

INTERNATIONAL JOURNAL OF  
**MICROWAVE AND WIRELESS TECHNOLOGIES**

## CONTENTS

### PASSIVE COMPONENTS AND CIRCUITS

**Design of a wideband isolated out-of-phase filtering power divider/combiner with sharp selectivity**  
 Xuedao Wang, Dawei Wang, Zai-Cheng Guo and Gang Zhang 727

**Analysis and design of weak coupling coupler based on the half mode substrate integrated waveguide**  
 Minghui You, Guohua Liu and Zhiqun Cheng 734

### RFID AND SENSORS

**High capacity chipless RFID tags for biomass tracking application**  
 Amjad Ali, Christopher Smartt, Ed Lester, Orla Williams and Steve Greedy 742

**Impact of dielectric substrates on chipless RFID tag performance**  
 Amjad Ali, Christopher Smartt, Jisun Im, Orla Williams, Ed Lester and Steve Greedy 753

**Design and analysis of broadband circularly polarized compact planar antennas for 2.45 GHz RFID handheld reader applications**  
 Niraj Agrawal, Anil Kumar Gautam and Karumudi Rambabu 764

### WIRELESS POWER TRANSFER AND ENERGY HARVESTING

**Patch antenna with multi-cell EBG for RF energy harvesting applications**  
 Sravya R. Venkata, Vinnakota Sarath Sankar and Runa Kumari 772

**Investigation of a high-gain and broadband circularly polarized monopole antenna for RF energy harvesting application**  
 Bikash Ranjan Behera and Sanjeev Kumar Mishra 781

### EM FIELD THEORY

**Pattern diversity and isolation enhancement of UWB MIMO antenna based on characteristic modes for mobile terminals**  
 Shailesh Jayant, Garima Srivastava and Sachin Kumar 793

### BIOMEDICAL APPLICATIONS

**Miniaturized tunable extended eight-port hybrid coupler for 1.5 T MRI**  
 Zachary A. Colwell and Sung-Min Sohn 805

**Printed compact four-port wearable MIMO antennas for wideband wireless applications**  
 Saurabh Singh and Sudhanshu Verma 810

### ANTENNA DESIGN, MODELING AND MEASUREMENTS

**Modified ground and slotted MIMO antennas for 5G sub-6 GHz frequency bands**  
 Neetu Agrawal, Manish Gupta and Sanjay Chouhan 817

**A fully flexible, high gain saw-tooth-shaped boundary fractal wearable patch antenna for WBAN applications**  
 Sandhya Mallavarapu and Anjaneyulu Lokam 826

**High gain and circularly polarized beam-switching 8 × 8 Vivaldi antenna array for X-band application**  
 Tohid Aribi, Tohid Sedghi and Reza Khajeh Mohammad Lou 836

**Strong coupling induced notched bands of UWB antennas using meta-surfaces**  
 Jinbiao Zhu, Wen Jiang, Yuquan Liu, Pengyu Yin and Lili Guo 843

**A novel compact quad-band planar antenna using meander-line, multi-stubs, and slots for WiMAX, WLAN, LTE/5G sub-6 GHz applications**  
 Tarek Maamria, Mouloud Challal, Fateh Benmahmoud, Khelil Fertat and Ammar Mesloub 852

**Low-cost, compact, and reconfigurable antennas using complementary split-ring resonator metasurface for next-generation communication systems**  
 Shobhit K. Patel, Sunil P. Lavadiya, Juveriya Parmar, Sudipta Das, Kawsar Ahmed and Sofyan A. Taya 860

**Compact, broadband, and thin corrugated U-shaped patch-constituted MIMO antennas for airborne UAV applications**  
 Kapil Jain and Vivek Singh Kushwah 871

**Coupling receiver-transmitter metasurface-based Fabry-Pérot resonant antenna with dual circular polarization**  
 Zhiqiang Yuan 881

**Evolution of gain enhancement techniques in dielectric resonator antenna: applications and challenges**  
 Ankita H. Harkare, Ashwin G. Kothari and Ankit A. Bhurane 891
