# CAMBRIDGE PHILOSOPHICAL SOCIETY

FOUNDED 1819; ROYAL CHARTER 1832

## Session 1967–1968

*President:* SIR GEOFFREY TAYLOR

*Vice Presidents:* J. A. RATCLIFFE, SIR RUDOLPH PETERS, F. G. YOUNG

*Treasurer:* R. C. EVANS

*Secretaries:* (Mathematical) C. R. F. MAUNDER

(Physical) J. E. FIELD

(Biological) M. A. MESSAGE

The publications of the Society consist of the *Proceedings* and of the *Biological Reviews*. The publication of *Transactions* was suspended at the end of Volume XXIII.

Orders should be sent to: THE MANAGER, CAMBRIDGE UNIVERSITY PRESS, BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W.1. Enquiries from the U.S.A. should be addressed to the Cambridge University Press, American Branch, 32 East 57th Street, New York, N.Y. 10022.

For the purchase of early parts of the *Transactions* and *Proceedings*, application should be made to the Secretaries, CAMBRIDGE PHILOSOPHICAL SOCIETY, BENE'T STREET, CAMBRIDGE, ENGLAND, and for early parts of *Biological Reviews* to the Cambridge University Press. All parts of the *Proceedings* (including the cumulative index to Vols. 1 to 50) and of *Biological Reviews* are available, and prices of sets or single parts will be quoted on application.

*Fellows and Associates of the Society are particularly requested to inform the Secretaries of any change of postal address and to send their subscriptions to the Treasurer, at the Society's office.*

All correspondence regarding library exchanges and Fellows' copies should be addressed to the Librarian at the Society's office.

---

# PROCEEDINGS of the CAMBRIDGE PHILOSOPHICAL SOCIETY

*edited by*

C. R. F. MAUNDER

*in consultation with*

| | | |
|---|---|---|
| J. W. S. CASSELS | E. R. LAPWOOD | J. M. C. SCOTT |
| H. T. CROFT | W B. R. LICKORISH | P. M. LEE |
| P. V. LANDSHOFF | | |

1. Four parts of the *Proceedings* are issued each year, in January, April, July and October. Papers in all branches of mathematics (including applications of mathematics in the natural and biological sciences) are within its scope.

2. Contributions for the *Proceedings* should be sent to the Mathematical Secretary at the Society's office (see above). Papers should be communicated directly by the author.

3. Papers which (if printed) would occupy more than 20 pages can only rarely be accepted.

4. Papers in languages other than English should be accompanied by a brief summary in English.

5. It is extremely helpful if diagrams are drawn in indian ink on white card, faintly blue or green-lined graph paper, or tracing cloth or paper. *Symbols, legends and captions should be given on a transparent overlay.* The Society recognizes that many authors do not have the facilities for producing drawings of a sufficiently high standard to be reproduced directly and it is therefore willing to have such diagrams re-drawn, provided they are reasonably clear.

6. References should be listed at the end of each paper. Titles of journals should be abbreviated as in *Mathematical Reviews*. Any systematic method of ordering the list of references is acceptable.

7. **Authors are particularly requested to prepare their manuscripts in a form suitable for printing, with adequate margins. The Secretary reserves the right to return scarcely legible manuscripts to the author. A pamphlet on the preparation of manuscripts may be obtained on application to the Librarian. If a large number of corrections are required in the proofs, the Council reserves the right to make a charge towards the cost.**

8. Authors may receive on request *100 free offprints* (for each set of authors in the case of a joint paper). Alternatively authors may have 50 free offprints in covers. Further copies may be obtained at reasonable cost. An order form is included with the galley proofs of each paper.

9. Second class postage paid at New York, N.Y.

# IEE Conference Publications

## Timely & Authoritative Development & Progress Reviews

The papers presented at conferences sponsored by the IEE are regularly reproduced and bound into book form as IEE Conference Publications.

Each conference is organised by one or more of the IEE Divisions, POWER, ELECTRONICS or CONTROL & AUTOMATION, or by the SCIENCE & EDUCATION JOINT BOARD. The conferences thus survey the whole ambit of electrotechnology and control.

IEE Conference Publications are internationally recognised as up-to-date, authoritative reviews of development and progress in the various branches of electrotechnology and control with which they deal.

**The IEE Publications Department, Savoy Place, London W.C.2, will be glad to send you full particulars of any of our publications.**

## SIAM JOURNAL ON APPLIED MATHEMATICS

VOLUME 16, NUMBER 3, MAY 1968

*Related Partial Differential Equations and Their Applications.* L. R. BRAGG and J. W. DETTMAN.

*Multichain Markov Renewal Programs.* E. V. DENARDO and B. L. FOX.

*On a General Theory of Characteristics and the Method of Invariant Imbedding.* G. H. MEYER.

*Positive Linear Operators Generated by Analytic Functions.* T. K. BOEHME and R. E. POWELL.

*Generalized Matrix Functions and the Graph Isomorphism Problem.* JAMES TURNER.

*On Weights of Constant-Sum Majority Games.* BEZALEL PELEG.

*Certain General Properties of Unbiased Estimates of Location and Scale Parameters Based on Ordered Observations.* ZAKKULA GOVINDARAJULU.

*Bases in Hilbert Space Related to the Representation of Stationary Operators.* E. MASRY, K. STEIGLITZ and B. LIU.

*On Distributions Connected with Quadratic Forms.* D. W. BRESTERS.

*A Game in Partition Function Form with No Solution.* W. F. LUCAS.

*A Class of Viscous Flows Derivable from Diffraction Theory.* W. E. OLMSTEAD.

*On Lighthill's Method of Strained Coordinates.* CRAIG COMSTOCK.

*On Unisignants and Their Evaluation.* WAI-KAI CHEN.

*The Retrograde Circular Solutions of the Restricted Three-Body Problem Via a Submanifold Convex to the Flow.* C. C. CONLEY.

*Sampling Theorem for the Fourier Transform of a Distribution with Bounded Support.* L. L. CAMPBELL.

*New Root-Location Theorems for Partitioned Matrices.* J. L. BRENNER.

*A Probabilistic Interpretation of Miner's Rule.* Z. W. BIRNBAUM and SAM C. SAUNDERS.

**The Journal is published bi-monthly. Subscriptions are $20.00 per volume**

**Orders should be placed with the**

# ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY, SERIES B (METHODOLOGICAL), three issues a year, annual subscription post free £4. 2*s*. (U.S. $12), price each part 35*s*.

**Volume 30, Part 1, 1968**

## CONTENTS

On the concept of the spectrum for non-stationary processes (with Discussion). R. M. LOYNES.

The choice of variables in multiple regression (with Discussion). D. V. LINDLEY.

Missing data in regression analysis. Y. HAITOVSKY.

Small angle power of a non-parametric test for the bivariate two-sample location problem in the normal case. K. V. MARDIA.

Plant competition: Three species per pot. C. A. MCGILCHRIST.

Some problems of optimal stopping. M. H. DEGROOT.

Experiments with mixtures: A generalization of the simplex-lattice design. D. LAMBRAKIS.

Experiments with *p*-component mixtures. D. LAMBRAKIS.

Estimation of the cross-spectrum of a stationary bivariate Gaussian process from its zeros. D. R. BRILLINGER.

On a distribution associated with certain stochastic processes. A. W. KEMP and C. D. KEMP.

Some applications of multiple-type branching processes in population genetics. W. J. EWENS.

The stationary distribution of branching processes allowing immigration: A remark on the critical case. E. SENETA.

An extension of Quenouille's test for the compatibility of correlation structures in time series. J. ROSENHEAD.

A queue with random arrivals and scheduled bulk departures. A. MERCER.

The Bayesian estimation of a linear functional relationship. D. V. LINDLEY and G. M. EL-SAYYAD.

Weight of evidence, corroboration, explanatory power, information, and the utility of experiments: Corrigenda. I. J. GOOD.

# A PHOTOMETRIC ATLAS of THE SPECTRUM OF ARCTURUS

## *by* R. F. Griffin

Based on photographic spectrograms with resolving powers well in excess of 100,000, the *Atlas* consists of 374 tracings covering the region λλ3600–8825 Å. Printed in black on a blue grid, with continuum normalized to 10 cm height; wavelength scale marked. Two tracings per page, printed one side of the paper only. With introductory text including discussion of the instrumental line profile.

*Obtainable only from the publishers:*

**CAMBRIDGE PHILOSOPHICAL SOCIETY**

**Bene't Street, Cambridge, England**

*Price* £12 (U.S.A. $30)

**Order Form overleaf**

## ORDER FORM

To be returned to
Cambridge Philosophical Society
Bene't Street, Cambridge, England

Please send ... copies of **Photometric Atlas of the Spectrum of Arcturus** for which I enclose a remittance of £12 (U.S.A. $30) per copy payable to the Cambridge Philosophical Society
