W. J. RIDGMAN

Many contributors will note with regret that this is the last volume on which Bill Ridgman's name appears as a member of the Editorial Board: regret because he will no longer be giving authors advice and help over their papers, and especially where any point of biometry was in doubt. If there was material of real value in a paper, Bill spared no pains to suggest to an author ways of making the manuscript acceptable to the Journal, while advocating (in no uncertain terms) the rejection of papers which did not come up to the expectation of 'an international journal such as ours'. But though his name appeared on the list simply as an Editor, Bill has in fact been the Press Editor and general administrator of the editorial side ever since he joined the Board 16 years ago, at the same time that I joined the Board and became its Chairman. I can therefore say with more appreciation than anyone that both the Editors and our publishers Cambridge University Press owe him a huge debt of gratitude for the maintaining of standards, the respectable rate of publication, and the general management of the editorial side, and for carrying out these time-consuming duties in the most unassuming fashion.

JAMES BEAMENT
