JOURNAL OF THE AUSTRALIAN MATHEMATICAL SOCIETY

The Journal invites original, high-quality research papers in all areas of pure mathematics (including theoretical probability, mathematical physics and mathematical statistics). Papers should be of moderate length (15–35 pages) and wide interest; those with good introductions explaining the context, meaning and value of the results are preferred. In view of the pressure on space, only papers highly rated by assessors can be accepted.

For information on submission of papers, and to submit a paper, see https://austms.org.au/publications/journal-of-the-australian-mathematical-society/. At submission, authors should advise which Associate Editor would be most appropriate to handle the paper, and include a cover letter that indicates the paper's contribution to its field.

PREPARATION OF MANUSCRIPTS

1. Papers should be double spaced and have a generous margin. Authors should keep copies of all files.

2. Files must be prepared using LaTeX or another variant of TeX, and must not contain definitions of additional commands.

3. Each manuscript should include an abstract of no more than 150 words, preferably containing no formulae, a list of keywords, a 2020 Mathematics subject classification, and a short title of no more than 40 characters.

4. For the style of references consult recent issues of the journal. The current usage is either the number referencing [1], [2], [3], or the letter referencing, such as [DS1], [DS2], [DS3] if the authors are N. Dunford and J. T. Schwartz, and the reference is to the 3 volumes of their monograph. In either style, references should be ordered alphabetically by the first author's name. Abbreviations of journal names should follow Mathematical Reviews.

5. Avoid abbreviations such as Thm., Prop., Eq., Ex., iff. In the text do not use the symbols $\forall$, $\exists$, $\implies$ and $\iff$. For more information about our stylistic requirements, see the Journal website accessible through https://austms.org.au/wp-content/uploads/2021/12/Style-suggestions-for-authors_21d16.pdf.

6. Graphics should be prepared to professional standards, preferably using Postscript or LaTeX drawing facilities. Charges may apply if the typesetters have to recreate a graphics file because the original is not suitable for printing.
