MESSRS. BELL'S LATEST BOOKS

Latest Volumes in Bell's Mathematical Series.

A FIRST COURSE IN THE CALCULUS. By W. P. MILNE, M.A., D.Sc., Mathematical Master at Clifton Coll., Bristol, Examiner in Mathematics, University of St. Andrews, and G. J. B. WESTCOTT, M.A., Head Mathematical Master, Bristol Grammar School, formerly Scholar of Queen's Coll., Oxford, and University Mathematical Exhibitioner. Crown 8vo. 3s. 6d. [*Ready early Autumn.*

The first part of this First Course is devoted to the Differential Calculus with applications to Rates, Maxima and Minima, and Geometry. The second half deals with the processes of Integration in their application of Areas, Volumes, Centres of Gravity, Moments of Inertia, and Centres of Pressure.

DYNAMICS. By R. C. FAWDRY, M.A., B.Sc., sometime Scholar of Corpus Christi College, Cambridge; and Head of the Military and Engineering Side, Clifton College. Part I., Second Edition, 3s.

Part II., 2s. 6d. [*Ready early Autumn.*

School World.—"Mr. Fawdry has performed his task with the sure touch of one who is familiar with all the difficulties which beginners in this subject experience."

A SHILLING ARITHMETIC. By JOHN W. ROBERTSON, M.A., B.Sc., Mathematical Master, Robert Gordon's College, Aberdeen, and Lecturer at Aberdeen Technical College. Crown 8vo. Fifth Edition. 1s. 3d. net; or with Answers, 1s. 9d. net.

Nature.—". . . . Deserves the attention of the teacher. . . . Carefully devised and arranged original examples . . . . not overloaded with text . . . . has a useful set of forty test papers . . . . is practical throughout."

COMMERCIAL ARITHMETIC AND ACCOUNTS. By A. RISDON PALMER, B.A., B.Sc., Head of Matriculation Department, and JAMES STEPHENSON, M.A., M.Com., B.Sc. (Econ.), Head of the Higher Commercial Department, both of The Polytechnic, Regent Street, London.

Part I., Third Edition, 2s. 6d. net; with Answers, 3s. net. Part II., Second Edition, 2s. 6d. net; with Answers, 3s. net. Parts I. and II. complete in one volume, 4s. net; with Answers, 5s. net. Part III. (*in preparation*). Answers separately, Part I., 6d. net; Part II., 1s. net; Parts I. and II. together, 1s. 6d. net.

Nature.—"It almost makes one wish one were a modern child, so that one could be educated on such a book."

STATICS. By R. C. FAWDRY, M.A., B.Sc. Crown 8vo, 4s. 6d.; or Part I., Third Edition, 3s. Part II., 2s. 6d.

Nature.—"This book can be confidently recommended."

PLANE TRIGONOMETRY. By H. L. REED, M.A., Assistant Mathematical and Science Master, Westminster School. Crown 8vo. 4s.

A. M. A.—"After a trial extending over two and a half years, we have no hesitation in declaring it to be the best school book on the market."

ARITHMETIC. By F. W. DOBBS, M.A., and H. K. MARSDEN, M.A., Assistant Masters at Eton College. Part I. Crown 8vo, 3s. 6d. Answers to Revision Papers, 1s. net. [Part II. *in the Press.*

G. BELL & SONS, LTD.,

YORK HOUSE, PORTUGAL STREET, LONDON, W.C. 2.

AN ENQUIRY CONCERNING THE PRINCIPLES OF NATURAL KNOWLEDGE

By A. N. WHITEHEAD, Sc.D., F.R.S. Demy 8vo. 12s 6d net.

Three main streams of thought are relevant to the theme of the author's enquiry—the scientific, the mathematical, and the philosophical movements; and the investigation is based on the principle that the scientific concepts of space and time are the first outcome of the simplest generalisations from experience. The four parts of the book are entitled respectively: The Traditions of Science; The Data of Science; The Method of Extensive Abstraction; The Theory of Objects.

PROBLEMS OF COSMOGONY AND STELLAR DYNAMICS

Being an Essay to which the Adams Prize of the University of Cambridge for the Year 1917 was adjudged

By J. H. JEANS, M.A., F.R.S. Large royal 8vo. With 5 plates. 21s net.

"This instructive and valuable book, which, it seems not too much to say, is a summing-up of what is now known, and of what is usefully to be conjectured by scientific inquiry, . . . in its more speculative chapters enters into airy zones of research through which not only men of science will be fascinated to follow."

The Scotsman.

LECTURES ON THE PRINCIPLE OF SYMMETRY

and its Application in all Natural Sciences

By F. M. JAEGER, Ph.D., Professor of Inorganic and Physical Chemistry in the University of Groningen, Holland.

Royal 8vo. With 170 diagrams. 20s net.

"This book is assured a welcome, particularly as few authors are so well qualified as Prof. Jaeger to deal with this subject. . . . The book is well worth careful study."

Science Progress.

AN ELEMENTARY COURSE OF INFINITESIMAL CALCULUS

By H. LAMB, Sc.D., F.R.S. Third edition, revised. Demy 8vo. 20s net.

"The third edition of Prof. Lamb's important treatise in which general principles are amply illustrated by most helpful examples on every page."—*The Times.*

MATRICES AND DETERMINOIDS

By C. E. CULLIS, M.A., Ph.D. Vol. II. Royal 8vo. 42s net.

CONTENTS: Compound Matrices; Relations between the Elements and Minor Determinants of a Matrix; Some Properties of Square Matrices; Ranks of Matrix Products and Matrix Factors; Equigradient Transformations of a Matrix whose Elements are Constants; Some Matrix Equations of the Second Degree; The Extravagances of Matrices and of Spacelets in Homogeneous Space; The Paratomy and Orthotomy of Two Matrices and of Two Spacelets of Homogeneous Space.

Volume I, previously published, 21s net.

A TREATISE ON PLANE TRIGONOMETRY

By E. W. HOBSON, F.R.S. Fourth edition. Demy 8vo. 12s 6d net.

"There was a time when Professor Hobson's volume was the only British textbook in which the higher portions of the subject were adequately treated. Even now it has no serious rival."—*The Mathematical Gazette* on the Third Edition.
