

Nutrition Research Reviews

Nutrition Research Reviews

Volume 24, 2011 ISSN: 0954-4224

Aims and Scope

Nutrition Research Reviews publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles.

Nutrition Research Reviews is published twice a year by Cambridge University Press on behalf of The Nutrition Society.

The contents page of this journal is available on the Internet before publication at <http://www.cambridge.org/nrr>

Editorial Board

Editor-in-Chief

Dr Kate M Younger, *Dublin Institute of Technology, Ireland*

Address for correspondence

Dr Kate M Younger, *Editor-in-Chief, Nutrition Research Reviews, School of Biological Sciences, Dublin Institute of Technology, Kevin Street, Dublin 8, Republic of Ireland*
Tel: +353 1 4024662 Fax: +353 1 4024995 Email: katherine.younger@dit.ie

US Editor

Professor C M Weaver, *Purdue University, USA*

Editors

Dr N Binns, *NMB Consulting Limited, Ireland*

Dr D Dardevet, *INRA, France*

Dr R M Elliot, *Institute of Food Research, UK*

Dr M Pufulete, *Kings College London, UK*

Editorial Advisors

Dr M Ashwell, *Baldock, UK*

Dr D A Bender, *University College London, UK*

Dr J L Black, *Warrimo, Australia*

Professor J Cade, *University of Leeds, UK*

Dr C Edwards, *Glasgow University, UK*

Dr S French, *Sheffield University, UK*

Professor L Hambræus, *University of Uppsala, Sweden*

Professor H J Powers, *University of Sheffield, UK*

Dr P Rogers, *University of Bristol, UK*

Dr B Sivakumar, *National Institute of Nutrition, India*

Professor N W Solomons, *CESSIAM, Guatemala*

Professor J B Ubbink, *University of Pretoria, South Africa*

Professor M Verstegen, *Wageningen University, Netherlands*

Editorial staff

C Goodstein (*Publications Manager*), C Jackson (*Deputy Publications Manager*),
H Money, J Norton & L Weeks (*Publications Officers*) C T Hughes (*Sub-editor*)

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and application forms for membership are available from The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Contents of Volume 24

(All rights reserved)

Muldowney S & Kiely M Vitamin D and cardiometabolic health: a review of the evidence	1
Stoidis CN, Misiakos EP, Patapis P, Fotiadis CI & Spyropoulos BG Potential benefits of pro- and prebiotics on intestinal mucosal immunity and intestinal barrier in short bowel syndrome	21
Sesti F, Capozzolo T, Pietropolli A, Collalti M, Bollea MR & Piccione E Dietary therapy: a new strategy for management of chronic pelvic pain	31
Mattar L, Godart N, Melchior JC & Pichard C Anorexia nervosa and nutritional assessment: contribution of body composition measurements	39
Sauer N, Mosenthin R & Bauer E The role of dietary nucleotides in single-stomached animals	46
Rana SV, Pal R, Vaiphei K, Sharma SK & Ola RP Garlic in health and disease	60
Douglas A, Reynolds CK, Givens ID, Elwood PC & Minihane AM Associations between dairy consumption and body weight: a review of the evidence and underlying mechanisms	72
Dijcker JC, Plantinga EA, van Baal J & Hendriks WH Influence of nutrition on feline calcium oxalate urolithiasis with emphasis on endogenous oxalate synthesis	96
Tardy A-L, Morio B, Chardigny J-M & Malpuech-Brugère C Ruminant and industrial sources of <i>trans</i> -fat and cardiovascular and diabetic diseases	111
Smith CE & Tucker KL Health benefits of cereal fibre: a review of clinical trials	118
Somogyi V, Gyorffy A, Scalise TJ, Kiss DS, Goszleth G, Bartha T, Frenyo VL & Zsarnovszky A Endocrine factors in the hypothalamic regulation of food intake in females: a review of the physiological roles and interactions of ghrelin, leptin, thyroid hormones, oestrogen and insulin	132
Bauer E, Metzler-Zebeli BU, Verstegen MWA & Mosenthin R Intestinal gene expression in pigs: effects of reduced feed intake during weaning and potential impact of dietary components	155
Gould L & Kendall NR Role of the rumen in copper and thiomolybdate absorption	176
Zinn RA, Barreras A, Corona L, Owens FN & Plascencia A Comparative effects of processing methods on the feeding value of maize in feedlot cattle	183
Thomson RL & Buckley JD Protein hydrolysates and tissue repair	191
Berni Canani R, Di Costanzo M, Leone L, Bedogni G, Brambilla P, Cianfarani S, Nobili V, Pietrobelli A & Agostoni C Epigenetic mechanisms elicited by nutrition in early life	198
McCrorie TA, Keaveney EM, Wallace JMW, Binns N & Livingstone MBE Human health effects of conjugated linoleic acid from milk and supplements	206
Martín-Tereso J & Verstegen MWA A novel model to explain dietary factors affecting hypocalcaemia in dairy cattle	228
Bolling BW, Chen C-YO, McKay DL & Blumberg JB Tree nut phytochemicals: composition, antioxidant capacity, bioactivity, impact factors. A systematic review of almonds, Brazils, cashews, hazelnuts, macadamias, pecans, pine nuts, pistachios and walnuts	244

Index of Authors

Index of Subjects

Adult metabolic diseases

Epigenetic mechanisms elicited by nutrition in early life
24, 198, 2011, doi:10.1017/S0954422411000102

Amino acids

Protein hydrolysates and tissue repair
24, 191, 2011, doi:10.1017/S0954422411000084

Anorexia nervosa

Anorexia nervosa and nutritional assessment: contribution of body composition measurements
24, 39, 2011, doi:10.1017/S0954422410000284

Antimicrobials

Garlic in health and disease
24, 60, 2011, doi:10.1017/S0954422410000338

Antineoplastics

Garlic in health and disease
24, 60, 2011, doi:10.1017/S0954422410000338

Antioxidants

Tree nut phytochemicals: composition, antioxidant capacity, bioactivity, impact factors. A systematic review of almonds, Brazils, cashews, hazelnuts, macadamias, pecans, pine nuts, pistachios and walnuts
24, 244, 2011, doi:10.1017/S095442241100014X

Antioxidants

Dietary therapy: a new strategy for management of chronic pelvic pain
24, 31, 2011, doi:10.1017/S0954422410000272

Antioxidants

Garlic in health and disease
24, 60, 2011, doi:10.1017/S0954422410000338

Appetite

Associations between dairy consumption and body weight: a review of the evidence and underlying mechanisms
24, 72, 2011, doi:10.1017/S095442241000034X

Atherosclerosis

Ruminant and industrial sources of *trans*-fat and cardiovascular and diabetic diseases
24, 111, 2011, doi:10.1017/S0954422411000011

BMI

Anorexia nervosa and nutritional assessment: contribution of body composition measurements
24, 39, 2011, doi:10.1017/S0954422410000284

BMI

Associations between dairy consumption and body weight: a review of the evidence and underlying mechanisms
24, 72, 2011, doi:10.1017/S095442241000034X

Bacterial overgrowth

Potential benefits of pro- and prebiotics on intestinal mucosal immunity and intestinal barrier in short bowel syndrome
24, 21, 2011, doi:10.1017/S0954422410000260

Bacterial translocation

Potential benefits of pro- and prebiotics on intestinal mucosal immunity and intestinal barrier in short bowel syndrome
24, 21, 2011, doi:10.1017/S0954422410000260

Bioelectrical impedance analysis

Anorexia nervosa and nutritional assessment: contribution of body composition measurements
24, 39, 2011, doi:10.1017/S0954422410000284

Body composition

Anorexia nervosa and nutritional assessment: contribution of body composition measurements
24, 39, 2011, doi:10.1017/S0954422410000284

CVD

Vitamin D and cardiometabolic health: a review of the evidence
24, 1, 2011, doi:10.1017/S0954422410000259

CVD

Ruminant and industrial sources of *trans*-fat and cardiovascular and diabetic diseases
24, 111, 2011, doi:10.1017/S0954422411000011

Calcium homeostasis

A novel model to explain dietary factors affecting hypocalcaemia in dairy cattle
24, 228, 2011, doi:10.1017/S0954422411000126

Calcium

Associations between dairy consumption and body weight: a review of the evidence and underlying mechanisms
24, 72, 2011, doi:10.1017/S095442241000034X

Calving

A novel model to explain dietary factors affecting hypocalcaemia in dairy cattle
24, 228, 2011, doi:10.1017/S0954422411000126

Cats

Influence of nutrition on feline calcium oxalate urolithiasis with emphasis on endogenous oxalate synthesis
24, 96, 2011, doi:10.1017/S0954422410000351

Cereal fibre

Health benefits of cereal fibre: a review of clinical trials
24, 118, 2011, doi:10.1017/S0954422411000023

Cholesterol

Ruminant and industrial sources of *trans*-fat and cardiovascular and diabetic diseases
24, 111, 2011, doi:10.1017/S0954422411000011

Cis-9, trans-11-conjugated linoleic acid

Human health effects of conjugated linoleic acid from milk and supplements
24, 206, 2011, doi:10.1017/S0954422411000114

Clinical trials

Health benefits of cereal fibre: a review of clinical trials
24, 118, 2011, doi:10.1017/S0954422411000023

Conjugated linoleic acid

Human health effects of conjugated linoleic acid from milk and supplements
24, 206, 2011, doi:10.1017/S0954422411000114

Dairy products

Associations between dairy consumption and body weight: a review of the evidence and underlying mechanisms
24, 72, 2011, doi:10.1017/S095442241000034X

Diabetes

Ruminant and industrial sources of *trans*-fat and cardiovascular and diabetic diseases
24, 111, 2011, doi:10.1017/S0954422411000011

Diet

Influence of nutrition on feline calcium oxalate urolithiasis with emphasis on endogenous oxalate synthesis
24, 96, 2011, doi:10.1017/S0954422410000351

Dietary cation–anion difference

A novel model to explain dietary factors affecting hypocalcaemia in dairy cattle
24, 228, 2011, doi:10.1017/S0954422411000126

Dietary fibre

Health benefits of cereal fibre: a review of clinical trials
24, 118, 2011, doi:10.1017/S0954422411000023

Dietary therapy

Dietary therapy: a new strategy for management of chronic pelvic pain
24, 31, 2011, doi:10.1017/S0954422410000272

Dual-energy X-ray absorptiometry

Anorexia nervosa and nutritional assessment: contribution of body composition measurements
24, 39, 2011, doi:10.1017/S0954422410000284

Epigenome

Epigenetic mechanisms elicited by nutrition in early life
24, 198, 2011, doi:10.1017/S0954422411000102

Feed intake

Intestinal gene expression in pigs: effects of reduced feed intake during weaning and potential impact of dietary components
24, 155, 2011, doi:10.1017/S0954422411000047

Feedlot cattle

Comparative effects of processing methods on the feeding value of maize in feedlot cattle
24, 183, 2011, doi:10.1017/S0954422411000096

Food intake

Endocrine factors in the hypothalamic regulation of food intake in females: a review of the physiological roles and interactions of ghrelin, leptin, thyroid hormones, oestrogen and insulin
24, 132, 2011, doi:10.1017/S0954422411000035

Garlic

Garlic in health and disease
24, 60, 2011, doi:10.1017/S0954422410000338

Gastrointestinal tract

The role of dietary nucleotides in single-stomached animals
24, 46, 2011, doi:10.1017/S0954422410000326

Hepatoprotection

Garlic in health and disease
24, 60, 2011, doi:10.1017/S0954422410000338

Hormones

Endocrine factors in the hypothalamic regulation of food intake in females: a review of the physiological roles and interactions of ghrelin, leptin, thyroid hormones, oestrogen and insulin
24, 132, 2011, doi:10.1017/S0954422411000035

Hypertension

Vitamin D and cardiometabolic health: a review of the evidence
24, 1, 2011, doi:10.1017/S0954422410000259

Hypocalcaemia

A novel model to explain dietary factors affecting hypocalcaemia in dairy cattle
24, 228, 2011, doi:10.1017/S0954422411000126

Hypothalamic regulation

Endocrine factors in the hypothalamic regulation of food intake in females: a review of the physiological roles and interactions of ghrelin, leptin, thyroid hormones, oestrogen and insulin
24, 132, 2011, doi:10.1017/S0954422411000035

Inflammation

Vitamin D and cardiometabolic health: a review of the evidence
24, 1, 2011, doi:10.1017/S0954422410000259

Insulin resistance

Vitamin D and cardiometabolic health: a review of the evidence
24, 1, 2011, doi:10.1017/S0954422410000259

Insulin

Protein hydrolysates and tissue repair
24, 191, 2011, doi:10.1017/S0954422411000084

Intestinal barrier

Potential benefits of pro- and prebiotics on intestinal mucosal immunity and intestinal barrier in short bowel syndrome
24, 21, 2011, doi:10.1017/S0954422410000260

Intestinal gene expression

Intestinal gene expression in pigs: effects of reduced feed intake during weaning and potential impact of dietary components
24, 155, 2011, doi:10.1017/S0954422411000047

Iron

Role of the rumen in copper and thiomolybdate absorption
24, 176, 2011, doi:10.1017/S0954422411000059

LDL

Ruminant and industrial sources of *trans*-fat and cardiovascular and diabetic diseases
24, 111, 2011, doi:10.1017/S0954422411000011

Maize

Comparative effects of processing methods on the feeding value of maize in feedlot cattle
24, 183, 2011, doi:10.1017/S0954422411000096

Maternal nutrition

Epigenetic mechanisms elicited by nutrition in early life
24, 198, 2011, doi:10.1017/S0954422411000102

Metabolic syndrome

Vitamin D and cardiometabolic health: a review of the evidence
24, 1, 2011, doi:10.1017/S0954422410000259

Microbiota

Epigenetic mechanisms elicited by nutrition in early life
24, 198, 2011, doi:10.1017/S0954422411000102

Milk fever

A novel model to explain dietary factors affecting hypocalcaemia in dairy cattle
24, 228, 2011, doi:10.1017/S0954422411000126

Milk

Human health effects of conjugated linoleic acid from milk and supplements
24, 206, 2011, doi:10.1017/S0954422411000114

Molybdenum

Role of the rumen in copper and thiomolybdate absorption
24, 176, 2011, doi:10.1017/S0954422411000059

Nucleotides

The role of dietary nucleotides in single-stomached animals
24, 46, 2011, doi:10.1017/S0954422410000326

Nutritional assessment

Anorexia nervosa and nutritional assessment: contribution of body composition measurements
24, 39, 2011, doi:10.1017/S0954422410000284

Obesity

Vitamin D and cardiometabolic health: a review of the evidence
24, 1, 2011, doi:10.1017/S0954422410000259

Obesity

Associations between dairy consumption and body weight: a review of the evidence and underlying mechanisms
24, 72, 2011, doi:10.1017/S095442241000034X

Oxalate biosynthesis

Influence of nutrition on feline calcium oxalate urolithiasis with emphasis on endogenous oxalate synthesis
24, 96, 2011, doi:10.1017/S0954422410000351

Oxidative stress

Dietary therapy: a new strategy for management of chronic pelvic pain
24, 31, 2011, doi:10.1017/S0954422410000272

Pelvic pain

Dietary therapy: a new strategy for management of chronic pelvic pain

Women

Endocrine factors in the hypothalamic regulation of food intake in females: a review of the physiological roles and interactions of ghrelin, leptin, thyroid hormones, oestrogen and insulin
24, 132, 2011, doi:10.1017/S0954422411000035

Nutrition Research Reviews

Nutrition Research Reviews publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles. Authors wishing to submit a review article to the journal should, in the first instance, complete the appropriate review proposal form: <http://www.nutrition-society.org/unsolicitedreviewproposal> (unsolicited articles) or <http://www.nutrition-society.org/solicitedreviewproposal> (solicited articles).

It is essential that any relevant interests and sources of funding are declared at submission stage and published as part of the manuscript.

Page format. *Nutrition Research Reviews* is printed in double-column format (column width of 77 mm) with a text area of 77 x 212 mm.

Text. Papers should be submitted with 1.5 line spacing and margins of at least 2 cm on each side. The use of automated line numbering is strongly encouraged. At the ends of lines, words should not be hyphenated unless hyphens are to be printed. Standard abbreviations (e.g. Fig. and Figs.) and SI units must be used. A hierarchy of headings used to subdivide the paper should be made clear. It is possible to use four levels, although three or less will generally suffice.

The paper should be written in English, the spelling being generally that of the *Concise Oxford Dictionary* (1995), 9th ed. Oxford: Clarendon Press. If occasionally other spellings are preferred this will be indicated during technical editing.

Nutrition Research Reviews operates an on-line submission and reviewing system (eJournalPress): <http://nrr.msubmit.net/>. Submissions will only be considered if the appropriate review proposal form has been approved.

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words. A short title of up to 45 characters should be provided as a running head, and there should be a list of up to 6 key words.

Introduction. An introduction should follow the abstract setting out the background and, if necessary, the history of the chosen topic; this should be sufficient to set the scene for the general reader and be relatively brief.

Main body. Invited review papers will normally be expected to be between 6 000 and 12 000 words in length (including references and equivalent spaces for figures and tables). The main body of the review should present, discuss and interpret recent research findings in a comprehensive but concise manner. It should also consider what is known about work in progress and should close with a section attempting to assess where present investigations are likely to lead. The review will, of course, represent the views of the author, but should deal throughout with the world picture and give recognition to any work thought to be relevant.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the main text file and must carry headings describing their content that are comprehensible without reference to the text. Tables may be single or double column width; very wide tables will be printed in landscape format.

Illustrations. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow

for reduction by half or two-thirds; they may be in single or double column format. Half-tone photographs are acceptable where they are a real contribution to the text. Figure legends should be typed on a separate sheet in the main text file and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Aldus Freehand, Chemdraw or CorelDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable.

References. References must be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles** and conform to the following styles:

1. Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhubarb (*Rheum raphaniticum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
2. Jenkins DJ, Kendall CW, Marchie A *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
3. Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
4. Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. ‘The conceptual difficulty of this approach has recently been highlighted^(1,2–4)’. If a reference is cited more than once the same number should be used each time.

Other rules of presentation etc. Please consult our full Directions to Authors available on the Nutrition Society website for further details: <http://www.nutrition-society.org/publications/nutrition-society-journals/nutrition-research-reviews>

Proofs. An electronic set of page proofs in Adobe Acrobat (PDF) format will be provided to authors for checking and should be returned within 3 days (by fax or Express mail) to the NRR Production Editor, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK; fax +44 1223 325802, email gedwards@cambridge.org

Offprints. A copy of the issue and a PDF file of the paper will be supplied free of charge to the corresponding author of each review, and additional offprints may be ordered on the order form sent with the proofs.

Papers will be sent to referees, will be edited before publication and modifications may be required.

Typescripts. Material for publication and other communications should be sent to:
