## BIOPATCH Antimicrobial Dressing

Nosocomial infections affect millions of patients annually and greatly increase treatment costs. BIOPATCH is the ONLY percutaneous device dressing that reduces nosocomial infection rates.

- Inhibits microbial population underneath by an average of 100 times as compared to skin under non-medicated patches
- Continually releases chlorhexidine gluconate for 7 days<sup>1</sup>
- Broad-spectrum activity
- Absorbs eight times its own weight in fluid<sup>1</sup>
- One inch zone of inhibition
- Non-toxic, non-irritating<sup>1</sup>

### Indications For Use:

- Central Venous Catheters (CVCs)
- Epidural analgesia catheters
- CAPD catheters
- Orthopedic pins

For use with vascular and non-vascular percutaneous devices. Vascular devices include IV catheters, peripherally inserted central catheters, central venous lines, arterial catheters, dialysis catheters and others. Non-vascular percutaneous devices include external fixator pins, peritoneal dialysis catheters and epidural catheters.
