Go Mobile

CJO Mobile (CJOm) is a streamlined
Cambridge Journals Online (CJO)
for smartphones and other
small mobile devices

- Use CJOm to access all journal content including *FirstView* articles which are published online ahead of print
- Access quickly and easily thanks to simplified design and low resolution images
- Register for content alerts or save searches and articles – they will be available on both CJO and CJOm
- Your device will be detected and automatically directed to CJOm via: journals.cambridge.org

Rising Impact Factors

- ▲ In the Thomson Reuters 2010 ▲
Journal Citation Reports®,
Cambridge journals saw an
average increase in Impact Factor
of almost 16.4%.

- ▲ Cambridge's Humanities and ▲
Social Science journals increased
by 23.7%, against a 0.1% average
increase in the SSCI*.

- ▲ Cambridge Science, Technology ▲
and Medicine journals increased
by 10.6% in comparison to a 1.8%
average increase in the SCI*.

This picture is based on figure 8 of 'The effect of sudden source buoyancy flux increases on turbulent plumes', by M.M. Scase, A.L. Aspden & C.P. Caulfield
Journal of Fluid Mechanics, Volume 635

* The comparison of percentage changes refers to those categories that include Cambridge journals only and not the entire collection of SCI or SSCI journals.

British Journal of Nutrition

Published on behalf of The Nutrition Society

Editor-in-Chief

P.C. Calder, University of Southampton, UK

British Journal of Nutrition is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multi-disciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology, and the emerging area of nutritional genomics.

Nutrition Research Reviews

Published on behalf of The Nutrition Society

Editor-in-Chief

Graham C. Burdge, University of Southampton, UK

Nutrition Research Reviews offers a comprehensive overview of nutritional science today. By distilling the latest research and linking it to established practice, the journal consistently delivers the widest range of in-depth articles in the field of nutritional science and has done so for the past twenty-one years. It presents up-to-date, concise and critical reviews of key topics in nutrition science, advancing new concepts and hypotheses that encourage the exchange of fundamental ideas on nutritional well-being in both humans and animals.

Public Health Nutrition

Published on behalf of The Nutrition Society

Editor-in-Chief

Agneta Yngve, Akershus University College, Norway

Public Health Nutrition provides an international peer-reviewed forum for the publication and dissemination of research and scholarship aimed at understanding the causes of, and approaches and solutions to, nutrition-related public health achievements, situations and problems around the world. The journal publishes original and commissioned articles, commentaries and discussion papers for debate.

Directions to Contributors – Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. Further information on how the technical content of your paper should be presented is given in the **Directions to Contributors** on the Nutrition Society web pages at <http://www.nutritionociety.org> or contact the Publications Office on +44 20 7605 6555 (telephone), +44 20 7602 1756 (fax) or pns@nutsoc.org.uk (email).

Authors are reminded that their papers will be read by a wide cross-section of the Society's members, many of whom were neither at the meeting nor are they specialists in the subject area. Authors should thus seek to provide an introduction and context to the subject and are encouraged to provide extensive references to allow the reader to further explore the subject, in addition to summarizing the more recent findings, conclusions and hypotheses of their own and other research groups. Authors should avoid unnecessary use of 'jargon' and acronyms and ensure that as far as possible acronyms and abbreviations are defined and explained in the text.

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors. Contributors of Symposium papers will be asked to complete a copy of the 'Licence to Publish' (in lieu of copyright transfer) at the proof stage.

Page format. The *Proceedings of the Nutrition Society* is printed in double-column format (column width of 85 mm) with a text area of 235×177 mm.

Text. Word-processed text provided electronically is required. Text files must be compatible with Microsoft Word 2000 (either in Word format or saved as rich text (.rtf) files. The typescript should be prepared with 1.5 line spacing and margins (at least 1.5 cm) on each side and with no underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **This will enable papers to be handled rapidly, and with fewer typesetting errors. All relevant financial and other interests should be declared.**

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures, starting with the objective followed by the key findings and ending in clear conclusion. It should not exceed 250 words.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing

their content that are comprehensible without reference to the text.

Illustrations. All figures should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they make a real contribution to the text. Colour illustrations can be used at the discretion of the Editor. Figure captions should be typed separately at the end of the main text and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Aldus Freehand, Chemdraw or CorelDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable.

References. References must be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

1. Goel V, Cheema SK, Agellon LB, Oraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhaponticum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
2. Jenkins DJ, Kendall CW, Marchie A *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
3. Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
4. Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2-4)'. If a reference is cited more than once the same number should be used each time.

Proofs. PDF page proofs will be accessible to authors from the typesetter's website and should be returned within 48 hours (by email or Express mail) to:

**King's College Conference Centre,
University of Aberdeen,
26–27 March 2012**

Conference on 'Future food and health'

Symposium I: Sustainability and food security

Chair: P. Morgan, Rowett Institute of Nutrition and Health, University of Aberdeen

Nutrition and sustainability: an emerging food policy discourse
T. Lang & D. Barling 1

Is a healthy diet an environmentally sustainable diet?
J. I. Macdiarmid 13

Climate change and sustainable food production
P. Smith & P. J. Gregory 21

Food sustainability: problems, perspectives and solutions
T. Garnett 29

Symposium II: Diet–gene interactions; implications for future diets and health

Chair: S. Athanasiadou, Scottish Agricultural College

The genetic contribution to disease risk and variability in response to diet: where is the hidden heritability?
A. M. Minihaue 40

Personalised nutrition: ready for practice?
B. de Roos 48

State of play in direct-to-consumer genetic testing for lifestyle-related diseases: market, marketing content, user experiences and regulation
P. Saukko 53

Symposium III: Food innovation and health

Chair: G. McNeill, University of Aberdeen

Food reformulation: the challenges to the food industry
J. L. Buttriss 61

Queen's University Belfast, 16–19 July 2012

Conference on 'Translating nutrition: integrating research, practice and policy'

Symposium 1: Innovation in diet and lifestyle assessment

Chairs: M. B. E. Livingstone, Northern Ireland Centre for Food and Health, University of Ulster; R. Welch, Northern Ireland Centre for Food and Health, University of Ulster

New technology in dietary assessment: a review of digital methods in improving food record accuracy
P. J. Stumbo 70

Innovations in national nutrition surveys
A. M. Stephen, T. N. Mak, E. Fitt, S. Nicholson, C. Roberts & J. Sommerville 77

Symposium 3: Diet, insulin resistance and diabetes

Chairs: A. Gallagher, University of Ulster; I. Macdonald, University of Nottingham

Vitamin D, type 2 diabetes and other metabolic outcomes: a systematic review and meta-analysis of prospective studies
H. Khan, S. Kunutsor, O. H. Franco & R. Chowdhury 89

Use of the internet in the treatment of obesity and prevention of type 2 diabetes in primary care
K. M. McTigue & M. B. Conroy 98

Postgraduate Symposium

Chair: A. Salter, University of Nottingham
Food additives and preschool children
D. M. Martyn, B. A. McNulty, A. P. Nugent & M. J. Gibney 109

Brewers' spent grain; bioactivity of phenolic component, its role in animal nutrition and potential for incorporation in functional foods: a review
A. L. McCarthy, Y. C. O'Callaghan, C. O. Piggott, R. J. FitzGerald & N. M. O'Brien 117

Family eating out-of-home: a review of nutrition and health policies
L. E. McGuffin, J. M. W. Wallace, T. A. McCrorie, R. K. Price, L. K. Pourshahidi & M. B. E. Livingstone 126

Symposium 4: Diet and ageing

Chairs: G. Goldberg, MRC Human Nutrition Research, Cambridge; A. Yngve, Oslo and Akershus University College of Applied Sciences, Norway

Potential benefits of adherence to the Mediterranean diet on cognitive health
C. Feart, C. Samieri, B. Alles & P. Barberger-Gateau 140

Impact of genetic risk assessment on nutrition-related lifestyle behaviours
J. A. Vernarelli 153

Weight loss and alzheimer's disease: temporal and etiologic connections
G. Sergi, M. De Rui, A. Coin, E. Meral Inelmen & E. Manzato 160

Strategies to improve diet in older adults
M. A. Johnson 166

Harrogate International Centre, Harrogate, 29–30 November 2011

Conference on 'Malnutrition matters'

Nutrition Society Symposium: Muscle wasting with age: a new challenge in nutritional care; part 1 – the underlying factor

Chair: G Frost, Imperial College London

Ageing and the gut
E. Britton & J. T. McLaughlin 173

University of Reading, 4–6 July 2011

70th Anniversary Conference on 'From plough through practice to policy'

Symposium 3: Obesity-related cancers

Chair: P. Calder, University of Southampton, UK

The gut microbial metabolome: modulation of cancer risk in obese individuals
W. R. Russell, S. H. Duncan & H. J. Flint 178
