

SOUTHERN RHODESIA GOVERNMENT.

VACANCY: GEOLOGIST.

Applicants, who must be British and under 43 years of age, should possess an Honours Degree in Geology. Previous experience in Geological mapping and economic Geology would be a recommendation.

Salary Scale : £804—£1,482 per annum. Starting point depends on qualifications and experience. £50 per annum marriage allowance, £60 per annum first, £24 per annum each other dependent child.

Application forms and further details may be obtained from the Secretary, Rhodesia House, 429 Strand, London, W.C. 2. Completed forms should be returned by 20th June, 1953.

We give special attention to geological needs

The "Mottacutta" Cutting and Grinding Machine

Developed specially for geological laboratory rock-cutting and now widely used. Employs 12" diamond-impregnated disc giving 3" cut. Fully enclosed. No maintenance costs. With or without grinding lap.

The "G.F.3." for mechanical grinding

A dual-purpose machine adapted by Sports Machines Ltd., for geological purposes. Specially suitable for accurate mechanical grinding, but can also operate small 6" cutting disc giving 1½" cut. (U.K. sales only.)

Cast Iron Grinding Laps

Two laps operated by the same motor, with choice of 4 speeds (2 on each lap). Single laps also supplied.

Unbreakable Hammers

American all-steel pick hammers with leather grips—a real pleasure to possess. One size and weight only, 1½ lbs. \$5 worth for 26s. 6d.

Ideas for new machines or devices will always be considered. Recent development work includes machines for cutting refractory bricks (test pieces); and for concrete cutting (expansion joints).
