional features: spiralbound to lay open and flat on a desk; full classification on a single foldout sheet; a new alphabetical listing to help you pinpoint the code number quickly; large pages and convenient grouping of criteria.

Paperback £15.00 net

In the new series:

THE SCIENTIFIC BASIS OF PSYCHIATRY

Artificial Intelligence and Psychiatry

D. J. HAND

This book will provide the psychiatrist with a basic knowledge of the methods and concepts used in the sphere of artificial intelligence. The techniques not only involve building models of the mind (and hence aid hypothesis testing) but also incorporate programs to assist the everyday work of psychiatrists.

£25.00 net

Hormones and Human Behaviour

B. T. DONOVAN

This volume provides an up-to-date and readily digestible account of current knowledge concerning the influence of hormones on behaviour, largely from a physiological point of view. The topics covered include the control of eating, drinking, sexual behaviour, emotional behaviour, learning and memory, as well as the ways in which psychiatric states may affect these activities, and in which hormones may alter mental function.

Psychiatry, Human Rights and the Law

Edited by **SIR MARTIN ROTH and R. BLUGLASS**

The contributors to this volume consider possible approaches towards the resolution of the main dilemmas that face psychiatry, society and the law, and towards healing the rifts that have arisen between these and other professions concerned with the mentally ill. The writers also consider means for the promotion of more humane, successful and socially efficient services.

Sherlock Holmes
and the Case of
Dr Freud

MICHAEL SHEPHERD

Sherlock Holmes and the Case of Dr Freud

MICHAEL SHEPHERD

The similarities between the two legendary figures of Freud and Holmes have been remarked by several observers – writers, critics, and physicians. In this essay, Professor Shepherd argues that the association is not fortuitous: the link consists essentially in what purports to be a form of scientific method presented with the power of the mythopoeic imagination. His argument is both scholarly and entertaining.

NOTES FOR CONTRIBUTORS

PAPERS Papers for publication should be addressed to the Editor, Professor Michael Shepherd, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London SE5 8AF. Contributors should send at least three copies of the text, tables, and figures. Copies other than the first may be xeroxed. The S.I. system should be adopted for text and figures. A short synopsis of about 50 words should be provided at the beginning of each article. Foreign quotations and phrases should be followed by a translation. If necessary, guidelines for statistical presentation may be found in: Altman, D. G., Gore, S. M., Gardner, M. J. & Pocock, S. J. (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere.

In addition to longer articles, the Editor is prepared to accept preliminary and brief communications of between 1500 and 2500 words.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins. The following information must be given on a single separate sheet: (1) title and short title for running head (not more than 100 characters); (2) authors' names, and (3) department in which work was done. Footnotes on the same sheet should list: (i) the authors' present addresses if different from departments in which work was done; (ii) name and address of the author to whom correspondence should be addressed; (iii) receipt of grants. Authors who would like a reprint address to be printed should include this on their manuscript.

REFERENCES (1) In the text these should follow the Harvard system – that is, name followed by date: Brown (1970). If there are more than two authors the first author's name followed by *et al.* should be used, even the first time that the reference appears. (2) The list of references should be typed in alphabetical order on a separate sheet and should appear as follows: Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* **1**, 134–136. Journal titles should be given in full.

Books should be cited as follows: Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

ILLUSTRATIONS Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. 70 mm). *Diagrams* These will usually be reduced to 70 mm wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

PROOFS AND OFFPRINTS Page proofs will be sent to the senior author. Corrections other than printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.
