

Book published by the American Psychiatric Press Inc. are now available throughout the world, except in North America, from Cambridge University Press.

The American Psychiatric Press Textbook of Neuropsychiatry

Edited by **ROBERT E. HALES** and **STUART C. YUDOFKY**

This tightly organized textbook has educational and clinical relevance for residents, psychiatrists, neurologists, neuropsychologists, and other professionals. Although it is primarily for professionals who work in a general hospital setting, clinicians and health personnel in many other settings – private practice, private or state psychiatric hospitals, community mental health centres, drug rehabilitation programmes, and alcohol treatment centres – will also find this textbook informative and useful in managing clinical problems.

Study Guide and Self-Assessment for the American Psychiatric Press Textbook of Neuropsychiatry

MICHAEL D. FRANZEN and **MARK R. LOVELL**

The *Study Guide* was designed to highlight key points raised in each chapter of *The American Psychiatric Press Textbook of Neuropsychiatry*. It consists of 15 to 20 multiple choice questions per chapter. The answers, condensed versions of the discussion in the *Textbook*, highlight the most important features of each chapter.

Psychiatry Update: The American Psychiatric Association Annual Review, Volume 6

Edited by **ROBERT E. HALES** and **A. J. FRANCES**

The *Annual Review* provides the field of psychiatry with the latest advances in selected topical areas, in this case bipolar disorders, neuroscience techniques, differential therapeutics, the violent patient, epidemiology, and drug side effects. It successfully fills the gap between information presented in psychiatric journals and material appearing in major textbooks.

Developmental Psychiatry

Edited by **MICHAEL RUTTER**

This large-format text provides a nontechnical account of those aspects of human development that are particularly relevant to an understanding of psychiatric disorders. Findings and issues in the study of normal development are explored, and against these the developmental aspects of psychopathology are considered. The book is designed to be relevant to the clinician and coverage is therefore weighted toward findings in the fields of play, social development, emotional development, psychosexual development, and moral development, as well as the more widely examined area of cognitive development.

Computer Applications in Psychiatry

JONATHAN D. LIEFF

This book is written as a practical guide for the psychiatrist, presenting a state-of-the-art review of the potential use of computers. Many exciting projects that are now underway in areas of clinical practice, research and administration are described. The book lets the programmers do the programming, so that, without masses of reading and research, the reader can reap the enormous benefits of using computers in psychiatry. 1988 384pp. 0 521 35009 3 £27.50 net

Anxiety and Its Treatment

Help is Available

JOHN H. GREIST, JAMES W. JEFFERSON and ISAAC M. MARKS

This is an accessible, non-technical guide to understanding what anxiety is and how it can be treated. The book aims to help people who are being treated for anxiety as well as those who are considering treatment for their anxiety, and for their family and friends. It includes two self-tests specially designed to diagnose a person's level of anxiety, and features the details of a proven self-help programme that anxiety sufferers can use on their own to conquer their fear. 1988 202pp. 0 521 35456 0 £15.00 net

Chronic Mental Illness in Children and Adolescents

Edited by JOHN G. LOONEY

There are youngsters whose illnesses are so severe and longstanding that they strain the psychological and financial integrity of even the most competent families; and for whom the existing mental health system has been ineffective. This book describes the needs of such youngsters from the perspectives of both clinical help and future policy decisions. 1988 267pp. 0 521 35907 4 £25.00 net

An Annotated Bibliography of DSM III

Edited by ANDREW E. SKODOL and ROBERT L. SPITZER

The *Annotated Bibliography* is a companion to DSM III which focuses on issues in the classification of mental disorders. 1987 496pp. 0 521 35012 3 £15.00 net

DSM III R is available from Cambridge

Since its publication last year, DSM III R has established itself as the pre-eminent psychiatric reference text, with implications throughout the field. Outside North America, DSM III R is available only from Cambridge, in hard covers and paperback, with Desk Reference and Quick Reference for everyday use.

HEINEMANN MEDICAL BOOKS

PRESENT . . .

Schizophrenia: The Major Issues

Edited by Paul Bebbington, PhD, MRCP, MRCPsych Honorary Senior Lecturer, MRC Social Psychiatry Unit, Institute of Psychiatry, and Peter McGuffin, MRCP, MRCPsych, DPM Professor, Department of Psychological Medicine, University of Wales, Cardiff, Honorary Secretary to the Research Committee of the Mental Health Foundation.

It is now 80 years since Schizophrenia was first used by Bleuler, and yet psychiatrists and neuroscientists are still ignorant of the exact nature of this, the most common of the psychoses. This important and far-reaching book addresses the central issue — 'what is schizophrenia?' — with contributions from some leading clinicians and researchers in the field.

Prepared in parallel with a conference organised by the Mental Health Foundation 'New Initiatives in Schizophrenia Research', many of the chapters in this book are concerned with fundamental aetiological theories, including the mode of genetic transmission, the neurochemical and histopathological basis of schizophrenia and the nature of psychological abnormality.

This major contribution to the literature of schizophrenia, serves both to define the limits of present knowledge and point towards future possibilities at a time of rapidly developing understanding of the condition. It will be of the greatest interest to the entire psychiatric community.

Published in association with the Mental Health Foundation.

ALSO . . .

Student Psychiatry Today A Comprehensive Textbook

by Robert I. Cohen, MRCPsych and Jerome J. Hart, MRCPsych, Senior Registrars in Psychiatry, The London Hospital.

This stimulating new textbook presents an unusually clear and eclectic view of a complex speciality. Psychiatric phenomena and disorders are vividly and realistically illustrated and a balanced approach to causation and management is adopted:

- Theories, concepts and factual information are clearly and imaginatively presented in a readable way, avoiding jargon.
- Abundant use of vignettes and case histories links theory to clinical practice
- Flow charts, as well as line diagrams, enhance understanding
- Technical terms are fully explained and a glossary is provided
- Comprehensive summaries at the ends of chapters reinforce learning.

The book will prove invaluable to undergraduate students, taking them beyond their initial training into hospital practice or the community. It will also prove useful to postgraduates needing to refresh their knowledge.

RESEARCH GRANTS

The Research Committee of the Foundation exists to foster and support research in all fields bearing on mental health, mental illness and disorders of mental development.

The Committee meets twice a year to award **RESEARCH GRANTS TO PROVIDE SCIENTIFIC ASSISTANCE, EXPENSES or EQUIPMENT** for research workers.

Closing Dates:

March 1st for Meeting in May

September 1st for Meeting in November

For Grant application forms and further details apply in writing to:

The Honorary Secretary,
The Research Committee,
Mental Health Foundation,
8 Hallam Street,
London W1N 6DH

Mental Health Foundation

Career Development Fellowships for Research Into Mental Disorders

Applications are invited from medical and scientific graduates for a Fellowship for research training in the field of mental disorder.

These awards which are tenable for up to 3 years, are intended for clinicians with a training in psychiatry or intending to train in psychiatry, or postdoctoral scientists who wish to extend their research experience. The Research proposals should be relevant to mental health or related basic science and the applicant should intend to continue research in this field. These Fellowships may be held in appropriate departments or clinical centres in Great Britain. The Trustees are prepared to consider a request that part of the Fellowship be spent in a suitable centre, or centres, abroad in cases where the necessary research training cannot all be obtained in Great Britain. Candidates are welcome to discuss their plans with the Honorary Secretary of the Research Committee.

Candidates should not normally be over 32 years of age for science graduates and 34 years for medical graduates. However, consideration will be given to those over this age where their career has been affected either by a late start or by interruption for personal family reasons.

Applications should be made jointly with the head of the Department in which the candidate proposes to work. Salaries will be in the range of University Lecturer or NHS Registrar scales (whichever is appropriate) according to age and experience.

Application forms can be obtained by *writing* to
The Secretary of the Research Committee
The Mental Health Foundation
8 Hallam Street, London W1N 6DH

**APPLICATIONS MUST BE RETURNED
BY MARCH 1st**

(Late applications will not be considered)

M. P. Janisse, University of Manitoba (Ed.)

Individual Differences, Stress, and Health Psychology

1988. 12 figures. Approx. 192 pages. (Contributions to Psychology and Medicine). Hard cover DM 64,-. ISBN 3-540-96669-2

Distinguished international researchers in health psychology speculate on the future of the field and its application to developing treatments or changes in lifestyles that may prevent or alleviate such disorders as cancer, coronary heart disease, hypertension, and post-traumatic stress syndrome.

M. G. Aman, Ohio; N. N. Singh, Illinois (Eds.)

Psychopharmacology of the Developmental Disabilities

1988. 2 figures. Approx. 265 pages. (Disorders of Human Learning, Behavior, and Communication). Hard cover DM 98,-. ISBN 3-540-96679-X

A distinguished group of international experts offers comprehensive coverage of traditional psychotropic as well as novel pharmacological agents, antiepileptic drugs, and diet and vitamin treatments. Issues related to litigation, measurement of blood levels, tardive dyskinesia, and behavioral pharmacology are discussed in detail.

E. Brähler, University of Gießen (Ed.)

Body Experience

The Subjective Dimension of Psyche and Soma

1988. 13 figures. Approx. 320 pages. (Contribution to Psychosomatic Medicine). Hard cover DM 88,-. ISBN 3-540-18914-9

Contents: The Significance of Body Experience. - Body Experience in Therapy. - Sex-Specific Body Experience. - Measuring Body Experience and Body Complaints. - Subject Index.

I. Hand, Hamburg; H.-U. Wittchen, München (Hrsg.)

Panic and Phobias II

Treatments and Variables Affecting Outcome

1988. 35 figures. Approx. 290 pages. Hard cover DM 148,-. ISBN 3-540-19088-0

For the clinician as well as for the researcher, this book provides the most up-to-date information about the current state of treatment-relevant research in panic and phobias.

Psychopharmacology Series

Volume 6

I. Hindmarch, Leeds; H. Ott, Berlin (Eds.)

Benzodiazepine Receptor Ligands, Memory and Information Processing

Psychometric, Psychopharmacological and Clinical Issues

1988. Approx. 76 figures. Approx. 320 pages. Hard cover DM 138,-. ISBN 3-540-18702-2

This volume aims to demonstrate techniques for assessing memory in volunteer and patient populations and to use these techniques to evaluate potential promnesic drugs, all of which are benzodiazepine receptor ligands.

Volume 5

D. E. Casey, Portland; A. V. Christensen, Copenhagen (Eds.)

Psychopharmacology: Current Trends

1988. 18 figures. Approx. 248 pages. Hard cover DM 128,-. ISBN 3-540-18693-X

This volume reports on the latest clinical and basic science information on schizophrenia, affective disorders, anxiety and dementia.

H.-J. Senn, L. Schmid, St. Gallen (Eds.)

Supportive Care in Cancer Patients

1988. 61 figures, 97 tables. Approx. 352 pages. (Recent Results in Cancer Research, Volume 108). Hard cover DM 178,-. ISBN 3-540-17150-9

Too often, supportive measures such as pain control and psychosocial support are regarded in an isolated fashion by various monodisciplinary specialists.

This volume challenges physicians, nurses and social workers to deliver optimal supportive therapy and care to cancer patients.

H.-J. Möller, University of Munich; A. Schmidtke, University of Würzburg; R. Welz, University of Göttingen (Eds.)

Current Issues of Suicidology

1988. 114 figures, 159 tables. Approx. 520 pages. Hard cover DM 178,-. ISBN 3-540-18806-1

From the Contents: Epidemiology and Socio-demographic and Psychiatric Background Variables of Suicidal Behavior. - Course and Prediction. - Biological Factors. - Psychosocial Factors. - Treatment Evaluation.

H.-C. Diener, Tübingen; M. Wilkinson, London

Drug-Induced Headache

1988. 26 figures, 74 tables. Approx. 230 pages. (Advances in Applied Neurological Sciences, Volume 5). Hard cover DM 98,-. ISBN 3-540-18762-6

This survey covers the clinical features of drug-induced headache, in particular neurological and pharmacological aspects. Psychological, behavioral and social aspects are also discussed. A final section considers possible withdrawal treatment for drug-induced headache.

Prices are subject to change without notice.

MONOGRAPH SUPPLEMENTS

- Classification of mental disorder in primary care R. Jenkins, N. Smeeton and M. Shepherd
- The natural history of tolerance to the benzodiazepines A. Higgitt, P. Fonagy and M. Lader

NOTES FOR CONTRIBUTORS

PAPERS Papers for publication should be addressed to the Editor, Professor Michael Shepherd, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London SE5 8AF. Contributors should send at least three copies of the text, tables, and figures. Copies other than the first may be xeroxed. The S.I. system should be adopted for text and figures. A short synopsis of about 50 words should be provided at the beginning of each article. Foreign quotations and phrases should be followed by a translation. If necessary, guidelines for statistical presentation may be found in: Altman, D. G., Gore, S. M., Gardner, M. J. & Pocock, S. J. (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere.

In addition to longer articles, the Editor is prepared to accept preliminary and brief communications of between 1500 and 2500 words.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins throughout, including references. The following information must be given on a single separate sheet: (1) title and short title for running head (not more than 100 characters); (2) authors' names, and (3) department in which work was done. Footnotes on the same sheet should list: (i) the authors' present addresses if different from departments in which work was done; (ii) name and address of the author to whom correspondence should be addressed; (iii) receipt of grants. Authors who would like a reprint address to be printed should include this on their manuscript.

REFERENCES (1) In the text these should follow the Harvard system – that is, name followed by date: Brown (1970). If there are more than two authors the first author's name followed by *et al.* should be used, even the first time that the reference appears. (2) The list of references should be typed in alphabetical order on a separate sheet and should appear as follows: Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* **1**, 134–136. Journal titles should be given in full.

Books should be cited as follows: Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

Articles from edited books should be cited as follows: Brown, G. W. (1974). Meaning, measurement and stress of life events. In *Stressful Life Events: Their Nature and Effects* (ed. B. S. Dohrenwend and B. P. Dohrenwend), pp. 217–244. John Wiley: New York.

ILLUSTRATIONS Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. 70 mm). *Diagrams* These will usually be reduced to 70 mm wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

PROOFS AND OFFPRINTS Page proofs will be sent to the senior author. Corrections other than printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.
