

THE JOURNAL OF DAIRY RESEARCH

EDITED FOR

The Committee of Management

BY

A. T. R. MATTICK,
B.Sc., Ph.D.

The National Institute for Research in Dairying,
University of Reading

and

J. A. B. SMITH,
Ph.D., D.Sc., F.R.I.C.

The Hannah Dairy Research Institute,
Kirkhill, Ayr

ASSISTED IN THE

SELECTION OF PAPERS FOR PUBLICATION

BY

DR L. BULL (Australia)

PROF. E. L. CROSSLEY (Reading)

PROF. D. B. CUTHBERTSON (Aberdeen)

PROF. I. DE BURGH DALY, F.R.S. (Cambridge)

DR H. P. DONALD (Edinburgh)

SIR PAUL FILDES, F.R.S. (London)

PROF. P. J. J. FOURIE (South Africa)

PROF. R. C. GARRY, F.R.S.E. (Glasgow)

DR T. GIBSON (Edinburgh)

DR J. HAMMOND, F.R.S. (Cambridge)

DR J. O. IRWIN (London)

DR A. G. LOCHHEAD, F.R.S. (C.) (Canada)

PROF. F. C. MINETT (Houghton)

PROF. W. RIDDET (New Zealand)

DR K. C. SEN (India)

SIR JAMES A. SCOTT WATSON (London)

VOLUME 20

CAMBRIDGE
THE UNIVERSITY PRESS

1953

Committee of Management

PROF. H. D. KAY, C.B.E., F.R.S. (*Chairman*)

PROF. R. C. GARRY, F.R.S.E.

MR W. H. SENIOR

DR E. MARSDEN

SIR HERBERT HOWARD

DR A. T. R. MATTICK } *Editors*

DR J. A. B. SMITH }

MR H. F. BURGESS, M.B.E. (*Secretary*)

Librarian and Editorial Assistant

MISS D. KNIGHT, B.A., F.L.A. Dip.Lib.

C O N T E N T S

No. 1 (FEBRUARY 1953)

| Original Articles: | PAGE |
|---|------|
| 493. Concerning the interpretation of observations, obtained from records and experiments, on milking dairy cows. C. P. COX | 1 |
| 494. The milk-ejection response of the sow to standard doses of oxytocic hormone. W. G. WHITTLESTONE | 13 |
| 495. The effect of prepartum milking on the composition of the prepartum and postpartum secretions of the cow. S. J. ROWLAND, J. H. B. ROY, H. J. SEARS and S. Y. THOMPSON | 16 |
| 496. The associative growth of <i>Bacillus cereus</i> and <i>Streptococcus lactis</i> in milk. ELLEN I. GARVIE and M. JEAN STONE | 29 |
| 497. An improved medium for lactobacilli. MARY BRIGGS | 36 |
| 498. Some group N streptococci isolated from raw milk. ELLEN I. GARVIE | 41 |
| 499. The inhibition of micro-organisms by raw milk. I. The occurrence of inhibitory and stimulatory phenomena. Methods of estimation. J. E. AUCLAIR and A. HIRSCH | 45 |
| 500. The so-called 'nascent' bacteriophage phenomenon. H. R. WHITEHEAD, ANNE EAST and LOLA McINTOSH | 60 |
| 501. The effect of storage at different relative humidities on the survival of micro-organisms in milk powder and in pure cultures dried in milk. CONSTANCE HIGGINBOTTOM | 65 |
| 502. The vitamin A potency of New Zealand butter. A. K. R. McDOWELL and F. H. McDOWALL | 76 |
| 503. The properties of New Zealand butters and butterfats. III. Seasonal variations in the nature of the unsaturated acids of butterfat as estimated by spectrophotometric methods. A. K. R. McDOWELL | 101 |
| 504. Studies on a washed curd variety of cheese. I. The influence of different types of starter. JOAN WHITMORE | 108 |
| Reviews of the Progress of Dairy Science: Section F. Milk-borne diseases. J. SMITH | 115 |

No. 2 (JUNE 1953)

| Original Articles: | |
|--|-----|
| 505. The accuracy of measurements of the mammary glands by the method of palpation. D. SHEPPARD | 127 |
| 506. The importance of machine milking rate in dairy cow management and breeding. F. H. DODD and A. S. FOOT | 138 |
| 507. Variations in the fat content of milk throughout the milking process. W. G. WHITTLESTONE | 146 |
| 508. Note on the corrosion of aluminium dairy equipment by water. G. H. BOTHAM and W. R. BRYSON | 154 |
| 509. Bacteriological studies on pasteurized milk. HAZEL ALEXANDER and CONSTANCE HIGGINBOTTOM | 156 |
| 510. Reactivation of milk phosphatase following heat treatment. I. R. C. WRIGHT and J. TRAMER | 177 |
| 511. Observations on the serological typing of group N ('lactic') streptococci. C. A. E. BRIGGS and L. G. M. NEWLAND | 189 |

| | PAGE |
|--|------|
| Original Articles: | |
| 512. A photoelectric method for determination of fat aldehyde values. R. M. DOLBY | 198 |
| 513. The effect of different cream treatments during the pasteurization process on the size distribution of fat globules in cream and butter. R. M. DOLBY | 201 |
| 514. Studies on a washed curd variety of cheese. II. The influence of variation in the washing and scalding processes. JOAN WHITMORE | 212 |
| 515. Cheddar cheese flavour and its relation to tyramine production by lactic acid bacteria. J. C. DACRE | 217 |
| Reviews of the Progress of Dairy Science: | |
| Section A. Physiology of dairy cattle. I. Reproduction and lactation. J. A. B. SMITH | 224 |
| No. 3 (OCTOBER 1953) | |
| Original Articles: | |
| 516. A simple method for preparing crystalline rennin. N. J. BERRIDGE and CORA WOODWARD | 255 |
| 517. Reactivation of milk phosphatase following heat treatment. II. R. C. WRIGHT and J. TRAMER | 258 |
| 518. The problem of fishiness in butter. P. MUNRO and C. R. BARNICOAT | 274 |
| 519. The cooling efficiencies and water pressures of some surface milk coolers for farms. J. K. SCOTT | 280 |
| 520. The effect of feeding iodinated casein and L-thyroxine upon the health, reproduction and yield of a dual-purpose breed of cattle, and a purely dairy breed. J. N. AITKEN, A. W. BOYNE and J. A. CRICHTON | 291 |
| 521. Normal variations in the rate of machine milking. F. H. DODD | 301 |
| 522. Automatic apparatus for drawing the milk-ejection curves of dairy cows under controlled milking conditions. W. G. WHITTLESTONE and D. S. M. PHILLIPS | 319 |
| 523. A note on the electrical resistance and the keeping quality of butter. J. H. PRENTICE | 327 |
| 524. The influence of feeding tocopherol to dairy cows on the yield of milk and milk-fat and on the tocopherol content and keeping quality of the butter. JENS NIELSEN, ANDERS N. FISKEK, AAGE H. PEDERSEN, INGE PRAGE, EBBE SØNDERGAARD and HENRIK DAM | 333 |
| 525. The deterioration of milking rubbers. III. The effect of farm treat- ment. J. H. COOPER and E. R. GARDNER | 340 |
| 526. A study of variation in twin cattle. I. General description. H. P. DONALD | 355 |
| 527. A study of variation in twin cattle. II. Fertility. H. P. DONALD and D. ANDERSON | 361 |
| 528. The inhibition of micro-organisms by raw milk. II. The separation and electrophoretic examination of two different inhibitory fractions. J. E. AUCLAIR and N. J. BERRIDGE | 370 |
| 529. Pulsation and milking rate. P. A. CLOUGH, F. H. DODD and E. W. HUGHES | 375 |
| Reviews of the Progress of Dairy Science: | |
| Section B. Bacteriology and mycology applied to dairying. E. R. HISCOX and C. A. E. BRIGGS | 381 |
