

## Notes for Contributors

1. Manuscripts should preferably be written in English, but papers in French and German will also be accepted. All manuscripts will be referred to acknowledged experts in the subject. Only those receiving favourable recommendations from the referees will be accepted for publication. Manuscripts may be sent to any Board member, any Deputy Editor or the Editor.
2. Typescripts should be double spaced, on one side of good grade paper, allowing a reasonable left-hand margin. An original and two copies should be submitted with the author's full postal address, position and affiliations.
3. A short abstract of about 80 words should precede the main text. *List of symbols*: A typewritten list of any special symbols should be submitted with the manuscript. The list should not define the symbols mathematically, but should serve to identify them typographically. The list will not appear in print, but is essential to help the typesetter and to avoid costly correction in proof.
4. One copy of photographs, prints or transparencies of good quality and unmarked should be submitted. Where lines or lettering are to appear on the photograph, an additional print should be supplied appropriately marked. Each should have, lightly written on the back, the author's name, the figure number and an indication of which is the top of the picture.
5. One copy of each line diagram should be submitted at approximately twice final size and unlettered. Diagrams must be drawn in indian ink on plain white or transparent paper. A second copy should be supplied with lettering included. The author's name and the figure number should be written on this copy. Figures should be numbered consecutively, with arabic numerals, have descriptive captions, and be mentioned in the text. The correct position for each figure should be indicated in the margin of the manuscript.
6. Tables should be typewritten on separate sheets. Avoid, where possible, very wide tables. Number tables consecutively with roman numerals. Each should have a brief heading. Exceptionally lengthy tables may be summarized for publication with a note that copies of details can be obtained from the authors.
7. *Equations*: Wherever possible, mathematical equations should be typewritten, with subscripts and superscripts clearly indicated. The printer will set all mathematical symbols in italics unless otherwise indicated; symbols or letters to be set in roman (upright) type should be encircled in pencil, while bold letters should be shown by a wavy underline.
8. *References*: In the text, references are indicated by superior arabic numbers (without brackets), and should be confined to publish work that is directly pertinent. References should be listed at the end of the paper in numerical order. Authors' initials should precede their names; cited article titles should be quoted in full, enclosed in quotation marks; and abbreviations of journal names should follow the style of *Chemical Abstracts* or *Physical Abstracts*, and be underlined for italics: P.W. Anderson, "More is different" *Science* **177**, 393 (1972) C.V. Negoita, *Fuzzy Systems* (Abacus Press, Tunbridge Wells, UK, 1980)  
Citations such as 'personal communication', 'unpublished work', etc., are not acceptable as numbered references but can be included in parenthesis in the text. Do not use summaries as references.
9. *Proofs*: Page proofs will be sent to authors for correction, for return within 48 hours by airmail. Correction to proofs should be restricted to printers' errors only. Authors are entitled to 25 offprints of their article free of charge. Additional offprints may be purchased if they are ordered on the form sent with the proofs.
10. Manuscripts, whether accepted or rejected, will not be returned to the authors.
11. Submission of an article will be taken to imply that it has not been previously published and that it is not on offer to any other publisher.

# ROBOTICA

Volume 8 Part 1

January–March 1990

## CONTENTS

<b>Reports and Surveys (Innovative Robots, Raw Sugar Industry, Mobile Robots, Products for Automation, Robot Accident Rate, Robots Worldwide, Systems Under Threat). B. H. Rudall (UK)</b>	<b>1</b>
<b>HERMIES-III: A Step Toward Autonomous Mobility, Manipulation and Perception, C. R. Weisbin, B. L. Burks, J. R. Einstein, R. R. Feezell, W. W. Manges and D. H. Thompson (USA)</b>	<b>7</b>
<b>Closed Loop Trajectory Control of Walking Machines, J. F. Gardner, K. Srinivasan and K. J. Waldron (USA)</b>	<b>13</b>
<b>Step Lengths and Efficiencies of Serial-Operated and Parallel-Operated Mechanical Legs, D. McCloy (UK)</b>	<b>23</b>
<b>A Model Algorithmic Learning Method For Continuous-Path Control of a Robot Manipulator, Sung-Rok Oh, Zeungnam Bien and Il Hong Suh (Korea)</b>	<b>31</b>
<b>Order-Picking Industrial Robot, H.-J. Warnecke and K. Baumeister (F.R.G.)</b>	<b>37</b>
<b>A System For Robot Manipulation of Electrical Wires Using Vision, David Vernon (Ireland)</b>	<b>47</b>
<b>Distributed Positioning For Redundant Robotic Systems, Veljko Potkonjak (Yugoslavia)</b>	<b>61</b>
<b>Joint Velocity Uniformity in Redundant Robot Manipulators, A. Hemami (Canada)</b>	<b>69</b>
<b>Tracking Control of Flexible Robot Manipulators with Active Inertia Links, Guy Jumarie (Canada)</b>	<b>73</b>
<b>Formulation of Manipulator Jacobian Using the Velocity Similarity Principle, K. C. Gupta and R. Ma (USA)</b>	<b>81</b>
<b>Conference News</b>	<b>85</b>
<b>Book Reviews</b>	<b>87</b>
<b>Announcements</b>	<b>89</b>

## INDEX TO VOLUME 7

- Arkin, R. C.** Navigational path planning for a vision-based mobile robot, 49–63
- Artigue, F., Amirat, M. Y. and Pontnau, J.** Isoelastic behavior of parallel robots, 323–325
- Beiner, L.** Combined time/location optimization of robotic motions with specified paths and velocity profiles, 309–314
- Bodner, A.** Adding flexibility to the links of a rigid-link dynamic model of an articulated robot, 165–168
- Bone, G. M. and Elbestawi, M. A.** Robotics force control for deburring using an active end effector, 303–308
- Borovać, B., Vukobratović, M. and Stokić, D.** Stability analysis of mechanisms having unpowered degrees of freedom, 349–357
- Borovać, B., Vukobratović, M. and Surla, D.** An approach to biped control synthesis, 231–241
- Buchal, R. O. and Cherchas, D. B.** An iterative method for generating kinematically feasible interference-free robot trajectories, 119–127
- Cassar, J. P. and Vanheeghe, P.** Specific computation of inverse kinematics in a robot off-line programming environment, 65–69
- Chion, B. C. and Shahinpoor, M.** Effect of joint stiffness on the dynamic stability of a one-link force-controlled manipulator, 339–342
- Desoyer, K. and Lugner, P.** Recursive formulation for the analytical or numerical application of the Gibbs–Appell method to the dynamics of robots, 343–347
- Eghtedari, F. and Morgan, C.** A novel tactile sensor for robot applications, 289–295
- Gupta, K. C. and Singh, V. K.** A numerical algorithm for solving robot inverse kinematics, 159–164
- Hardy, N. W., Barnes, D. P. and Lee, M. H.** Automatic diagnosis of task faults in flexible manufacturing systems, 25–35
- Ho, C. Y. and Sriwattanathamma, J.** Symbolically automated direct kinematic equations solver for robotic manipulators, 243–254
- Jacak, W.** Strategies of searching for collision-free manipulator motions: automata theory approach, 129–138
- Jarka, R. E., Sabn, Z. A., Adams, S. K., Liang, E., Barnett, M., Rodriguez, R. J. and Husseiny, A. A.** Design of an advanced robotic vehicle evaluation laboratory, 281–287
- Jumarie, G.** Two stage sliding controller for manipulators with time-varying inertia links, 255–261
- Jutard, A., Redarce, T., Fakri, A. and Betemps, M.** Geometric model of the DCR-LAI compliant device, 151–157
- Kanarachos, A., Sfantsikopoulos, M. and Vionis, P.** A splines-based control method for robot manipulation, 213–221
- Kazerooni, H.** Statically balanced direct drive manipulator, 143–149
- Kazerooni, H.** Compliance control and stability analysis of cooperating robot manipulators, 191–198
- Kemal Ciliz, M. and Can Isik.** Fuzzy rule-based motion controller for an autonomous mobile robot, 37–42
- Kyu Won Jeong and Hyung Suck Cho.** Development of a pneumatic vibratory wrist for robotic assembly, 9–16
- Lenarčič, J.** R&D at the Robotics Laboratory of The Jožef Stefan Institute (Yugoslavia), 113–117
- Lim, T. G., Cho, H. S. and Chung, W. K.** A parameter identification method for robot dynamic models using a balancing mechanism, 327–337
- Nicholls, H. R., Rowland, J. J. and Sharp, K. A. I.** Virtual devices and intelligent gripper control in robotics, 199–204
- Ozaki, H., Shimadzu, T. and Mohri, A.** Collision-free path generation for a mobile robot by an artificial transformation of obstacle spaces, 139–142
- Parnis, P. J. and Drazan, P. J.** Recognition of unreliable ultrasonic range data in a robotic environment, 223–229

- Pu, J. and Weston, R. H.** A new generation of pneumatic servos for industrial robots, 17–23
- Rock, S. T.** Developing robot programming languages using an existing language as a base—A viewpoint, 71–77
- Shin, Y. and Bien, Z.** Collision-free trajectory planning for two robot arms, 205–212
- Troch, I.** Time-suboptimal quasi-continuous path generation for industrial robots, 297–302
- Verdier, M., Rouff, M. and Fontaine, J. G.** Nonlinear control robot: A phenomenological approach to linearization by static feedback, 315–321
- Weisbin, C. R., Hamel, W. R., Kuban, D. P., Meacham, S. A. and Pin, F. G.** The Robotics and Intelligent Systems Program (RISP) at The Oak Ridge National Laboratory, 101–111
- Yamamoto, M. and Mohn, A.** Planning of quasi-minimum time trajectories for robot manipulators (Generation of a bang–bang control), 43–47

## INDEX OF BOOKS REVIEWED IN VOLUME 7

The name of the reviewer of the book is given in parentheses

- Abrahams, J. R.** *CENTREX—Making The Right Decision*, (T. OWEN), 81
- An, C. H., Atkeson, C. G. and Hollerbach, J. M.** *Model-Based Control of a Robot Manipulator*, (T. OWEN), 171
- Andersson, R. L. A.** *Robot Ping-pong Player*, (T. OWEN), 172
- Babb, II, R. G.** *Programming Parallel Processors*, (I. CRAIG), 87
- Barcombe, D.** *Office Automation, A Survey of Tools and Technology, 2nd Edition*, (I. CRAIG), 174
- Barnes, J. G. P.** *Programming in ADA (Second Edition)*, (I. CRAIG), 88
- Barr, A. and Feigenbaum, E. A.** *The Handbook of Artificial Intelligence, Volume one*, (I. CRAIG), 88
- Beal, D. F.** *Advances in Computer Chess 5*, (I. CRAIG), 367
- Beam, G.** *Advanced Clipper: dBase Compiler Applications*, (I. CRAIG), 175
- Bernard, C. J.** *Handbook of Fluid Flowmetering (1st Edition)*, (T. OWEN), 173
- Bolles, R. and Roth, B.** *Robotics Research: The Fourth Symposium*, (T. OWEN), 171
- Booch, G.** *Software Components with ADA*, (I. CRAIG), 269
- Booch, G.** *Software Engineering with ADA (Second Edition)*, (I. CRAIG), 84
- Bray, O. H.** *Computer Integrated Manufacturing: The Data Management Strategy*, (T. OWEN), 268
- Burns, A.** *Programming In Occam2*, (I. CRAIG), 86
- Chase, R. L.** *Total Quality Control: An IFS Executive Briefing*, (T. OWEN), 268
- Christian, K.** *The Unix Operating System (Second Edition)*, (I. CRAIG), 87
- Compton, W. D.** *Design and Analysis of Integrated Manufacturing Systems*, (T. OWEN), 82
- Cotterill, R. M. J.** *Computer Simulation in Brain Science*, (I. CRAIG), 176
- Date, C. J. and White, C. J.** *A Guide to DB2 (Second Edition)*, (I. CRAIG), 270
- DeLucchi, C. J.** *The AutoCAD Cookbook*, (I. CRAIG), 368
- Dickenson, C.** *Fillers and Filtration Handbook (2nd Edition)*, (T. OWEN), 172–173
- Dickenson, C.** *Pumping Manual*, (T. OWEN), 173
- Dijkstra, E. W. and Feijen, W. H. J.** *A Method of Programming*, (J. A. ROSE), 366
- Edosomwan, J. A.** *Productivity and Quality Control*, (T. OWEN), 267–268
- Etling, D.** *Modula-2 Programmer's Resource Book*, (I. CRAIG), 86
- Farrell, P.** *Advanced Wordperfect a Power User's Guide*, (I. CRAIG), 87
- Farreny, H.** *Exercices Programmés d'Intelligence Artificielle*, (Prof. J. J. KESSIS), 266
- Field, A. J. and Harrison, P. G.** *Functional Programming*, (I. CRAIG), 173
- Fischer, C. N. and LeBlanc, Jr. R. J.** *Crafting A Compiler*, (I. CRAIG), 269
- Fisher, R. B.** *From Surfaces to Objects: Computer Vision and Three Dimensional Scene Analysis*, (T. OWEN), 363
- Frank, L.** *Database Theory and Practice*, (I. CRAIG), 176
- Futagami, T. et al**, *Distributed Parameter Systems*, (F. E. COLLIS), 367
- Gehani, N. and McGetterick, A. D.** *Concurrent Programming*, (I. CRAIG), 269–270
- Gero, J. S.** *Artificial Intelligence in Engineering: Design*, (T. OWEN), 266
- Gero, J. S.** *Artificial Intelligence in Engineering: Diagnosis and Learning*, (T. OWEN), 266
- Gero, J. S.** *Artificial Intelligence in Engineering: Robotics and Processes*, (T. OWEN), 266
- Gilb, T. and Finzi, S.** *Principles of Software Engineering Management*, (I. CRAIG), 175
- Gongh, K. J.** *Syntax Analysis and Software Tools*, (I. CRAIG), 174–175

- Grimm, R. H. and Merrill, D. D.** *Contents of Thought*, (I. CRAIG), 270
- Grindley, P. C.** *The UK Software Industry: A Survey of the Industry and Evaluation of Policy*, (I. CRAIG), 270–271
- Hartman, P. A. R.** *Base System V and 5000 Advanced Applications for Non Programmers*, (I. CRAIG), 174
- Hawkes, B.** *The Cadcam Process*, (T. OWEN), 267
- Hirst, W.** *The Making of Cognitive Science*, (I. CRAIG), 176
- Hoc, J. M.** *Cognitive Psychology of Planning*, (I. CRAIG), 271
- Hordeski, M.** *Computer Integrated Manufacturing: Techniques and Applications*, (T. OWEN), 268
- 19th International Symposium on Automotive Technology and Automation**, (T. OWEN), 269
- Isermann, R.** *Automatic Control*, (Dr. P. R. BROWN), 363–364
- Jaris, R. A.** *Robots: Coming of Age, Proceedings of the International Symposium and Exposition on Robots*, (J. A. ESROM), 265
- Kelly, B. and Rector, A.** *Research and Development in Expert Systems V*, (J. A. ESROM), 265
- Kusiak, A.** *Expert Systems: Strategies and Solutions in Manufacturing, Design and Planning*, (T. OWEN), 366
- Lamie, E. L.** *Pascal Programming*, (J. A. ROSE), 83
- Leler, Wm.** *Constraint Programming Languages: Their Specification and Generation*, (I. CRAIG), 85
- Londeix, B.** *Cost Estimation for Software Development*, (I. CRAIG), 85
- Lunze, J.** *Robust Multivariable Feedback Control*, (P. J. ESROM), 368–369
- McCracken, D. D. and Golden, D. G.** *A Simplified Guide to Structured Cobol Programming, Second Edition*, (I. CRAIG), 173
- McFadden, F. R. and Hoffer, J. A.** *Database Management*, (J. A. ROSE), 365
- Macro, A. and Buxton, J.** *The Craft of Software Engineering*, (I. CRAIG), 84–85
- Mair, G. M.** *Industrial Robotics*. (T. OWEN), 81
