

**RADIOCARBON MEASUREMENTS: COMPREHENSIVE INDEX,
1960-1965**

In February, 1968, the editors of *RADIOCARBON*, with the support of the National Science Foundation, published a Comprehensive Index to previously published radiocarbon measurements. Entries through Volume 7 of *RADIOCARBON* have been scrutinized, and revised where necessary, by all laboratories and authors of data lists. The Index lists all dates or other measurements in order of laboratory number, which have been kept current through the application of a series of corrections.

The price is ten dollars U.S. per copy. The Index will be sent to all subscribers to *RADIOCARBON*, together with the bill, unless the editors are informed that a subscriber does not wish to purchase it.
