

(Contents continued from back cover)

Effect of short-chain fructooligosaccharide-enriched energy-restricted diet on weight loss and serum haptoglobin concentration in Beagle dogs. <i>R. Ricci, I. Jeusette, J.-M. Godeau, B. Contiero & M. Diez</i>	S120–S123
The impact of home-prepared diets and home oral hygiene on oral health in cats and dogs. <i>C. Buckley, A. Colyer, M. Skrzywanek, K. Jodkowska, G. Kurski, J. Gawor & M. Ceregrzyn</i>	S124–S127
Effect of dietary water intake on urinary output, specific gravity and relative supersaturation for calcium oxalate and struvite in the cat. <i>C. M. F. Buckley, A. Hawthorne, A. Colyer & A. E. Stevenson</i>	S128–S130
Unexpected depletion of plasma arachidonate and total protein in cats fed a low arachidonic acid diet due to peroxidation. <i>A. Chamberlin, Y. Mitsuhashi, K. Bigley & J. E. Bauer</i>	S131–S134
Maintenance energy requirement determination of cats after spaying. <i>Y. Mitsuhashi, A. J. Chamberlin, K. E. Bigley & J. E. Bauer</i>	S135–S138
Evaluation of breed effects on <i>n</i> -3 PUFA metabolism with dietary flaxseed oil supplementation in dogs. <i>D. Purushothaman, W. Y. Brown, S.-B. Wu & B. Vanselow</i>	S139–S141
Factors that modify the effect of excess calcium on skeletal development in puppies. <i>B. Dobenecker</i>	S142–S145
Identification of intra- and inter-individual metabolite variation in plasma metabolite profiles of cats and dogs. <i>A. Colyer, M. S. Gilham, B. Kamlage, D. Rein & D. Allaway</i>	S146–S149
Characteristics of ageing pets and their owners: dogs <i>v.</i> cats. <i>R. Heuberger & J. Wakshlag</i>	S150–S153
Haematology and plasma chemistry of the red top ice blue mbuna cichlid (<i>Metriaclima greshakei</i>). <i>D. L. Snellgrove & L. G. Alexander</i>	S154–S157
Energy expenditure and water turnover in hunting dogs in winter conditions. <i>Ø. Ahlstrøm, P. Redman & J. Speakman</i>	S158–S161
Preliminary study: voluntary food intake in dogs during tryptophan supplementation. <i>V. Fragua, G. González-Ortiz, C. Villaverde, M. Hervera, V. M. Mariotti, X. Manteca & M. D. Baucells</i>	S162–S165
Physical activity level of adult cats with varied feeding frequency. <i>P. Deng, R. W. Grant & K. S. Swanson</i>	S166–S169
Genetic differences in the serum proteome of horses, donkeys and mules are detectable by protein profiling. <i>A. Henze, F. Aumer, A. Grabner, J. Raila & F. J. Schweigert</i>	S170–S173
Nitrogen metabolism of four raw meat diets in domestic cats. <i>K. R. Kerr, A. N. Beloshapka, C. L. Morris & K. S. Swanson</i>	S174–S177
Voluntary ingestion of wood shavings by obese horses under dietary restriction. <i>G. C. Curtis, C. F. Barfoot, A. H. A. Dugdale, P. A. Harris & C. McG. Argo</i>	S178–S182
Faecal IgA concentration is influenced by age in dogs. <i>L. Zaine, C. Ferreira, M. d. O. S. Gomes, M. Monti, L. Tortola, R. S. Vasconcellos & A. C. Carciofi</i>	S183–S186
Old beagle dogs have lower faecal concentrations of some fermentation products and lower peripheral lymphocyte counts than young adult beagles. <i>M. d. O. S. Gomes, M. C. Beraldo, T. C. Putarov, M. A. Brunetto, L. Zaine, M. B. A. Glória & A. C. Carciofi</i>	S187–S190
Management of struvite uroliths in dogs. <i>S. Calabrò, R. Tudisco, S. Bianchi, M. Grossi, A. De Bonis & M. Isabella Cutrignelli</i>	S191–S193
The intravenous glucose tolerance and postprandial glucose tests may present different responses in the evaluation of obese dogs. <i>M. A. Brunetto, F. C. Sá, S. P. Nogueira, M. d. O. S. Gomes, A. G. Pinarel, J. T. Jeremias, F. J. A. de Paula & A. C. Carciofi</i>	S194–S197
Effect of citrus polyphenol- and curcumin-supplemented diet on inflammatory state in obese cats. <i>V. Leray, B. Freuchet, J. Le Bloc'h, I. Jeusette, C. Torre & P. Nguyen</i>	S198–S201
Water content of faeces is higher in the afternoon than in the morning in morning-fed dogs fed diets containing texturised vegetable protein from soya. <i>R. C. Hill, C. F. Burrows, G. W. Ellison, M. D. Finke, J. L. Huntington & J. E. Bauer</i>	S202–S205
Lipid profile and insulin sensitivity in rats fed with high-fat or high-fructose diets. <i>M.-Q. Zaman, V. Leray, J. Le Bloc'h, C. Thorin, K. Ouguerram & P. Nguyen</i>	S206–S210
Influence of different levels and sources of resistant starch on faecal quality of dogs of various body sizes. <i>R. Goudez, M. Weber, V. Biourge & P. Nguyen</i>	S211–S215

Directions to Contributors - Concise Version*(Revised August 2007)*

The *British Journal of Nutrition* is an international peer-reviewed journal that publishes original papers, review articles, technical notes and short communications in English in all branches of nutritional science. **Prospective authors should note that they (or their institutions) now retain the copyright of their material published in the *British Journal of Nutrition*.** As a contributor you are asked to follow the guidelines set out below. For detailed information on the presentation of the technical content of your paper please see the full version of the **Directions to Contributors**, which can be downloaded from the Nutrition Society website (<http://www.nutrition-society.org>). Prospective authors may also contact the Publications Office directly on + 44 (0)20 7605 6555 (telephone), +44 20 7602 1756 (fax), or edoffice@nutsoc.org.uk (email).

Papers should be accompanied by a statement to the effect that the conditions laid down in the full Directions to Contributors are accepted. The statement should affirm that the submission represents original work that has not been published previously and which is not currently being considered by another journal. It should also confirm that each author has seen and approved the contents of the submitted paper. At the time of acceptance the authors should provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer). The Licence to Publish is available on the Nutrition Society website (<http://www.nutrition-society.org>). All relevant financial interests should be declared.

Text. Papers should be submitted with 1.5 line spacing and margins of at least 2 cm on each side. Text should be printed without underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **Typescripts can be submitted as Word, WordPerfect, EPS, Text, Postscript or RTF files. A Word processing format is required for production purposes once papers have been accepted. When substantial revisions are required to typescripts, authors are given the opportunity to do this once only, the need for any further changes should at most reflect any minor issues.**

Title Page. The first page should include a concise, informative title together with the names and addresses of the authors. A contact name for correspondence should be given and telephone, fax and email addresses provided. Authors should supply three or four key words or phrases (each containing up to three words). A short title of up to 45 characters is required as a running head.

Abstract. Each paper should commence with an accurate and informative abstract, written as a single paragraph. It should be complete in itself and intelligible without reference to the text or figures, and should not exceed 250 words.

Tables. Tables should be reduced to the simplest form, and should not duplicate information in the text or figures. They should be typed on separate pages, one page for each Table, at the end of the article and carry headings describing their content.

Illustrations. The original illustrations should accompany the submitted typescript. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they clearly contribute to the text. All figures should be numbered and legends should be provided.

Note that authors will be charged 350 GBP for the publication of colour figures. Authors from countries entitled to free journal access through HINARI will be exempt from these charges.

References. References should be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

- Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhaponticum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
- Jenkins DJ, Kendall CW, Marchie A, *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
- Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
- Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2-4)'. If a reference is cited more than once the same number should be used each time.

Referees. Authors are asked to submit the names of up to four scientists who would be well-qualified to review the paper; however, no more than one such reviewer will be used. The email addresses and institutions of the named reviewers should be given.

Proofs. PDF page proofs will be emailed to authors for checking, and should be returned within 3 days (by fax or Express mail) to the BJN Production Editor, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, UK; fax +44 1223 325802, email bjnproduction@cambridge.org

Typescripts. The *British Journal of Nutrition* operates an on-line submission and reviewing system (eJournalPress). **Authors should submit to the following address:** <http://bjn.msubmit.net/> If any difficulties are encountered please contact the Publications Office (details above) immediately.

Contents

Oral Presentations

Advances in comparative genetics: influence of genetics on obesity. <i>W. F. Mathes, S. A. Kelly & D. Pomp</i>	S1–S10
The effects of weight loss on adipokines and markers of inflammation in dogs. <i>J. J. Wakshlag, A. M. Struble, C. B. Levine, J. J. Bushey, D. P. Laflamme & G. M. Long</i>	S11–S14
Plasma oestrogen changes in adult male cats after orchietomy, body-weight gain and low-dosage oestradiol administration. <i>R. Backus</i>	S15–S18
Effects of neutering on food intake, body weight and body composition in growing female kittens. <i>L. G. Alexander, C. Salt, G. Thomas & R. Butterwick</i>	S19–S23
Challenges in developing nutrient guidelines for companion animals. <i>R. F. Butterwick, J. W. Erdman Jr, R. C. Hill, A. J. Lewis & C. T. Whittemore</i>	S24–S31
Birth weight and postnatal growth of pure-bred kittens. <i>K. Moik & E. Kienzle</i>	S32–S34
Estimation of the dietary nutrient profile of free-roaming feral cats: possible implications for nutrition of domestic cats. <i>E. A. Plantinga, G. Bosch & W. H. Hendriks</i>	S35–S48
Five-week dietary exposure to dry diets alters the faecal bacterial populations in the domestic cat (<i>Felis catus</i>). <i>E. N. Bermingham, S. Kittelmann, G. Henderson, W. Young, N. C. Roy & D. G. Thomas</i>	S49–S52
Intake of minerals, trace elements and vitamins in bone and raw food rations in adult dogs. <i>N. Dillitzer, N. Becker & E. Kienzle</i>	S53–S56
Correlation of a feline muscle mass score with body composition determined by dual-energy X-ray absorptiometry. <i>K. E. Michel, W. Anderson, C. Cupp & D. P. Laflamme</i>	S57–S59
Cross-sectional study to investigate the association between vitamin D status and cutaneous mast cell tumours in Labrador retrievers. <i>J. J. Wakshlag, K. M. Rassnick, E. K. Malone, A. M. Struble, P. Vachhani, D. L. Trump & L. Tian</i>	S60–S63
Effects of two commercially available feline diets on glucose and insulin concentrations, insulin sensitivity and energetic efficiency of weight gain. <i>M. Coradini, J. S. Rand, J. M. Morton & J. M. Rawlings</i>	S64–S77
Pet food safety: a shared concern. <i>R. L. Buchanan, R. C. Baker, A. J. Charlton, J. E. Riviere & R. Standaert</i>	S78–S84

Poster Presentations

Use of pedometers to measure the relationship of dog walking to body condition score in obese and non-obese dogs. <i>B. S. Warren, J. J. Wakshlag, M. Maley, T. J. Farrell, A. M. Struble, M. R. Panasevich & M. T. Wells</i>	S85–S89
A diet with a struvite relative supersaturation less than 1 is effective in dissolving struvite stones <i>in vivo</i> . <i>D. M. Houston, H. E. Weese, M. D. Evason, V. Biourge & I. van Hoek</i>	S90–S92
Low-maintenance energy requirements of obese dogs after weight loss. <i>A. J. German, S. L. Holden, N. J. Mather, P. J. Morris & V. Biourge</i>	S93–S96
Do feeding practices of obese dogs, before weight loss, affect the success of weight management? <i>A. J. German, S. L. Holden, L. J. Gernon, P. J. Morris & V. Biourge</i>	S97–S100
Postprandial glucose and insulin profiles following a glucose-loaded meal in cats and dogs. <i>A. K. Hewson-Hughes, M. S. Gilham, S. Upton, A. Colyer, R. Butterwick & A. T. Miller</i>	S101–S104
The effect of dietary starch level on postprandial glucose and insulin concentrations in cats and dogs. <i>A. K. Hewson-Hughes, M. S. Gilham, S. Upton, A. Colyer, R. Butterwick & A. T. Miller</i>	S105–S109
Whole-body amino acid composition of adult fancy ranchu goldfish (<i>Carassius auratus</i>). <i>D. L. Snellgrove & L. G. Alexander</i>	S110–S112
A pilot study of the body weight of pure-bred client-owned adult cats. <i>E. Kienzle & K. Moik</i>	S113–S115
Increased antioxidant capacity in the plasma of dogs after a single oral dosage of tocotrienols. <i>J. Raila, S. Rohn, F. J. Schweigert & G. Abraham</i>	S116–S119
