Psychological Medicine is a journal primarily for the publication of original research in clinical psychiatry and the basic sciences related to it. These comprise not only the several fields of biological enquiry traditionally associated with medicine but also the various psychological and social sciences, the relevance of which to medicine has become increasingly apparent. Commissioned review articles may also be published from time to time. The journal also carries book reviews. Contributions must be in English.

Books for review should be sent to Dr S. C. Wessely, Academic Department of Psychological Medicine, King's College Hospital, Denmark Hill, London SE5 9RS, UK.
