PROPERTY OF  
MEDICAL LIBRARY  
ST. BARNABAS HOSPITAL

## Editorials

Quaker belief and child psychiatry. *P. Graham*  
Women and psychiatry. *H. Crimlisk and S. Welch*

## Review Article

Hyperkinetic or attention deficit disorder. *S. Sandberg*

## Papers

Development of a clinical rating scale to assess mother–infant interaction in a psychiatric mother and baby unit. *R. Kumar and A. Hipwell*

The reliability and validity of the Bethlem mother–infant interaction scale. *A. J. Stocky, B. J. Tonge and R. J. Nunn*

Comparative incidence of depression in women and men, during pregnancy and after childbirth. Validation of the Edinburgh postnatal depression scale in Portuguese mothers. *M. E. G. Areias, R. Kumar, H. Barros and E. Figueiredo*

Correlates of postnatal depression in mothers and fathers. *M. E. G. Areias, R. Kumar, H. Barros and E. Figueiredo*

The cost of comprehensive care of people with schizophrenia living in the community. A cost evaluation from a German catchment area. *H. J. Salize and W. Rössler*

Estimating local-area needs for psychiatric care: a case study. *A. D. Lesage, D. Clerc, I. Uribé,*

- J. Cournoyer, J. Fabian, V. Tourjman, I. van Haaster and C. H. Chang* 49
- Concurrent validity of the Opcrit Diagnostic System. Comparison of OPCRIT diagnosis with consensus best-estimate lifetime diagnoses. *N. Craddock, P. Asherson, M. J. Owen, J. Williams, P. McGuffin and A. E. Farmer* 58
- Artificial neural network to assist psychiatric diagnosis. *Y. Zou, U. Shen, L. Shu, Y. Wang, F. Feng, K. Xu, Y. Qu, Y. Song, Y. Zhong, M. Wang and W. Liu* 64
- Prediction of ECT response: validation of a refined sign-based (CORE) system for defining melancholia. *I. Hickie, C. Mason, G. Parker and H. Brodaty* 68
- Alcohol and drugs in suicides. *A. Ohberg, E. Vuori, I. Ojanperä and J. Lonnqvist* 75
- Hospitalisation for deliberate self-poisoning in Scotland from 1981 to 1993: Trends in rates and types of drugs used. *P. McLoone and I. K. Crombie* 81
- Head circumference as a measure of cognitive reserve. Association with severity of impairment in Alzheimer's disease. *A. B. Graves, J. A. Mortimer, E. B. Larson, A. Wenzlow, J. D. Bowen and W. C. McCormick* 86
- The Nottingham study of neurotic disorder: influence of cognitive therapists on outcome. *D. Kingdon, P. Tyrer, N. Seivewright, B. Ferguson and S. Murphy* 93

# Now you can lift depression with the body in mind

Site-specific  
'Cipramil'  
addresses  
four key  
dimensions of  
antidepressant  
therapy:

**Cipramil**  
citalopram

Specifically treating depression

#### Abbreviated Prescribing Information

**Presentation:** 'Cipramil' tablets, PL 0458/0058, each containing 20mg of citalopram as the hydrobromide. 28 (OP) 20mg tablets £21.28.

**Indications:** Treatment of depressive illness in the initial phase and as maintenance against relapse/recurrence. **Dosage:** Adults. 20mg a day. Depending upon individual patient response, this may be increased in 20mg increments to a maximum of 60mg. Tablets should not be chewed, and should be taken as a single oral daily dose, in the morning or evening without regard for food. **Elderly:** 20mg a day increasing to a maximum of 40mg dependent upon individual patient response. **Children:** Not recommended. Restrict dosage to lower end of range in hepatic impairment. Dosage adjustment not necessary in cases of mild/moderate renal impairment. No information available in severe renal impairment (creatinine clearance <20ml/min). **Contra-indications:** Combined use of 5-HT agonists. Hypersensitivity to citalopram. **Pregnancy and Lactation:** Safety during human pregnancy and lactation has not been established. Use only if potential benefit outweighs possible risk. **Precautions:** Driving and operating machinery. History of mania. Caution in patients at risk of cardiac arrhythmias. Do not use with or within 14 days of MAO inhibitors: leave a seven day gap before starting MAO inhibitor treatment. **Drug Interactions:** MAO inhibitors (see Precautions). Use lithium and

tryptophan with caution. Routine monitoring of lithium levels need not be adjusted. Alcohol is not advised. **Adverse Events:** Most commonly nausea, sweating, tremor, somnolence and dry mouth. **Overdosage:** Symptoms have included somnolence, coma, sinus tachycardia, occasional nodal rhythm, episode of grand mal convulsion, nausea, vomiting, sweating and hyperventilation. No specific antidote. Treatment is symptomatic and supportive. Early gastric lavage suggested. **Legal Category:** POM 24.1.95. Further information available upon request. Product licence holder: Lundbeck Ltd, Sunningdale House, Caldecotte Lake Business Park, Caldecotte, Milton Keynes, MK7 8LF. 'Cipramil' is a trademark. © 1995 Lundbeck Ltd.

Date of preparation: May 1995

## ACADEMIC PSYCHIATRY POSITIONS

The University of Calgary Department of Psychiatry and the Calgary Regional Health Authority invite applications for full-time academic positions at the Alberta Children's Hospital, Calgary General Hospital and Foothills Hospital sites with duties in patient care, teaching and research. Opportunities are available in the subspecialties of addiction, child, geriatric and forensic psychiatry, as well as in general psychiatry with a special interest in schizophrenia, psychopharmacology or an inpatient clinical teaching unit.

Qualifications include an MD or equivalent, certification in Psychiatry, a proven record of teaching and research, and eligibility for licensure in the Province of Alberta.

In accordance with Canadian immigration requirements, priority will be given to Canadian citizens and permanent residents of Canada. The University of Calgary is committed to Employment Equity.

Please submit a curriculum vitae, a statement of research interests, and the names of three referees, by August 31, 1996, to:

Dr N. el-Guebaly, Head  
Department of Psychiatry  
The University of Calgary  
1403 - 29 Street N.W.  
Calgary, Alberta, Canada T2N 2T9

## Psychiatric Associations of the World

Produced by the College Library, this updated register now includes details of over eighty psychiatric associations worldwide.

The *British Journal of Psychiatry* is published monthly by the Royal College of Psychiatrists (a registered charity, registration number 228636). The *BJP* publishes original work in all fields of psychiatry. All communications, including manuscripts for publication, should be sent to the Editor, *British Journal of Psychiatry*, 17 Belgrave Square, London SW1X 8PG.

Full instructions to authors are given at the beginning of the January and July issues.

**Subscriptions**

Non-members of the College should contact the Publications Subscription Department, Royal Society of Medicine Press Limited, PO Box 9002, London W1A 0ZA (tel. 0171 290 2928; fax 0171 290 2929). Annual subscription rates for 1996 (12 issues post free) are as follows:

Europe (& UK): institutions £160, individuals £140  
US: institutions \$310, individuals \$230  
Elsewhere: institutions £190, individuals £150  
Full airmail is £36/US\$64 extra.  
Single copies of the Journal are £14, \$25 (post free).

Payment should be made out to the British Journal of Psychiatry.

Queries from non-members about missing or faulty copies should be addressed within six months to the same address; similar queries from College members should be addressed to the Registration Subscription Department, The Royal College of Psychiatrists, 17 Belgrave Square, London SW1X 8PG.

# College Seminars Series

---

---

## Seminars in Clinical Psychopharmacology

*Edited by David J. King*

Linking relevant basic neuropharmacology to clinical practice, this book is an excellent introduction to an ever-expanding and fascinating subject. It aims to bridge the gap between the theoretical basis for the mode of action of psychotropic drugs and guidance on their clinical use and should increase interest and understanding of the drugs widely used in clinical practice.

£20.00, 544pp, 1995, ISBN 0 902241 73 7

## Seminars in Psychiatric Genetics

*By P. McGuffin, M.J. Owen, M.C. O'Donovan, A. Thapar & I.I. Gottesman*

Comprehensive coverage of what is known of the genetics of psychiatric disorders, and an introduction to the relevant quantitative and molecular genetic methods.

£10.00, 240pp, 1994, ISBN 902241 65 6

## Seminars in Basic Neurosciences

*Edited by Gethin Morgan & Stuart Butler*

This book will appeal to anyone needing to update their knowledge of the neurological aspects of anatomy, physiology, pharmacology, psychology, pathology, endocrinology and radiology.

£15.00, 336pp, 1993, ISBN 0902241 61 3

## Seminars in Psychology and the Social Sciences

*Edited by Digby Tantam & Max Birchwood*

The theories considered in this book are likely to dominate the research and service agenda over the next decade. Ethnicity as a determinant of health care, connectionist models of mental functioning, and the effects of sex and gender on mental health are some of the theories covered here.

£17.50, 358pp, 1994, ISBN 0 902241 62 1

## Seminars in Practical Forensic Psychiatry

*Edited by Derek Chiswick & Rosemary Cope*

A concise account of the specialty from a strongly practical perspective. It systematically describes the relationship between psychiatric disorders and offending, with detailed discussion of the criminal justice system, court proceedings, mental health legislation, dangerousness, prison psychiatry, and civil issues. It is up-to-date, with references to the Reed Report, the Clunis Inquiry, supervision registers and recent legislation. Career guidance and a chapter on ethical issues are included.

£17.50, 359pp, 1995, ISBN 0 902241 78 8

## Seminars in Alcohol and Drug Misuse

*Edited by Jonathan Chick & Roch Cantwell*

A clear review of the aetiology, epidemiology, treatment and prevention of dependence on and misuse of alcohol and illicit and prescribed drugs is presented. With a balance of theory, recent research and practical clinical guidelines, the book covers specific and common problems in mental health as well as in general medicine.

£13.50, 246pp, 1994, ISBN 0 902241 70 2

## Seminars in Child and Adolescent Psychiatry

*Edited by Dora Black & David Cottrell*

From assessment to outcome, from normal development to unusual syndromes, from theoretical perspectives to treatment, the reader will find this a clear, concise, and invaluable overview of the field.

£15.00, 298pp, 1993, ISBN 0902241 55 9

## Titles in preparation

- Adult Psychiatric Disorders
- Learning Disabilities
- Management of Psychogeriatric Patients
- Liaison Psychiatry
- Psychotherapy

*The books in this series, and other Gaskell publications, are available from the Publications Department, Royal College of Psychiatrists, 17 Belgrave Square, London SW1X 8PG (Tel. 0171 235 2351)*

## Instructions to Authors

The *British Journal of Psychiatry* is published monthly by the Royal College of Psychiatrists. The *BJP* publishes original work in all fields of psychiatry. All communications, including manuscripts for publication, should be sent to The Editor, The British Journal of Psychiatry, 17 Belgrave Square, London SW1X 8PG.

All published articles are peer reviewed. A decision will be made on a paper within three months of its receipt.

Contributions are accepted for publication on the condition that their substance has not been published or submitted for publication elsewhere. The *BJP* does not hold itself responsible for statements made by contributors. Unless so stated, material in the *BJP* does not necessarily reflect the views of the Editor or the Royal College of Psychiatrists.

Published articles become the property of the *BJP* and can be published elsewhere, in full or in part, only with the Editor's written permission.

Manuscripts accepted for publication are copy-edited to improve readability and to ensure conformity with house style.

We regret that manuscripts and figures unsuitable for publication will not normally be returned.

### Manuscripts

Two high-quality copies should be submitted and authors should keep one copy for reference. Articles should ideally be 3000–5000 words long, must be typed on one side of the paper only, double-spaced throughout (including tables and references) and with wide margins (at least 4 cm); all the pages, including the title page, must be numbered.

### Title and authors

The title should be brief and relevant. If necessary, a subtitle may be used to amplify the main title.

One of the authors should be designated to receive correspondence and proofs, and the appropriate address indicated. This author must take responsibility for keeping all other named authors informed of the paper's progress. More than five authors may be credited to a paper only at the Editor's discretion.

If authors wish to have their work peer reviewed anonymously, they must submit their work without personal identification; names and addresses of all authors should be given in the covering letter. Otherwise, the names of the authors should appear on the title page in the form that is wished for publication, and the names, degrees, affiliations and

full addresses at the time the work described in the paper was carried out given at the end of the paper.

### Summaries

A structured summary should be given at the beginning of the article, incorporating the following headings: Background; Method; Results; Conclusions. These should outline the questions investigated, the design, essential findings, and main conclusion of the study. This should be up to 150 words long. Review articles do require summaries, although editorials and comments do not.

### References

References should be listed alphabetically at the end of the paper, the titles of journals being given in full. Titles of books and journals are printed in italic and should therefore be underlined on the typescript. Reference lists not in *BJP* style will be returned to the author for correction.

Authors should check that the text references and list are in agreement as regards dates and spelling of names. The text reference should be in the form '(Smith, 1971)' or 'Smith (1971) showed that . . .'. The reference list should follow the style example below (note that *et al* is used after three authors have been listed for a work by four or more).

- ALDERSON, M. R. (1974) Self poisoning: what is the future? *Lancet*, *4*, 104–113.
- AMERICAN PSYCHIATRIC ASSOCIATION (1980) *Diagnostic and Statistical Manual of Mental Disorders* (3rd edn) (DSM–III). Washington, DC: APA.
- AYLARD, P. R., GOODING, J. H., MCKENNA, P. S., *et al* (1987) A validation study of three anxiety and depression self assessment scales. *Psychosomatic Research*, *1*, 261–268.
- DE ROUGEMONT, D. (1950) *Passion and Society* (trans. M. Belgium). London: Faber and Faber.
- FISHER, M. (1990) *Personal Love*. London: Duckworth.
- FLYNN, C. H. (1987) Defoe's idea of conduct: ideological fictions and fictional reality. In *Ideology of Conduct* (eds N. Armstrong & L. Tenenhouse), pp. 73–95. London: Methuen.
- FREUD, S. (1955) Some neurotic mechanisms in jealousy, paranoia and homosexuality. In *Standard Edition, Vol. 18* (ed. & trans. J. Strachey), pp. 221–232. London: Hogarth Press.
- JONES, E. (1937) Jealousy. In *Papers on Psychoanalysis*, pp. 469–485. London: Baillière, Tindall.
- MULLEN, P. E. (1990a) Morbid jealousy and the delusion of infidelity. In *Principles and Practice of Forensic Psychiatry* (eds R. Bluglass & P. Bowden), pp. 823–834. London: Churchill Livingstone.
- (1990b) A phenomenology of jealousy. *Australian and New Zealand Journal of Psychiatry*, *24*, 17–28.
- VAUKHONEN, K. (1968) On the pathogenesis of morbid jealousy. *Acta Psychiatrica Scandinavica* (suppl. 202).

Personal communications need written authorisation; they should not be included in the reference list. No

## INSTRUCTIONS TO AUTHORS

other citation of unpublished work, including unpublished conference presentations, is permissible.

### Tables

Each table should be submitted on a separate sheet. They should be numbered and have an appropriate heading. The tables should be mentioned in the text but must not duplicate information in the text. The heading of the table, together with any footnotes or comments, should be self-explanatory. The desired position of the table in the manuscript should be indicated. Do not tabulate lists, which should be incorporated into the text, where, if necessary, they may be displayed.

Authors must obtain permission if they intend to use tables from other sources, and due acknowledgement should be made in a footnote to the table.

### Figures

Figures should be individual glossy photographs, or other camera-ready prints, or good-quality output from a computer, not photocopies, clearly numbered and captioned below. Avoid cluttering figures with explanatory text which is better incorporated succinctly in the caption. Lettering should be parallel to the axes. Units must be clearly indicated and should be presented in the form quantity:unit (note: 'litre' should be spelled out in full unless modified to ml, dl, etc.).

Authors must obtain permission if they intend to use figures from other sources, and due acknowledgement should be made in the legend.

Colour figures may be reproduced if authors are able to cover the costs.

### Statistics

Not all papers require statistical analysis. Case histories and studies with very small numbers are examples. In larger studies where statistical analyses are included it is necessary to describe these in language that is comprehensible to the numerate psychiatrist as well as the medical statistician. Particular attention should be paid to clear description of study designs and objectives, and evidence that the statistical procedures used were both appropriate for the hypotheses tested and correctly interpreted. All statistical methods must be referenced in full. The statistical analyses should be planned before data are collected and full explanations given for any *post-hoc* analyses carried out. The value of test statistics used (e.g.  $\chi^2$ ,  $t$ ,  $F$ -ratio) should be given as well as their significance levels so that their derivation can be understood. Standard deviations and errors should not be reported as  $\pm$ , but should be specified and referred to in parentheses.

Trends should not be reported unless they have been supported by appropriate statistical analyses for trends.

The use of percentages to report results from small samples is discouraged, other than where this facilitates comparisons. The number of decimal places to which numbers are given should reflect the accuracy of the determination, and estimates of error should be given for statistics.

A brief and useful introduction to the place of confidence intervals is given by Gardner & Altman (1990, *British Journal of Psychiatry*, 156, 472-474). Use of these is encouraged but not mandatory.

Authors are encouraged to include estimates of statistical power where appropriate. To report a difference as being statistically significant is generally insufficient, and comment should be made about the magnitude and direction of change.

### General

All abbreviations must be spelt out on first usage.

The generic names of drugs should be used, and the source of any compounds not yet available on general prescription should be indicated.

Generally, SI units should be used; where they are not, the SI equivalent should be included in parentheses. Units should not use indices: i.e. report g/ml, not  $\text{gml}^{-1}$ .

The use of notes separate to the text should be avoided, whether they be footnotes or a separate section at the end of a paper. A footnote to the first page may, however, be included to give some general information concerning the paper.

If an individual patient is described, his or her consent should be obtained. The patient should read the report before submission. Where the patient is not able to give informed consent, it should be obtained from an authorised person. Where the patient refuses to give consent, then the case study can only be written up if personal details and dates and other information which identify the patient are omitted to ensure that there is no breach of confidentiality. Contributors should be aware of the risk of complaint by patients in respect of defamation and breach of confidentiality, and where concerned should seek advice.

### Proofs

A proof will be sent to the corresponding author of an article. Offprints, which are prepared at the same time as the *BJP*, should be ordered when the proof is returned to the Editor. Offprints are despatched up to six weeks after publication. The form assigning copyright to the College must be returned with the proof.

### Letters to the Editor

Letters should not exceed 350 words. They will be edited for clarity and conformity with *BJP* style and may be shortened. There should be no more than five references. Proofs will not be sent to authors.
