The Journal of Economic History is devoted to the interdisciplinary study of history and economics, and is of interest not only to economic historians but to social and demographic historians, as well as economists in general. The journal has broad coverage, in terms of both method and geographic scope. Topics include money and banking, trade, manufacturing, technology, transportation, industrial organization, labor, agriculture, servitude, demography, education, and the role of government and regulation. In addition, an extensive review section includes the latest books in economic history and related fields.

Editors

John A. Weymark, *Vanderbilt University, USA*

Richard Bradley, *London School of Economics, UK*

Fabienne Peter, *University of Warwick, UK*

Erik Schokkaert, *Katholieke Universiteit Leuven, Belgium*

Alex Voorhoeve, *London School of Economics, UK (Book Review Editor)*

The disciplines of economics and philosophy each possess their own special analytical methods, whose combination is powerful and fruitful. Each discipline can be enriched by the other. *Economics & Philosophy* aims to promote their mutual enrichment by publishing articles and book reviews in all areas linking these subjects. Topics include the methodology and epistemology of economics, the foundations of decision theory and game theory, the nature of rational choice in general, historical work on economics with a philosophical purpose, ethical issues in economics, the use of economic techniques in ethical theory, and many other subjects.
