

THE MATHEMATICAL ASSOCIATION

The fundamental aim of the Mathematical Association is to promote good methods of mathematical teaching. A member receives each issue of one or more of *The Mathematical Gazette*, *Mathematics in School*, *Primary Mathematics* (according to the class of membership chosen), together with Newsletters. Reports are published from time to time and these are normally available to members at a reduced rate. Those interested in becoming members should contact MA Headquarters for information and application forms. The address of the Association Headquarters is **259 London Road, Leicester LE2 3BE, UK (telephone 0116 221 0013)**. The Association should be notified of any change of address. If copies of the Association periodicals fail to reach a member through lack of such notification, duplicate copies can only be supplied at the published price. If change of address is due to a change of appointment, the Association will be glad to be informed. Subscriptions should be submitted to the Treasurer via Headquarters. Correspondence relating to **Teaching Committee** should be addressed to TC Chair. The **Association's Library** is housed in the University Library, Leicester. Views expressed in the *Mathematical Gazette* by authors or advertisers are not necessarily those of the Association.

THE MATHEMATICAL GAZETTE

Editor:

Dr Gerry Leversha,
15 Maunder Road,
Hanwell,
London W7 3PN
g.leversha@btinternet.com

Problem Corner:

Mr Nick Lord,
Tonbridge School,
Tonbridge,
Kent TN9 1JP
njl@tonbridge-school.org

Production Editor:

Mr Bill Richardson,
Kintail,
Longmorn,
Elgin IV30 8RJ
wpr3145@gmail.com

Reviews Editor:

Mr Owen Toller,
4 Caldwell House,
48 Trinity Church Road,
London SW13 8EJ
owen.toller@btinternet.com

Potential advertisers e-mail Charlotte Dyason at: charlotted@media-shed.co.uk

Material for publication should be sent to the Editor.

Books for review should be sent to the Reviews Editor.

Advice to authors of notes and articles.

Study the format of articles in the *Gazette*. Please note the format for references, which should be listed in their order of appearance in an article. MSS may be submitted electronically, preferably in pdf format, or, if sent by post, should be typed and two copies included. (Mathematical expressions may be hand written.) Please send electronic files by e-mail. This edition of the *Gazette* was produced on an Acorn machine using TechWriter and Draw.

10.1017/mag.2022.161

CONTENTS (continued)

Notes 106.31 to 106.49

What proportion of square-free numbers are divisible by 2? or by 30 but not by 7?	<i>Ron Brown</i>	494
Pentagonal numbers and their relationships to other figurate numbers	<i>Günhan Caglayan</i>	497
Fibonacci numbers and Cassini's identity	<i>A. F. Beardon</i>	498
A theorem on divisibility by congruence	<i>Sabu Sebastian</i>	501
On the representation of rational numbers in the form $(\phi(m^r))^a / (\phi(n^s))^b$	<i>Thanh Tung Vu</i>	504
A method to calculate the harmonic number and other related sums	<i>Sammedkumar M. Patil</i>	506
An unusual identity for odd-powers	<i>Petro Kolosov</i>	509
PWW: $\sin \alpha + \sin \beta$ and $\cos \beta - \cos \alpha$	<i>Elif E. Arikan, Hasan Unal</i>	514
Visual proofs of sums of powers of positive integers	<i>Manishita Chakraborty</i>	515
The law of tangents and the formulae of Mollweide and Newton	<i>Francesco Laudano</i>	516
Infinitely many series arising from $\cos^2 x + \sin^2 x = 1$	<i>Mateus Alegri</i>	517
Another proof of Rolle's Theorem	<i>Himadri Lal Das</i>	521
Another proof of $e^{x/y}$ being irrational	<i>Sourangshu Ghosh</i>	523
Another proof of the irrationality of $N^{p/q}$	<i>Sourangshu Ghosh</i>	525
A generalisation of a classical open-top box problem	<i>Jay Jahangiri</i>	526
On the Gerretsen inequalities in trigonometrical form	<i>J. A. Scott</i>	532
Halving a triangle in a given direction	<i>Robin Whitty</i>	534
On the first Fermat point for the triangle	<i>J. A. Scott</i>	539
An area problem using barycentric coordinates	<i>Vladimir Volenec</i>	541
Teaching Notes		
Rewriting polynomials: a tool for teaching secondary mathematics	<i>Félix Martínez de la Rosa</i>	544
The full story of invariant lines	<i>Nick Lord</i>	547
Feedback		549
Problem Corner	<i>Nick Lord</i>	553
Student Problems	<i>Beth Woollacott, Tuya Sa</i>	560
Reviews		563

CONTENTS

Articles

Focus on the Visual (The 2022 Presidential Address)	<i>Chris Pritchard</i>	386
An extension of the six-point circle theorem for a generalised Van Aubel configuration	<i>Dario Pellegrinetti, Michael de Villiers</i>	400
Approximating the volume of a solid of revolution – the frustum rule	<i>Paul Belcher</i>	408
New characterisations of bicentric quadrilaterals	<i>Martin Josefsson</i>	414
Archimedes playing with a computer	<i>François Dubeau</i>	427
Evolution of the Euler-Maclaurin sum formula	<i>Amrik Singh Nimbran</i>	443
Probability: a questionable science of the uncertain	<i>Leonard M. Wapner</i>	458
Mathematics in ‘the news’: number theory and number sense	<i>Tim Rowland</i>	467
An alternative formula for the cubic equation	<i>Abdel Missa, Chrif Youssfi</i>	474
A novel method to solve the quartic equation	<i>Abdel Missa, Chrif Youssfi</i>	480
On the tail integral formulae for real-valued random variables	<i>Saralees Nadarajah, Idika E. Okorie</i>	487
