# **LA VIE SPIRITUELLE**

This French Dominican review is now doing much to assist in the adjustment of RELIGIOUS LIFE to the new difficulties of modern times—particularly in the matter of VOCATION. But it also continues its work, already carried out for 30 years, in helping the laity to deepen their spiritual life by grounding it on the traditional doctrine of the Church from the Scriptures and the Fathers. It also runs a SUPPLEMENT for longer and more detailed treatment of these subjects. Specimen copies will be sent on application.

Both these books, which combine elegance and learning with true devotion for two of the greatest Dominican saints, have been received with acclamation from learned and devout reviews alike. They each contain forty plates, reproductions of paintings of one of the greatest periods of religious art, together with excerpts from the earliest lives of the two saints.
