

## Index of Subjects

- Aberdeen typhoid outbreak of 1964, 161, 181  
 Abortion in cattle due to salmonella infections, 25  
 Aeration of gas-sterilized plastics, 225  
 African horse sickness, possible spread on the wind, 279  
 AHC virus, recurrence of an epidemic at Lucknow, 219  
 Air exchange through doorways. Effect of temperature difference, turbulence and ventilation-flow, 141  
 Airborne skin scales, possible contamination of intravenous infusions by, 417  
 Allergies, symptomatic; age-sex incidence in, 39  
 Antibodies to rotavirus, distribution of and titres in different age groups, 365
- Bacterial contamination in a modern operating suite, 1. Effect of ventilation on airborne bacteria and transfer of airborne particles, 121  
 Bacterial contamination control mats, 133  
*Bacteroides fragilis*, serological studies of, 233  
 Birds arriving dead at Heathrow Airport, isolation of myxoviruses from, 243  
 Bunyavirus isolations from mosquitoes in the western Canadian Arctic, 61
- Campylobacter fetus*, isolation of from recent cases of human vibriosis, 381  
 Chocolate prepared with artificially contaminated milk powder, survival of *Salmonella eastbourne* and *Salmonella typhimurium* in, 333  
 Clonal distribution of resistance plasmid-carrying *Salmonella typhimurium*, mainly in the Middle East, 425  
 Clothes-borne infection in a burn unit, attempts to control, 193  
 Cockroach, American, effects of antibiotics on the survival of *Salmonella* in, 339  
*Corynebacterium haemolyticum* infections in Cambridgeshire, 269  
 Cytomegalovirus infection, identification of pregnancies at risk from, 347
- Diarrhoea among travellers: does it occur in the United Kingdom? 73  
 Diet, the effect of on intestinal *Escherichia coli*, 43  
 Disinfection of hands, failure of with frequent hand washing, 107  
 Disinfectant/sanitizers used for napkin storage, 315  
 Doorways, air exchange through, 141
- Escherichia coli* in the intestine, effect of diet on, 43  
*Escherichia coli* O6.H16 and O148.H28, serotype-related enterotoxigenicity in, 395
- Francisella tularensis*, virulence factors of, 47
- Gal E mutants of *Salmonella typhimurium*, immunization of mice and calves with, 17  
 Gas-sterilized plastics, standard aeration for, 225
- Hospital infection in the Birmingham region, surveys of, I., 299
- Immunity to attenuated influenza virus WRL 105 infection induced by heterologous, inactivated influenza A virus vaccines, 321  
 Immunization of mice and calves with gal E mutants of *Salmonella typhimurium*, 17  
 Infection, clothes-borne, attempts to control in a burn unit, 193  
 Infection in hospitals in the Birmingham region, surveys of, I., 299  
 Influenza epidemics in the United Kingdom 1968-1976, the laboratory surveillance of, 77  
 Influenza infections during pregnancy in the mouse, 249  
 Influenza vaccine strain RIT 4025, protective efficacy of, 203

- Influenza virus WRL 105 infection, immunity to induced by heterologous inactivated influenza A virus vaccines, 321
- Isolation of *Salmonella* from animal feeds, a standard technique for, 449
- Lobster meat, South Australian, microbiological evaluation of, 373
- Mats for bacterial contamination control, a comparative study, 133
- Metabolic inhibition test for mycoplasmas based on phosphatase production, 391
- Microbiological evaluation of South Australian rock lobster meat, 373
- Mosquitoes as sources of Bunyavirus isolations in the western Canadian Arctic, 61
- Mycobacterium bovis*, a selective oleic acid albumin agar medium for the cultivation of, 155
- Mycoplasmas, a metabolic inhibition test for, based on phosphatase production, 391
- Myxomatosis: the transmission of a highly virulent strain of myxoma virus by the European rabbit flea in Victoria, 405
- Myxomatosis, innate resistance to in wild rabbits in England, 411
- Myxomatosis on the Western Plains of Victoria, 209
- Myxoviruses isolated from dead birds arriving at Heathrow Airport, London, 243
- Napkin storage, assessment of disinfectant/sanitizers for, 315
- Oleic acid albumin agar medium for the cultivation of *Mycobacterium bovis*, 155
- Phosphatase production as a base for a metabolic inhibition test for mycoplasmas, 391
- Pregnancy, its effect on influenza infections in the mouse, 249
- Pregnancies at risk from cytomegalovirus infection, identification of, 347
- Pseudomonas aeruginosa* derived from water beds, 103
- Resistance, antimicrobial, of salmonellas isolated at the University Hospital of the West Indies, 5
- Resistance *in vitro* of *Salmonella dublin* isolated from cattle, 275
- Resistance plasmid-carrying *Salmonella typhimurium*, clonal distribution of, mainly in the Middle East, 425
- R factor, *in vivo* transfer of within the lower gastro-intestinal tract of sheep, 259
- RIT 4025, protective efficacy of as a live attenuated influenza vaccine strain, 203
- Rotavirus antibodies, distribution and titres of in different age groups, 365
- Rubella antibody studies, the use of single-radial-haemolysis for, 355
- Salmonella* abortion in cattle with particular reference to *Salmonella dublin*. A review, 25
- Salmonella* from animal feeds, a standard technique for isolation, 449
- Salmonella* in the American cockroach, effects of antibiotics on the survival of, 339
- Salmonella dublin* isolated from cattle, the *in vitro* drug resistance of, 275
- Salmonella eastbourne* and *Salmonella typhimurium*, survival of in milk chocolate prepared with artificially contaminated milk powder, 333
- Salmonella paratyphi A*, phage type distribution of in Indonesia, 1
- Salmonella* serotypes, *Salmonella typhi* phage types, and antimicrobial resistance at the University Hospital of the West Indies, Jamaica, 5
- Salmonella typhimurium*, the immunization of mice and calves with gal E mutants of, 17
- Salmonella typhimurium* carrying resistance plasmid, clonal distribution of, 425
- Salmonellosis in Indonesia, 1
- Serological studies of *Bacteroides fragilis*, 233
- Serotype-related enterotoxigenicity in *Escherichia coli* O6.H16 and O148.H28, 395
- Serratia marcescens*, a comparison of typing methods for, 89
- Single-radial-haemolysis used for rubella antibody studies, 355
- Skin scales as possible airborne contaminants of intravenous infusions, 417
- Surveillance in the laboratory of influenza epidemics in the United Kingdom, 1968–1976, 77
- Surveys of hospital infection in the Birmingham region, I, 299
- Transfer *in vivo* of an R factor within the lower gastro-intestinal tract of sheep, 259

- Travellers' diarrhoea: does it occur in the United Kingdom? 73  
Typhoid outbreak in Aberdeen, 1964, 161, 181  
Typing methods for *Serratia marcescens*, 89
- Ventilation, effect of on airborne bacteria and transfer of airborne particles in a modern operating suite, 121  
Vibriosis, human, isolation of *Campylobacter fetus* from recent cases of, 381  
Virulence factors of *Francisella tularensis*, 47  
Viruses; AHC, 219; Bunya, 61; cytomegalo, 347; influenza, 77, 203, 321; myxoma, 209, 405, 411; rota, 365
- Washing of hands frequently, and failure of hand disinfection, 107  
Water beds – a potential source of *Pseudomonas aeruginosa*, 103  
Wind as a possible means of spread of African horse sickness, 279
