By LEE LAI TO

This book is an in-depth study of the structure and leadership of the All-China Federation of Trade Unions — the largest mass organization which aims at representing the interests of the laboring class in the People's Republic of China. Special attention is paid to the relations between the union system and the Party and state to find out the circumstances and factors which affect the roles and autonomy of unions in China. While the period of analysis starts from 1949, events before 1949 are summarized at the beginning of the book so as to provide a backdrop for the research into the contemporary scene.

## Agricultural Development and Tenancy Disputes in Japan, 1870–1940

*Richard J. Smethurst*

Japan's agricultural economy grew dramatically between the Meiji Restoration and World War II, yet toward the end of this period of growth, especially during the 1920s, tenant farmer/landlord disputes broke out in unprecedented numbers. Challenging the standard interpretation of this phenomenon, Richard Smethurst shows that the growth of a rural market economy did not impoverish the Japanese farmer.

## The Fracture of Meaning Japan's Synthesis of China from the Eighth through the Eighteenth Centuries

*David Pollack*

From the beginning of its recorded history until the opening to the West in the last century, Japan was caught between a love for and a rejection of Chinese civilization. ## Zeami's Style

### *The Noh Plays of Zeami Motokiyo*

**Thomas Blenman Hare.** Zeami Motokiyo (1363-1443) is generally recognized as the greatest playwright of Japan's classic noh theater. This first full-length study of Zeami in English is a search for his artistic identity, his style. Its main focus is on the dramas themselves, and in particular, the characteristics that distinguish Zeami's work from that of his fellow playwrights. The author first describes Zeami's life, examines the documentary evidence for his authorship, and explains various technical aspects of noh. He then presents complete translations and detailed analyses of three of Zeami's most celebrated plays: *Takasago*, *Izutsu*, and *Tadanori*. Throughout, the author gives quotations and critical examples from many of Zeami's other plays. The book concludes with a discussion of Zeami's style and the relationship between his dramatic theory and his plays. Illus. \$39.50

Fred R. von der Mehden

VON DER MEHDEN focuses on Buddhism, Islam, and Christianity in five countries—Burma, Thailand, Malaysia, Indonesia, and the Philippines—to re-examine the impact of religion on modernization. His findings greatly revise many post-World War II social scientists' contention that religion acts as a hindrance to modernization. Of particular value will be von der Mehden's careful identification and comparison of basic tenets in these countries with regard to religious institutions, popular beliefs, popular practices, and the manipulation of religious symbols.

# A Fascinating Personal Memoir of Two Powerful Japanese Families.

From the feudal infighting of the Tokugawa shoguns to today's international eminence, Japan has utterly transformed itself over the last century and a half.

In chronicling the involvement of her own family members in the period's tumultuous events, Haru Reischauer provides an endlessly fascinating personal perspective on this era of unprecedented change.

Her two grandfathers – one a provincial samurai, the other a silk merchant residing in the United States – produced children and grandchildren of exceptional talent and energy. Their activities include statecraft, politics, education, finance, art, culture, and the development of such major industrial entities as Mitsubishi and Kawasaki.

Altogether an amazingly multi-faceted mirror of the rise of modern Japan. Copiously illustrated with the author's personal photographs.
