

## Subscription rates

Subscription rates for volume **41** (2009) of *Advances in Applied Probability* (AAP) are as follows (post free and including online access at <http://projecteuclid.org/aap/>): US\$384.00; A\$402.00; £186.00 for libraries and institutions; or US\$128.00; A\$134.00; £62.00 for individuals belonging to a recognised scientific society. The subscription rates for volume **46** (2009) of *Journal of Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 272 9782; email [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk)). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

## Notes for contributors

Research papers are published in both the *Journal of Applied Probability* (JAP) and *Advances in Applied Probability* (AAP), with longer papers usually appearing in AAP. In addition, JAP publishes short communications of a few printed pages in the nature of notes and letters specifically related to papers that have appeared in JAP. Review papers and papers in *stochastic geometry and statistical applications* are published in AAP.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2000 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L<sup>A</sup>T<sub>E</sub>X class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files (with hard copy back-up). All submissions *will be acknowledged on receipt and must be accompanied by a covering letter stating the author's postal address and affiliation*. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript™ (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is [l.nash@sheffield.ac.uk](mailto:l.nash@sheffield.ac.uk). Authors should also submit one hard copy to the Executive Editor, as above.

## Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001–8678/09

PRINTED IN NORTHERN IRELAND AT THE UNIVERSITIES PRESS (BELFAST) LTD

*Stochastic Geometry and Statistical Applications*

- 623 BARTŁOMIEJ BŁASZCZYŚZYN AND D. YOGESHWARAN. Directionally convex ordering of random measures, shot noise fields, and some applications to wireless communications
- 647 HOCK PENG CHAN. Maxima of moving sums in a Poisson random field
- 664 DAVID DEREUDRE. The existence of quermass-interaction processes for nonlocally stable interaction and nonbounded convex grains
- 682 ROLF SCHNEIDER. Weighted faces of Poisson hyperplane tessellations

*General Applied Probability*

- 695 RENÉ CALDENTEY, EDWARD H. KAPLAN AND GIDEON WEISS. FCFS infinite bipartite matching of servers and customers
- 731 STEPHANIE LEOCARD. Selective sweep and the size of the hitchhiking set
- 765 FRANK BALL, DAVID SIRL AND PIETER TRAPMAN. Threshold behaviour and final outcome of an epidemic on a random network with household structure
- 797 ABHIMANYU MITRA AND SIDNEY I. RESNICK. Aggregation of rapidly varying risks and asymptotic independence
- 829 GIACOMO ALETTI, CATERINA MAY AND PIERCESARE SECCHI. A central limit theorem, and related results, for a two-color randomly reinforced urn
- 845 WLODEK BRYC, DAVID MINDA AND SUNDER SETHURAMAN. Large deviations for the leaves in some random trees
- 874 UĞUR TUNCAY ALPARSLAN. Exceedance of power barriers for integrated continuous-time stationary ergodic stable processes
- 893 DAVID MÁRQUEZ-CARRERAS. Generalized fractional kinetic equations: another point of view
