## Experimental study on water-wave trapped modes – CORRIGENDUM

P. J. Cobelli, V. Pagneux, A. Maurel and P. Petitjeans

doi:10.1017/S0022112010004222, Published by Cambridge University Press,  
6 January 2011

In the article published by Cobelli *et al.* (2011), the authors forgot to make reference to their original work published in Cobelli *et al.* (2009). They also did not cite the source of figures 1, 6, 12 and 21, first published in Cobelli *et al.* (2009). Retrospective permission to use the figures have been granted by the Editor of *EPL*.

The second paragraph on p. 449 should read:

The existence of trapped modes around a cylinder in a waveguide was identified by Cobelli *et al.* (2009) where no parametric dependences were explored. The aim of this study is to gain further understanding regarding the occurrence of trapped modes of both NS and NA types, the dependence of their eigenfrequencies with geometry, and the characterization of their detailed spatial structure.
