BRITISH JOURNAL OF NUTRITION

Editor-in-Chief

G C Burdge, *University of Southampton, UK*

British Journal of Nutrition is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multi-disciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology, and the emerging area of nutritional genomics.

Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 18, 2015 (18 issues):
Internet/print package: £1276/\$2448 Americas only/€2045 EU only
Internet only: £924/\$1752 Americas only/€1469 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Focus on sugar-sweetened beverages
B Caballero 1143

HOT TOPIC – Sugar-sweetened beverages

Sugar-sweetened beverages, vascular risk factors and events: a systematic literature review
A Keller, BL Heitmann and N Olsen 1145

Sugar-sweetened beverage consumption and central and total adiposity in older children: a prospective study accounting for dietary reporting errors
SJ Bigornia, MP LaValley, SE Noel, LL Moore, AR Ness and PK Newby 1155

Beverage consumption in Brazil: results from the first National Dietary Survey
RA Pereira, AM Souza, KJ Duffey, R Sichert and BM Popkin 1164

Self-reported advertising exposure to sugar-sweetened beverages among US youth
G Kumar, S Onufrak, D Zytnick, B Kingsley and S Park 1173

Consumptions of plain water, moisture in foods and beverages, and total water in relation to dietary micronutrient intakes and serum nutrient profiles among US adults
M Yang and OK Chun 1180

Changes in beverage consumption from pre-pregnancy to early pregnancy in the Norwegian Fit for Delivery study
M Skreden, E Bere, LR Sagedal, I Vistad and NC Øverby 1187

An exploration and comparison of food and drink availability in homes in a sample of families of White and Pakistani origin within the UK
M Bryant, P Sahota, G Santorelli and A Hill 1197

Monitoring and surveillance

Sodium content and labelling of processed and ultra-processed food products marketed in Brazil
CA Martins, AA de Sousa, MB Veiros, DA González-Chica and RP da Costa Proença 1206

Dietary intake of Brazilian adolescents
CM Azeredo, LFM de Rezende, DS Canella, RM Claro, IRR de Castro, O do Carmo Luiz and RB Levy 1215

Assessment and methodology

Evaluation of tools used to measure calcium and/or dairy consumption in adults
A Magarey, L Baulderstone, A Yaxley, K Markow and M Miller 1225

Correlates of self-reported dietary cruciferous vegetable intake and urinary isothiocyanate from two cohorts in China
E Vogtmann, G Yang, H-L Li, J Wang, L-H Han, Q-J Wu, L Xie, Q Cai, G-L Li, JW Waterbor, EB Levitan, B Zhang, Y-T Gao, W Zheng, Y-B Xiang and X-O Shu 1237

Nutritional status and body composition

Body composition indices of a load-capacity model: gender- and BMI-specific reference curves
M Siervo, CM Prado, E Mire, S Broyles, JCK Wells, S Heymsfield and PT Katzmarzyk 1245

Anthropometry and body composition of vertically HIV-infected children and adolescents under therapy with and without protease inhibitors
LC dos Reis, PH de Carvalho Rondó, HH de Sousa Marques and NJ Segri 1255

Behavioural nutrition

Migrant youth's emerging dietary patterns in Haiti: the role of peer social engagement
J Heckert, S Boatemaa and CE Altman 1262

High-fat diet-related stimulation of sweetness desire is greater in women than in men despite high vegetable intake
B Zhou, H Yamanaka-Okumura, C Adachi, Y Kawakami, T Katayama and E Takeda 1272

Nutritional epidemiology

Association of coffee drinking with all-cause mortality: a systematic review and meta-analysis
Y Zhao, K Wu, J Zheng, R Zuo and D Li 1282

Adherence to a Mediterranean diet and risk of diabetes: a systematic review and meta-analysis
L Schwingshackl, B Missbach, J König and G Hoffmann 1292

Social capital, tolerance of diversity and adherence to Mediterranean diet: the Rhea Mother-Child Cohort in Crete, Greece
G Kritsotakis, L Chatzi, M Vassilaki, V Georgiou, M Kogevinas, AE Philalithis and A Koutis 1300

Breakfast intake is associated with nutritional status, Mediterranean diet adherence, serum iron and fasting glucose: the CYFamilies study
C Lazarou and A-L Matalas 1308

Dietary n-6 PUFA, carbohydrate:protein ratio and change in body weight and waist circumference: a follow-up study
MU Jakobsen, L Madsen, C Dethlefsen, KM Due, J Halkjær, TIA Sørensen, K Kristiansen and K Overvad 1317

Plasma vitamin D is associated with fasting insulin and homeostatic model assessment of insulin resistance in young adult males, but not females, of the Jerusalem Perinatal Study
A Moore, H Hochner, CM Sittani, MA Williams, AN Hoofnagle, IH de Boer, B Kestenbaum, DS Siscovick, Y Friedlander and DA Enquobahrie 1324

Corrigendum

Association between vitamin B12 intake and EURRECA's prioritized biomarkers of vitamin B12 in young populations: a systematic review – CORRIGENDUM
I Iglesia, RAM Dhonukshe-Rutten, S Bel-Serrat, EL Doets, AEJM Cavelaars, P van 't Veer, M Nissenshoon, V Benetou, M Hermoso, C Berti, LCPGM de Groot and LA Moreno 1332
