

General Notes

TEMPORAL BONE SURGICAL DISSECTION COURSE

OFFERED BY

THE DEPARTMENT OF OTOLARYNGOLOGY

THE UNIVERSITY OF MICHIGAN MEDICAL SCHOOL, ANN ARBOR, MICHIGAN

COURSE DIRECTOR: JOHN L. KEMINK, M.D.

1991: 22-26 April 27-31 May 7-11 October 11-15 November

Intensive one-week courses emphasize the surgical and anatomical approaches to the temporal bone, and are presented in a manner relevant for the otologic surgeon, utilizing lectures, videotapes, and dissection.

Mornings and afternoons are spent in the dissection laboratory, giving extensive drilling experience in temporal bone anatomy and surgical techniques. All instruments and high-speed handpieces will be provided.

Course fee: Physicians \$1,000 Residents \$750

For further information write:

John L. Kemink, M.D.,
Box 0312 Taubman Medical Center,
1500 E. Medical Center Drive,
Ann Arbor,
Michigan 48109-0312, U.S.A.
Tel: (313) 936-8006

INSTITUTE OF LARYNGOLOGY AND OTOLOGY

UNIVERSITY COLLEGE AND MIDDLESEX SCHOOL OF MEDICINE

ROYAL NATIONAL THROAT, NOSE AND EAR HOSPITAL

MSc in AUDIOLOGICAL MEDICINE

A one-year full-time taught course commencing in October 1991 for audiological physicians, otolaryngologists, community physicians, paediatricians and neurologists, leading to an MSc of the University of London.

The course will provide a comprehensive introduction to the scientific, technical and medical aspects of this specialty, and utilizes the facilities and clinical material available at the associated Royal National Throat, Nose and Ear Hospital.

Further details from:

The Course Secretary
Institute of Laryngology and Otology
330-332 Gray's Inn Road
London WC1X 8EE.

Tel: 071-837 8855 Ext. 4214.

Informal inquiries to:

Professor R. Hinchcliffe
Professor of Audiological Medicine
Ext. 4321/4322. Fax: 071-278 8643.

THE FERENS INSTITUTE OF OTOLARYNGOLOGY

University College and Middlesex School of Medicine
University College London

SPASTIC DYSPHONIA

1st European Conference July 24th & 25th, 1991

International Faculty

Subjects include:

Historical and Genetic Aspects
Medical and Imaging Investigations
Surgical and Medical Treatment
Voice Therapy Techniques
Laryngeal electromyography (E.M.G.)

The Structure and Biochemistry of Botulinum Toxin and its application to head and neck conditions, especially in Spastic Dysphonia, will be the main theme of this Conference

Fees:

Physicians and Surgeons: £125 Speech Therapists/Pathologists: £60

(cheques payable to *U.C.L. Refreshments & light lunch included*)

Low cost accommodation available

For further information please apply to:

Dr Andrew Blitzer MD, Columbia University Department of Otolaryngology,
630 W 168th Street, New York, NY 10032-3702

or

Mr D Garfield Davies FRCS, Ferens Institute of Otolaryngology, Middlesex Hospital,
Cleveland Street, London W15 5FD, UK

Tel: London 71 935 0400

Fax Number: London 71 486 3782

DEPARTMENT OF OTOLARYNGOLOGY, EDINBURGH

A REVISION COURSE IN OTOLARYNGOLOGY

will be held in the City Hospital, Edinburgh, from 23 to 27 September 1991 inclusive.

The Course which is intended for those preparing for post graduate examinations, will cover all aspects of modern otolaryngological theory and practice.

Lectures will be given by senior members of staff of the department.

Course Fee: £240.

Course Organizer: Dr A. I. G. Kerr.

Further particulars and application forms from:

Mrs A. J. Pryde
Unit Secretary
Department of Otolaryngology
City Hospital
Greenbank Drive
Edinburgh EH10 5SB

TWJ FOUNDATION

The Trustees of the TWJ Foundation invite applications for
TWJ U.K. OTOLOGICAL THESIS FELLOWSHIPS

It is now generally known that the TWJ Foundation's main purpose is to support the advanced training of the younger Otolologist and that this has been pursued by offering major Travelling Fellowships to centres of excellence usually in North America, smaller grants for short visits to other centres and some support for research.

The future of Otolology in the United Kingdom may well depend on the support of research and academic activities. The young Otolologist acquires his skills when holding full-time appointments during which most of his time is occupied by service commitments. The Trustees know that a number of research projects are carried out and never completed or reported as the worker has not been able to find the extra time needed.

The Trustees therefore intend periodically to offer U.K. Otolological Thesis Fellowships. These will be offered in open competition to a medically qualified trainee of any grade in a post recognized by the Royal Colleges for training in Otolaryngology or Audiology. Applicants will have to show that their project is otological or audiological and has been accepted by a University of the United Kingdom or of Dublin for admission to a higher medical or surgical degree, that the project is in its final stage and that time is required for thought and the writing of the thesis. Applicants will need to be strongly recommended by their professional assessor and the Head of the Department of the Hospital in which they are working.

The value of the grants will vary but the intention will be to allow the holder to take a short period of unpaid leave during which the project will be completed and the thesis presented for a higher degree.

Applicants should approach the Trustees for further information at any time about 18 months after the start of their project.

The Trustees of the TWJ Foundation
Courtlands, 61 Kingswood Firs
Grayshott, Hindhead
Surrey GU26 6ER.

EIGHTH BRITISH ACADEMIC CONFERENCE IN OTORHINOLARYNGOLOGY

AT DUBLIN, IRELAND

28 July to 2 August, 1991

Distinguished international contributors will present and discuss recent developments in otorhinolaryngology. Topics will include:

- 1 Functional endoscopic nasal and sinus surgery.
- 2 Head and neck cancer/Skull base surgery.
- 3 Facial plastic and reconstructive surgery.
- 4 Sleep apnoea and snoring.
- 5 Middle ear surgery—state of the art.
- 6 Auditory implants and hearing aids.

Daily instructional sessions in small seminar groups.

Daily audiovisual programme.

Full social programme for members and guests.

Scientific and Trade Exhibitions.

Enrolment fee: £425 Full; £175 Associate; £60 Guests.

Those interested should apply to:

Mrs T. Croom-Johnson
Meadow Cottage
Church Walk
Wellesbourne
Warwickshire CV35 9QT, UK

Laryngology & Otology Publications

Available from the Publishers and from Agents throughout the world.

Prices include postage and packing.

The Journal of Laryngology and Otology

Edited by John B. Booth

A leading international journal, published monthly and containing original scientific articles and clinical records in all fields of Otolaryngology, Rhinology and Laryngology. Including occasional supplements.

Founded in 1886.

Annual subscription for 1990 (calendar year): £70.00 Agents £65.00 (US\$175.00 Agents \$162.50); Students rate £40.00

ISSN 0022 2151

Supplements still available separately.

Traité de L'Organe de L'Ouïe

by Nehemiah Asherson

This Bibliography of one of the earliest accurate descriptions of the organ of hearing, which first appeared in 1683, represents the culmination of a lifetime of historical research. It includes a biographical section on Du Verney, the author of the 'Traité'.

Pp 110 ISBN 0 7186 0447 4

Retail £7.00 Agents £6.12 (US\$14.00 Agents \$12.25)

The ENT Surgeon looks at the Orbit

by D. F. N. Harrison

This supplement records in some detail Professor Harrison's 'personal experience over a period of 20 years dealing with a wide variety of clinical conditions in which entry into the orbit was a desirable or essential part of treatment'.

Pp 42 Printed 1980

Retail £4.00 Agents £3.50 (US\$8.00 Agents \$7.00)

Tinnitus

Chairman: Abraham Shulman

The Proceedings of The First International Tinnitus Seminar, which was held in New York in June 1979. Practically all the original papers are reproduced in full, and there are edited versions of all the Panel Discussions. The contributions, from an international group of experts, give comprehensive coverage to a subject of great current interest and importance.

Pp 216 Printed 1981

Retail £10.00 Agents £8.75 (US\$20.00 Agents \$17.50)

20 Years Experience with Homografts in Ear Surgery

by Christian Betow

The author, a professor of Otolaryngology in West Berlin, gives a full account of his pioneering development of homograft materials in reconstructive surgery of the middle ear.

Pp 28 Printed 1982

Retail £4.00 Agents £3.50 (US\$8.00 Agents \$7.00)

Laryngology Applied to Singers and Actors

by Norman A. Punt

This fascinating monograph fills an obvious void in laryngological literature. The author, eminent in the field of vocal problems in theatre and opera house, writes with understanding, knowledge and concern. When mixed with valuable advice and useful prescriptions, this monograph will serve to guide all who find themselves called upon to help these most sensitive individuals.

Pp 24 Printed 1983

Retail £4.00 Agents £3.50 (US\$8.00 Agents \$7.00)

Experimental and Clinical Studies in Otitis Media with Effusion

by Jamsheed A. Khan

An experimental and clinical study on the effects of Carbocisteine on fluid in the middle ear.

Pp 28 Printed 1983

Retail £4.00 Agents £3.50 (US\$8.00 Agents \$7.00)

Proceedings of the Sixth British Academic Conference in Otolaryngology

Edited by John Ballantyne and John Booth

Pp 134 Printed 1983

Retail £5.00 Agents £4.50 (US\$10.00 Agents \$7.50)

Second International Tinnitus Seminar

Chairman: Abraham Shulman

A comprehensive study of the problems and treatment of tinnitus.

Pp 323 Printed 1984

Retail £20.00 Agents £17.50 (US\$40.00 Agents \$35.00)

Forensic Audiology

by Chuang Wei Ping

A clear concise and practical guide to industrial hearing damage by a barrister/physician. This is an unusual and highly specialised aide memoire for the personal injuries practitioner, well illustrated with recent case law. A commendable enterprise by the author.

Pp 57 Printed 1986

Retail £7.00 Agents £6.12 (US\$14.00 Agents \$12.25)

The Acute Orbit

Preseptal (Periorbital) cellulitis subperiosteal abscess and orbital cellulitis due to sinusitis.

by J. R. Moloney, N. J. Badham and A. McRae

Pp 18 Printed 1987

Retail £7.00 Agents £6.12 (US\$14.00 Agents \$12.25)

Nasal Mast Cells: A Preliminary Report on their Ultrastructure

by A. B. Drake-Lee, F.R.C.S.

The ultrastructural morphology of mast cells in the nose and the adenoids are compared. Normal cells have a very varied morphology with electron dense granules which have scrolls occasionally. Cells from patients with perennial allergic rhinitis show variable degranulation in all areas examined. Few cells were seen in the surface epithelium. Cells from the adenoids had different degrees of degranulation which suggests that mast cell reactions are not a constant feature.

Place-pitch and vowel-pitch comparisons in cochlear implant patients using the Melbourne-Nucleus cochlear implant

by Charles K. Pauka

Pp 31 Printed 1989

Retail £12.00 (US\$24.00) Agents £10.50 (US\$21.00)

Instructions to Authors

Review Articles. Articles of this type, preferably not exceeding 3,000 words min will be considered but the author(s) are expected to be a recognised authority on the topic and have carried out work of their own in the relevant field.

Historical Articles. Articles of this type are generally encouraged, but it is obvious that they have to provide some new information or interpretation, whether it be about a well-known person or for example an instrument associated with him, but those from within a Hospital's own department who have made a hitherto less well-known contribution would be welcome.

Letters to the Editor. This feature has been re-introduced to give those who wish to comment about a paper previously published within the Journal, an opportunity to express their views. Wherever possible, the original author is asked to add his further comment, thereby adding to the value of the contribution. Such letters should be sent as soon as possible after publication of each month's issue of the Journal in the hope of including them as soon as possible thereafter.

'Mini-papers, such as those which appear in the British Medical Journal, Lancet, or New England Journal of Medicine, will not be acceptable except on the rare occasion that they bring information of immediate interest to the reader.

Pathology. Articles which are of pathological interest with particular emphasis on the way the diagnosis was achieved now appear on a monthly or bi-monthly basis. It is hoped that clinicians will involve their pathologists in these reports, and all illustrations must be of first-class quality. Where a department, particularly those overseas, may not have such specialized facilities, it may be possible, if a block or several unstained sections are provided for our Adviser to produce or supplement the illustration submitted. Only contributions of particular pathological interest will be accepted.

Radiology. Short reports on cases in which the radiology has been crucial in the making of the diagnosis or the management of a particular case now appear on a monthly or bi-monthly basis. This spot is to encourage clinicians and radiologists to produce material of particular interest in the specialty and to encourage co-operation in this field. Only presentations with first-class illustrations can be accepted and these must emphasise a problem of unusual clinical interest.

Short Communications. This feature will be used on an occasional basis. Examples of material suitable for inclusion under this title would be, for example: a piece of work which was of clinical interest but had failed to produce findings which were of statistical significance; where an investigative technique has been applied to an allied field, not warranting a further in-depth description of its earlier application and methodology.

'**Silence in Court**'. Articles on medicolegal topics are welcome but a preliminary letter written beforehand is requested to ensure that the contribution would be appropriate.

View from Abroad. Short reports by those have been to meetings or trained in part overseas are welcome. They should be both informative and critical but also entertaining.

Check List for Authors/Secretaries

1. Title page—Titles should be short with names of the authors, higher degrees only and the city/country. Details of the departments in which the authors work should be put lower down.
An address for correspondence should be supplied together with the author who should receive this and this will ultimately appear beneath the list of references. If the paper was presented at a meeting, the details of this must be given and will be inserted at the bottom of the first page of the printed script.
2. Abstract—No paper will be accepted without this and it adds considerably to the Editor's time to have to write and request this if the paper is accepted.
3. Key Words—only those appearing as Medical Subject Headings (MeSH) in the supplement to the Index Medicus may be used; whereas appropriate word(s) are listed those dictated by common sense/usage should be supplied.
4. To follow the instructions to Authors with the way in which the paper is set out. It is preferred that each section should start on a fresh page with double spacing and wide margins.
5. References must be in the Harvard system; to submit a paper using the Vancouver system is automatically to have it returned or rejected.
6. Two sets of illustrations must be included, one of half-plate size and the other with the width of 80 mm. Illustrations must be clearly labelled with the author's name on the reverse side and where appropriate with an arrow to give orientation.
7. Authors to check manuscript and references to see that these match up particularly for dates and spelling.
8. Title of Journals must be given in full with the date, volume number and first and *last* pages.
9. Consent to be obtained from a patient if a photograph of their face is to be reproduced.
10. If the author to whom correspondence is to be directed changes his address, he should let the Editorial Office know as soon as possible.
11. Page proofs will normally be sent out three months in advance and must be returned as soon as possible.
12. Authors should provide a Facsimile number (FAX) whenever possible to speed communication. The FAX number of the Editorial office is 071-224 1645.
13. Manuscripts with tables only may be transmitted by FAX; those with graphic or visual illustrations, e.g. graphs, X-rays, pathology, electrical records (ENG, BSER etc) must continue to be sent by post as the quality of reproduction does not give sufficient accuracy of detail.
