The book for the A.T.C.

## AIR NAVIGATION

for Beginners. By A. W. Siddons, M.A., Senior Mathematical Master, Harrow School. Just ready, 1s. net.

In this book an attempt has been made to develop the pupils' intelligence, rather than to teach tricks and mnemonics in order to get the right answers. There are numerous examples and an index. Answers to the examples, which can be attached to the instructor's copy, are obtainable on application to the publishers.

## ELEMENTARY MECHANICS

By A. W. Siddons, M.A., K. S. Snell, M.A., and N. R. C. Dockeray, M.A., of Harrow School. Complete, with answers and index, 6s. 6d. Separately, Part I, Statics, Part II, Dynamics, each 3s. 6d. An introductory mathematical treatment of the subject to Matriculation standard.

## FURTHER MECHANICS & HYDROSTATICS

Part III of the above course. With answers and index, 4s.

This part covers the syllabuses of the Qualifying Examination of the Mechanical Science Tripos at Cambridge, of Army Entrance Higher Mathematics and of the Higher Certificate ordinary papers.

**THE MATHEMATICAL ASSOCIATION**, which was founded in 1871, as the *Association for the Improvement of Geometrical Teaching*, aims not only at the promotion of its original object, but at bringing within its purview all branches of elementary mathematics.

Its purpose is to form a strong combination of all persons who are interested in promoting good methods of teaching mathematics. The Association has already been largely successful in this direction. It has become a recognised authority in its own department, and is continuing to exert an important influence on methods of examination.

"**THE MATHEMATICAL GAZETTE**" (published by Messrs. G. BELL & SONS, LTD.) is the organ of the Association. It is issued at least five times a year. The price per copy (to non-members) is usually 3s. each.

The *Gazette* contains—Articles, Notes, Reviews, etc., dealing with elementary mathematics, and with mathematical topics of general interest.
