

# Go Mobile

CJO Mobile (CJOm) is a streamlined  
Cambridge Journals Online (CJO)  
for smartphones and other  
small mobile devices

- Use CJOm to access all journal content including *FirstView* articles which are published online ahead of print
- Access quickly and easily thanks to simplified design and low resolution images
- Register for content alerts or save searches and articles – they will be available on both CJO and CJOm
- Your device will be detected and automatically directed to CJOm via: [journals.cambridge.org](http://journals.cambridge.org)

## CONCERTO CI Now Approved for SSD

The world's smallest cochlear implant, the CONCERTO from MED-EL, has been approved by the Therapeutic Goods Administration (TGA) for Australians with Single-Sided Deafness (SSD). The CONCERTO is part of the MAESTRO CI System.

Now Australians with SSD can, for the first time, receive a hearing implant that allows them to hear with both ears.

The exceptionally thin and reliable implant design is optimised for minimally-invasive surgical techniques, making it an ideal solution for both children and adults.

**"Working closely with our customers and professional partners, MED-EL has driven this research initiative so that individuals with SSD can enjoy the benefits of binaural hearing instead of relying on just one hearing ear,"**  
said MED-EL CEO, Dr. Ingeborg Hochmair.
