British Economic Growth 1856–1973

R. C. O. Matthews, C. H. Feinstein & J. C. Odling-Smee. This is a historical account of the course and causes of British economic growth from the mid-19th century until 1973, with special emphasis on the unparalleled economic expansion that followed World War II. The authors trace the growth of output, inputs of labor and capital, and total factor productivity, for the whole economy and for individual sectors, over the entire 117-year period. For each topic considered they provide detailed comparisons of the postwar period with the interwar years, and with the period from 1856 to 1913. Concluding chapters offer a summary of the major findings regarding the determinants of output and productivity growth over the period from 1856 to 1973. \$65.00

THE ARTHUR H. COLE GRANTS-IN-AID

For Research in Economic History

- are awarded each year to supplement other sources of research support;
- are biased in favor of young post-doctorates turning dissertations into publishable articles and monographs, but are open to all;
- are awarded by the six-member Committee on Research in Economic History on the basis of an application due on April 1 each year;
- are granted for research in any geographic region in the world and in any time period;
- are described in more detail in a prospectus sent out by the Secretary, Council on Research in Economic History, The Economic History Association, Box 3630, Wilmington, Delaware 19807.

Chicago

MONETARY TRENDS IN THE UNITED STATES AND THE UNITED KINGDOM

Their Relation to Income, Prices, and Interest Rates, 1867-1975

Milton Friedman and Anna J. Schwartz

The culmination of more than 25 years of research on money and its effects, this long-awaited study is the first to provide statistical and theoretical analysis of such a long period of time, allowing the authors to purge the data of cyclical fluctuations so that long-term trends could be examined.

Cloth \$48.00 672 pages Available

THE RULES OF THE GAME

Reform and Evolution in the International Monetary System

Kenneth W. Dam

Adopting a legal and historical perspective, Dam analyzes the rules changes that have occurred in the international monetary system from the nineteenth century to the 1980s.

Cloth \$27.00 404 pages Available

THE DYNAMICS OF BUSINESS-GOVERNMENT RELATIONS

Industry and Exports, 1893-1921

William H. Becker

"At last we have some solid information on which to understand the relationship between business and the state, between American firms and the shapers of U.S. foreign policy. . . . [This] will be the book that every critic and apologist for U.S. foreign economic policy will have to deal with in the future." —Richard Abrams, University of California, Berkeley

*Chicago Original \$20.00 272 pages Available

*First edition paperbacks in a durable format—sewn bindings, wrap-around covers, acid-free paper—that permits lower prices for specialized works of original research and scholarship.

THE LIMITS TO CAPITAL

David Harvey

This book provides a complete reexposition and extension of Marx's analysis of capitalism. Starting from first principles, Harvey covers all aspects of the capitalist economy, achieving a breadth of analysis and synthesis attained by few other modern writers.

Cloth \$30.00 496 pages October

JOHN LOCKE

Economist and Social Scientist

Karen Iversen Vaughn

"Fine work in historical reconstruction, such as Professor Vaughn's, helps to remind us that many problems open in the seventeenth century are also open today." —David Levy, *Journal of Economic Literature*

Paper \$6.50 192 pages Available
