

Politics & International Relations

Books and Journals from
Cambridge University Press

The politics list at Cambridge is one of unparalleled quality and range.

Our books list routinely tops surveys of political scientists for the calibre of its output, which includes field-defining series such as Cambridge Studies in Comparative Politics, Cambridge Studies in International Relations and Cambridge Texts in the History of Political Thought.

American Political Science Review and *International Organization* are widely recognised as the leading generalist journals in political science and international relations, while the likes of *British Journal of Political Science* and *World Politics* remain essential reading for researchers worldwide.

For students and scholars across the breadth of political enquiry, Cambridge is the resource of choice.

Notes for Contributors

All manuscripts should be submitted via our on-line system, ScholarOne Manuscripts at:
<http://mc.manuscriptcentral.com/psrm>

Other forms of submission will not be accepted by the editors.

The journal publishes two types of articles:

- a) full length manuscripts that present original, well researched, and fully developed empirical or theoretical work
- b) research notes

Normal length articles that should not exceed 9,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes that should not exceed 4,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes should contain original work and present a new method or methodology (particularly useful if related software components are included) to solve an important problem in applied data analysis, present a new theoretical idea or argument, or comment on other articles published in the journal. *PSRM* welcomes comments to as well as replications of published articles. These will undergo the usual peer review process and if accepted will be published in the research notes section of the journal.

PSRM uses a single-blind peer review process, thus anonymizing your manuscript is not necessary.

Replication Policy: *PSRM* has a strict replication policy which adheres to the Data Access and Research transparency (DA-RT) statement subscribed to by many Political Science Journal Editors in 2015. Authors are required to make replication material publicly available at time of publication of the article. The replication materials must be sufficient to replicate results in all tables and figures printed in the article and in the online appendix, including simulation material for both theoretical (e.g. agent based models) and empirical (e.g. Monte Carlo experiments) work. Data and replication code for your article, as well as a log demonstrating smooth running of all the replication files, must be uploaded in a single .zip file to the *PSRM* Dataverse at <https://dataverse.harvard.edu/dataverse/PSRM>. (See the *PSRM* Dataverse Guide for a step-by-step walk-through for uploading your material, which is also linked to on the *PSRM* Dataverse homepage). This is a necessary condition for publication of the manuscript. All manuscripts are accepted contingent on their replicability, which will initially be assessed by *PSRM* staff. Manuscripts that are not replicable will be rejected for publication. If your analysis relies on simulation techniques (MCMC, MC experiments) we require authors to set and communicate a seed, so that exact results can be replicated. If this is impossible due to the design of the analysis, replication results need not deviate by more than 5 per cent from published results in the manuscript.

Authors are responsible for obtaining permission to reproduce any material they do not own the copyright for and for ensuring appropriate acknowledgment of such material.

All manuscripts should follow the manuscript preparation guidelines available online in the full instructions for contributors.

Full Instructions for Contributors can be found online at <http://www.journals.cambridge.org/psrm/ifc>
