

Contents

<i>Preface</i>	<i>page xi</i>
1 Basics of Light Science and Device Modelling	1
1.1 Basics of Visible Light and Primary Colours	1
1.2 Light Emission in Traditional Light Sources and LEDs	1
1.3 Heat Loss Mechanisms of Traditional Light Sources and LEDs	4
1.4 LED Structures and their Thermal Equivalent Models	5
References	8
2 Steady-State Photo-Electro-Thermal (PET) Theory for LED Systems	9
2.1 Luminous Intensity, Luminous Flux and Luminous Efficacy	9
2.2 Models for the Steady-State PET Theory	12
2.2.1 <i>Linking Photometric Quantity (Light) with Electric Quantity (Power)</i>	13
2.2.2 <i>Linking Thermal Quantity (Heat) with Photometric Quantity (Light)</i>	13
2.2.3 <i>Linking Electric Quantity (Power) with Thermal Quantity (Heat)</i>	14
2.2.4 <i>Linking Photometric, Electric and Thermal Quantities together</i>	14
2.3 Important Meanings behind PET Theory	17
2.4 Achieving Maximum Luminous Flux with Proper Thermal Design	20
2.5 Optimal Design Procedure for LED Systems	22
References	24

3	Dynamic Photo-Electro-Thermal Theory for LED Systems	27
3.1	Introduction	27
3.2	Models for the Dynamic PET Theory	27
3.2.1	<i>Time-Domain Junction-to-Case Temperature and Heatsink Temperature</i>	29
3.2.2	<i>Time-Domain Luminous Efficacy and Luminous Flux</i>	31
3.3	Predictions of Photo-Electro-Thermal Variables with Time	33
3.3.1	<i>Variation of Luminous Flux with Time</i>	33
3.3.2	<i>Prediction of Internal Junction Temperature</i>	36
	References	39
4	Determination of PET Model Parameters and Internal Variables	41
4.1	Determination of the Heat Dissipation Coefficient	41
4.1.1	<i>Experimental Approach: The Silicon Oil Bath Method</i>	41
4.1.2	<i>Determination of Heat Dissipation Coefficient from Optical Power</i>	43
4.2	Determination of Wall-Plug Efficiency and Optical Power	44
4.2.1	<i>Theory</i>	44
4.2.2	<i>Applications</i>	49
4.3	Determination of the Junction-to-Case Thermal Resistance R_{jc} and Junction Temperature T_j	50
4.3.1	<i>Theory</i>	50
4.3.2	<i>Application</i>	52
	References	55
5	Unifying PET Theory with Colorimetry	57
5.1	Spectral Power Distribution	57
5.2	Practical Spectral Power Modelling Process	60
5.2.1	<i>Temperature Dependence of the Peak Wavelength and FWHM</i>	61
5.2.2	<i>Temperature Dependence of the $P_{\text{opt_phosphor}}/P_{\text{opt_b}}$ Ratio</i>	65

5.3	Determination of Junction Temperature, CCT and CRI using the Dynamic PET Theory Framework	68
5.3.1	<i>Temperature and Electrical Power Dependence of the Optical Power</i>	69
5.3.2	<i>Time Dependence of the Junction Temperature</i>	71
5.4	Application of the Extended PET Theory to CCT and CRI Prediction	72
5.4.1	<i>Steady-State Measurements</i>	74
5.4.2	<i>Dynamic Measurements</i>	74
5.4.3	<i>Use of the Spectral Model as a Dynamic Modelling Tool</i>	77
	References	81
6	Chromatic, Photometric and Thermal Modelling of LED Systems	83
6.1	A Partitioned Grid Model for an LED System	83
6.2	Generalized Partitioned Model for an $m \times n$ LED Array Structure	88
6.3	PET Modelling of Non-Identical LED Devices in Array Structures	89
6.4	Chromatic Modelling of LED Array Systems with Non-Identical LED Devices	91
6.5	Application Examples	93
6.5.1	<i>An LED System with Identical LED Devices</i>	93
6.5.2	<i>An LED System with Non-Identical LED Devices</i>	97
	References	100
7	Precise Dimming and Colour Control of LED Systems	103
7.1	Traditional Linear Colour Control and its Drawbacks	104
7.2	Nonlinear Dimming and Colour Control	106
7.2.1	<i>Nonlinear CCT Function of White LED Systems with Variable CCT</i>	106
7.2.2	<i>Mutual Thermal Dependence of Different LED Types</i>	108

7.2.3	<i>Parameter Determination for the Nonlinear Luminous Flux Functions</i>	111
7.3	Precise Dimming and Colour Control	114
7.3.1	<i>Averaged CCT for Cool-White LED as a Function of D_T</i>	115
7.3.2	<i>Averaged CCT for Warm-White LED as a Function of D_T</i>	115
7.3.3	<i>Mixed CCT Based on the Nonlinear Method</i>	116
7.4	Practical Implementation of Precise Dimming and Colour Control	118
	References	119
8	Applications of PET Theory	121
8.1	Design of Smart LED Street Lighting for Weak Power Grids	121
8.2	Structural Designs of LED Devices and Systems	126
8.2.1	<i>System Level</i>	128
8.2.2	<i>Device Level</i>	130
8.3	Other Advanced Topics and Future Trends of LED Technologies	133
	References	135
	<i>Index</i>	137
