

Index of Subjects

- Airborne infection in a fully air-conditioned hospital, I, 15; II, 31; III, 45; IV, 445
- Antibiotic therapy and the faecal excretion of *Salmonella typhimurium* by experimentally infected chickens, 275
- Autoclaves and their dangers, and safety in laboratories, 475
- Bacteriological tests as indices for the development of off-flavours in cream, 113
- Brucella* spp., *Yersinia enterocolitica* serotype IX and *Salmonella* serotypes: serological relationship, 151
- Camelpox virus from Kenya, characteristics of, 381
- Citrobacter koseri*. I. An extended antigenic scheme for, 121; II. Serological and biochemical examination of, 129
- Clostridium botulinum* in the lakes and waterways of London, 371
- Contamination of fluids from a hospital pharmacy, 87
- Corynebacterium diphtheriae* strains isolated in Victoria from 1962 to 1971, numerical analysis of the characteristics of, 413
- Cream, bacteriological tests as indices for the development of off-flavours in, 113
- Dairy factories: sludge from as a potential hazard to animal health, 143
- Diphtheria in Victoria, 1952–1971. Numerical analysis of the characteristics of the *C. diphtheriae* strains isolated, 413
- Endemic infection in surgical wards, 185
- Endotoxins detected by the Limulus test in burned and unburned mice infected with different species of gram-negative bacteria, 99
- Epidemiology of ephemeral fever in Kenya, 231
- Epidemiology of Rift Valley fever in Kenya, 219
- Faecal flora of children in the United Kingdom, 135
- Feeding diets containing permitted antibiotics and the faecal excretion of *Salmonella typhimurium* by experimentally infected chickens, 293
- Foot-and-mouth disease vaccination, hypersensitivity in cattle: response to hydroxypropylmethylcellulose, 79
- Foot-and-mouth disease virus type A, variation among strains in the Eastern Mediterranean region, 1964–1972, 387
- Haemophilus (acute) infections of children: investigation of the family background of, 315
- Hospital pharmacy, contamination of fluids from, 87
- Hydatid cysts in man, serologic evidence of the postoperative persistence of, 333
- Hypersensitivity in cattle after foot-and-mouth disease vaccination: response to hydroxypropylmethylcellulose, 79
- Influenza surveillance, a collaborative programme for, 1
- Influenza virus, a new surface-antigen-adsorbed vaccine, I, 341; II, 353
- Influenza virus vaccines, live attenuated and detergent split, comparative trials of, 425
- Leprosy, multiple skin testing in, 57
- Limulus test, detection of endotoxins with, in burned and unburned mice infected with different species of gram-negative bacteria, 99
- Myxoma virus strains of differing virulence grades, differential transmissibility of by the rabbit flea *Spilopsyllus cuniculi* (Dale), 237

- Naegleria fowleri*, the effect of thermal pollution on the distribution of, 7
- Persistence of antibody induced by rubella vaccine after six years, 407
- Persistence, postoperative, of hydatid cysts in man, 333
- Pseudomonas aeruginosa* infection in hospital: a comparison between 'infective' and 'environmental strains', 195
- Removal of total organisms and pathogens from the skin, 259
- Rhinovirus colds through indirect contact, possible transmission of, 249
- R factors, transfer *in vivo* between *Escherichia coli* strains inoculated into the rumen of sheep, 363
- Rubella, serological investigation of cases and contacts of, 91
- Rubella vaccine (Wistar RA 27/3 strain), persistence of antibody induced by, after six years, 407
- Salmonellas, isolation of, from British pork sausages and sausage meat, 173
- Salmonella typhimurium* in C57BL/6 mice, experimental model of oral antityphoid vaccination with live streptomycin-dependent, 215
- Salmonella typhimurium*, effects of antibiotic therapy on the faecal excretion by experimentally infected chickens, 275, 293
- Salmonella* vaccines, live streptomycin-dependent: the problem of reversion to a virulent form, 203
- Serological investigation of cases and contacts of rubella, 91
- Serological and biochemical examination of *Citrobacter koseri*, 129
- Serological relationship between *Brucella* spp., *Yersinia enterocolitica* serotype IX and *Salmonella* serotypes of Kauffmann-White group N, 151
- Skin, removal of total organisms and pathogens from, 259
- Skin testing of Kenyan schoolchildren with a series of new tuberculins, 303
- Skin testing in leprosy, 57
- Sludge from dairy factories: a potential hazard to animal health, 143
- Staphylococcus aureus* and its nasal acquisition by patients in a fully air-conditioned hospital, 445
- Streptococcal infection in young pigs, IV, 69
- Thermal pollution and the distribution of *Naegleria fowleri*, 7
- Transfer *in vivo* of R factors between *Escherichia coli* strains inoculated into the rumen of sheep, 363
- Transmissibility of myxoma virus strains of differing virulence grades by the rabbit flea *Spilopsyllus cuniculi* (Dale), 237
- Vaccine, a new surface-antigen-adsorbed, against influenza virus, I, 341; II, 353
- Vaccine, rubella, persistence of antibody induced by, after six years, 407
- Vaccines, comparative trials of live attenuated and detergent split influenza virus, 425
- Variation among strains of type A foot-and-mouth disease virus in the Eastern Mediterranean region 1964-1972, 387
- Vibrio cholerae*, type specific action of vibriocidal antibody on, 399
- Viruses: camelpox, 381; ephemeral fever, 231; foot-and-mouth, 79, 387; influenza, 341, 353, 425; myxoma, 237; rhinovirus, 249; Rift Valley fever, 219
