First published online – 7 February 2018, DOI: <https://doi.org/10.1017/S1368980017004128>

Original text (page 1, Abstract):

NZ had the highest percentage of beverages with sugar added to them (52%), while the UK had the lowest (9%,  $P < 0.001$ ).

Original text (page 4, Results):

### *Volumetric nutritional content*

Overall, NZ had the largest proportion of supermarket beverages that contained added sugar (52.3%). This was significantly higher than Australia (42.2%), Canada (42.8%) and the UK (9.0%;  $P \leq 0.001$ ).

Original text (page 2):

For each product, the following data were recorded from the product nutrition labels: brand name, product name, energy (kJ), protein, fat, carbohydrate and sugar content (g/100 ml), ingredients list, manufacturer-declared serving size and number of servings per pack.

Original text (page 3):

Taxation categories were <5 g/sugar/100 ml (no tax), 5–8 g/sugar/100 ml (18% tax per litre) and >8 g sugar/100 ml (24% tax per litre).

Original text (page 6, Figure 1 caption):

The UK sugar-tax levy proposes three categories: ■, <5 g sugar/100 ml (no tax); ■, 5–8 g sugar/100 ml (18% tax per litre); ■, >8 g sugar/100 ml (24% tax per litre).

Correction:

NZ had the highest percentage of beverages with sugar added to them (52%), while the UK had the lowest (**39%**,  $P < 0.001$ ).

Correction:

### *Volumetric nutritional content*

Overall, NZ had the largest proportion of supermarket beverages that contained added sugar (52.3%). This was significantly higher than Australia (42.2%), Canada (42.8%) and the UK (**38.8%**;  $P \leq 0.001$ ).

Correction:

For each product, the following data were recorded from the **product labels**: brand name, product name, energy (kJ), protein, fat, carbohydrate and sugar content (g/100 ml), ingredients list, manufacturer-declared serving size and number of servings per pack.

Correction:

Taxation categories were <5 g/sugar/100 ml (no tax), 5–8 g/sugar/100 ml (**18 pence (p) per litre**) and >8 g sugar/100 ml (**24 p per litre**).

Correction:

The UK sugar-tax levy proposes three categories: ■, <5 g sugar/100 ml (no tax); ■, 5–8 g sugar/100 ml (**18 p per litre**); ■, >8 g sugar/100 ml (**24 p per litre**).
