# PHILOSOPHICAL BOOKS

---

**Edited by Anthony Ellis**

**Philosophical Books** was founded by the **Analysis** committee in 1960 to provide prompt, scholarly reviews to assist both librarians and individuals in the choice of professional works of philosophy. Besides conventional reviews in both contemporary philosophy and the history of the subject, the journal includes regular discussion features where authors of selected titles have the opportunity to reply to reviewers. There are also occasional subject surveys, and issues devoted to a single theme.

*The Journal of Social and Biological Structures* is concerned with the relationship between biological and social phenomena at the level of theory rather than analogy. Today diverse areas of biological and social theory are producing compatible models and there is an intensification of the search for general principles applicable to the entire spectrum of dynamic organizations, ranging from cells to the highest systems. This journal enhances the search for more inclusive and more fundamental syntheses.
