Contents

Preface	ix
Committees	xi
List of Participants	xiii
List of acronyms and abbreviations	xvii
Introductory Lecture and Remarks	
K. LAMBECK: The Earth's variable rotation: some geophysical causes	1
J. A. HUGHES: Remarks concerning reference frames	21
I. CELESTIAL REFERENCE SYSTEMS	
C. DE VEGT and K. J. JOHNSTON: Reference frames in astrometry	25
N. CAPITAINE and B. GUINOT: A non-rotating origin on the instantaneous equator	33
A. T. SINCLAIR: A re-interpretation of the definition of UT1	39
J. O. DICKEY, et al.: Reference frames: determinations and connections	41
E. M. STANDISH, et al.: The reference frame of the ephemerides	49
A. L. WHIPPLE, et al.: Improving the dynamical reference frame through minor planet orbit correction using crossing point observations	55
E. F. ARIAS, et al.: Relative orientation of VLBI celestial reference frames	61
J.-F. LESTRADE: Relationship between the JPL radio celestial reference frame and a preliminary FK5 frame	67
L. B. F. CLAUZET, et al.: The radiostar α Scorpii	71
C. MA: The VLBI celestial reference frame of the NASA Crustal Dynamics Project	73
Y. TAKAHASHI, et al.: Celestial reference coordinate system of VLBI with US-Japan joint VLBI experiments	83
P. CHARLOT, et al.: Radio source structures in VLBI astrometry	91
G. H. KAPLAN, et al.: Fundamental radio reference frame from VLA observations of minor planets	97
M. SOFFEL, et al.: Reference frames in relativistic space-time	99
T. FUKUSHIMA: Coordinate system in general relativity	105

II. TERRESTRIAL REFERENCE SYSTEMS

C. BOUCHER and Z. ALTAMIMI: Status of the realization of the BIH Terrestrial System	107
A. E. NIELL: Geocentric Terrestrial Reference Frame Accuracy: DSN Spacecraft Tracking and VLBI/Lunar Laser Ranging	115
J. W. RYAN and W. E. HIMWICH: Toward a unified terrestrial coordinate system	121
J. A. BANGERT and J. P. CUNNINGHAM: Preliminary evaluation of Doppler-determined pole positions computed using World Geodetic System 1984	131
A. T. SINCLAIR, et al.: Determination of earth rotation and station coordinates from Lageos data	141
P. WILSON: The mobile laser-ranging system as a comparative tool for monitoring the terrestrial reference frame	147

III. DETERMINATION OF EARTH ROTATION PARAMETERS

S. MANABE, et al.: Simultaneous determination of the Earth rotation parameters and coordinates of the optical astrometric stations	153
X X NEWHALL, et al.: Earth rotation from lunar laser ranging	159
R. L. RICKLEFS and P. J. SHELUS: An analysis of MLRS Near-Real-Time Earth orientation results	165
H. SCHUH: Analysis of UT1 determinations by VLBI within project IRIS	171
W. E. CARTER, et al.: High frequency variations in Earth rotation	181
A. MALLAMA, et al.: Consistency of CDP and IRIS VLBI Earth orientation results	187
A. NOTHNAGEL, et al.: Radiointerferometric polar motion determination using a very long north-south baseline	193
W. H. WOODEN: Earth orientation from Doppler tracking of the Navy navigation satellite system	199
R. I. ABBOT, et al.: Earth rotation from radio interferometric tracking of GPS satellites	209
R. VERBEIREN: Polar motion from ILS observations with least-squares collocation	215
L. A. HINNOV and J. PARK: Multi-windowed spectrum estimates of the ILS polar motion	221

IV. COMBINATION AND PREDICTION OF EARTH ROTATION PARAMETERS

G. A. WILKINS: Review of the achievements of project MERIT for the intercomparison of techniques for monitoring the rotation of the Earth	227
B. A. ARCHINAL: Combination of data from different space geodetic systems for the determination of Earth rotation parameters	233
A. K. BABCOCK: Recent improvements in the U.S.N.O. combined solution for Earth rotation parameters	241
C. R. WILSON and R. O. VICENTE: The combination of polar motion observations	247
D. D. MORABITO, et al.: Kalman filtering of Earth orientation changes	257
M. FEISSEL, et al.: Predicting Universal Time from astronomical and meteorological measurements	269
D. D. McCARTHY: Predicting Earth orientation	275
N. SEKIGUCHI: Weights for prediction of Earth orientation parameters	281
R. D. ROSEN, et al.: Forecasting length-of-day using numerical weather prediction models	285
R. HIDE: Forecasting short-term changes in the Earth's rotation	287
R. A. HULL, et al.: Atmospheric angular momentum and its relation to the length of day	289

V. PRECESSION & NUTATION

T. A. HERRING, et al.: Bound on the amplitude of the Earth's free core-nutation	293
W. E. HIMWICH and E. J. HARDER: Direct estimation of nutation coefficients from VLBI data	301
B. RICHTER and W. ZÜRN: Chandler effect and nearly diurnal free wobble as determined from observations with a superconducting gravimeter	309
C. F. YODER and E. R. IVINS: On the ellipticity of the core-mantle boundary from Earth nutations and gravity	317
V. DEHANT: Nutations and inelasticity of the Earth	323
Y. KUBO and T. FUKUSHIMA: Numerical integration of precession and nutation of the rigid Earth	331
J. SCHASTOK, et al.: The post-Newtonian rotation of Earth: a first approach ..	341

VI. CAUSES OF VARIATIONS IN EARTH ROTATION PARAMETERS

P. BROSCHE: The oceans and the Earth's rotation	349
D. DJUROVIC and P. PAQUET: Short-term variation of the Earth's rotation and the solar activity	353
J. VONDRÁK: Is Chandler frequency constant?	359
T. M. EUBANKS, et al.: The atmospheric excitation of rapid polar motions	365
B. F. CHAO, et al.: Snow-load excitation of the Earth's annual wobble	373
C. R. WILSON, et al.: Computation of water storage contributions to polar motion	381
M. ZHAO and D. DONG: A new research for the secular polar motion in this century	385
H. LENHARDT and E. GROTEN: Analysis of recent polar motion data in view of excitation function and possible seismic causes	393
R. S. GROSS: The effect of earthquakes on the ERP during 1977–1985	399
Y. ZHENG: Effect of earthquakes on observations of time and latitude	405

VII. OTHER TOPICS

E. W. GRAFAREND: Geophysical models of the surface global vorticity vector ..	411
Wm. MARKOWITZ: Comparisons of ET (solar), ET (lunar), UT, and TDT	413
L. FAIRHEAD, et al.: The time transformation TDB–TDT: an analytical formula and related problem of convention	419
W. J. KLEPCZYNSKI: Effects of variations in Earth rotation on extended use of GPS orbits	427
A. R. WHITNEY: Capabilities and performance of the upgraded Mark III correlator system	429
K. YOKOYAMA and S. MANABE: The role of Japan in the new international Earth rotation service (expected contribution of the planned Japanese VLBI system VERA)	439
E. B. FOMALONT: The VLB array: a new geophysical tool	445
H. SCHUH, et al.: Evidence for the Earth's gravitational time delay in VLBI experiments	453
Ya. YATSKIV, et al.: Determination of Earth rotation from laser ranging to Lageos and related researches	455
Resolutions	461
Index	465
