CAMBRIDGE

JOURNALS

Top Journal in Microscopy

2012 Impact Factor:
2.495*

Published for the Microscopy Society of America

EDITOR: **Robert L. Price**, University of South Carolina, USA

The only journal owned by scientists and published for scientists, *Microscopy and Microanalysis* provides original research papers in the fields of microscopy, imaging, and compositional analysis. This distinguished international forum is intended for microscopists in both biology and materials science.

4 channel simultaneous HRSTEM imaging of SrTiO₃ using 4 STEM detectors.

3D EDS maps at different angles.

Temperature driven Al aggregation in solar cell. Sample courtesy of Dr. S. Kraschewski, U. Erlangen.

Fast 2D & 3D Imaging and Chemical Analysis with Talos TEM

Whether you work with metals, light elements, or nanoparticles—from macro to atomic scales—Talos gives you insight into structure and composition for a complete understanding of material properties.

High speed 2D and 3D EDS analysis: Fast, multichannel, automated EDS acquisition and precise quantification to obtain multidimensional compositional maps.

Fast navigation and imaging: Highest throughput, highest resolution uncorrected S/TEM images—even for beam sensitive and challenging materials.

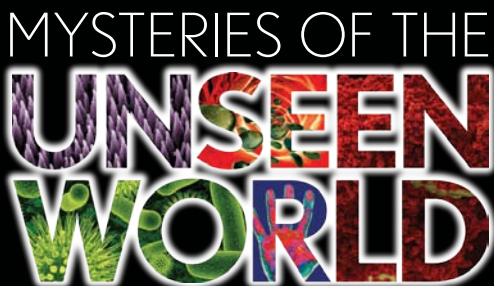

Space to do more: FEI TEMs have the space to accommodate additional *in situ* holders for dynamic imaging, diffraction, and tomography applications.
