

Workshop Reports

19 Workshops were held during IAU S285. 15 submitted reports of the discussions that took place, while for the remaining 4 we have reproduced the summaries that were available on our wiki prior to the Symposium. The reports are arranged in the following order:

The CoRoT and Kepler Revolution	177
SWIFT: Opportunities, Capabilities and Data Handling	183
Optical/NIR Transients	185
Gravitational Waves	191
X-Ray Transient Surveys	199
Gravitational Microlensing	207
Light Echoes	215
Using the VO to Study the Time Domain	221
Astrotomography	227
Small and Robotic Telescopes	235
Binarity and Stellar Evolution	239
Historical Time-Domain Astronomy	243
Data Management, Infrastructure and Archiving	249
Amateur Community and Citizen Science	255
Stellar Tidal Disruption	261
Faint and Fast Transients	269
Extreme Physics	270
Algorithms for Time-Series Analysis	271
Radio Transients	272
