

CLAY MINERALS BULLETIN

No. 26

DECEMBER, 1961

Vol. 4

*Issued by the Clay Minerals Group
of the Mineralogical Society*

CONTENTS

Page

249. C. W. CORRENS. The experimental chemical weathering of silicates.
266. G. PEDRO. An experimental study on the geochemical weathering of crystalline rocks by water.
282. R. H. S. ROBERTSON. The origin of English fuller's earths.
288. J. L. MARTIN VIVALDI and M. RODRIGUEZ GALLEGO. Some problems in the identification of clay minerals in mixtures by X-ray diffraction. I. Chlorite-kaolinite mixtures.
293. J. L. MARTIN VIVALDI and M. RODRIGUEZ GALLEGO. Some problems in the identification of clay minerals in mixtures by X-ray diffraction. II. Chlorite, swelling chlorite and montmorillonite.
299. J. L. MARTIN VIVALDI and M. SANCHEZ CAMAZANO. A dioctahedral clay vermiculite in a soil from Saucelle, Salamanca.
307. E. ARUJA. A new collimator and beam trap for the Philips 114.83mm diameter X-ray diffraction powder camera.
312. W. F. COLE. Modifications to standard Philips powder cameras for clay-mineral work.
318. E. W. RADOSLOVICH and J. B. JONES. Transparent packing models of layer-lattice silicates based on the observed structure of muscovite.
323. NOTES AND NEWS.

Price to non-members 10/-

Annual Subscription 15/- for two numbers
