*Journals of the Nordic Society Oikos and  
the Scandinavian Ornithologists' Union*

## Holarctic Ecology

Publishes original results from the Holarctic region and adjacent cold and temperate seas. Studies from cold and temperate areas in the southern hemisphere will be considered if the ecological phenomena are similar to conditions in the Holarctic. Descriptive and analytical studies, rather than theoretical investigations, in all aspects of ecology.

Published four times a year. Subscription rate for 1989 is DKK 560.00 including postage (GBP 49.00).

Editor:  
Professor Rolf Vik,  
Oslo

## Oikos

Presents original work in all aspects of ecology. An experimental or theoretical approach is preferred, and studies of a general interest are given priority.

Published nine times a year. Subscription rate for 1989 is DKK 2,000.00 including postage (GBP 175.00).

Editor:  
Professor Per Brinck,  
Lund

## Ornis Scandinavica

Presents original work in all aspects of ornithology. Experimental studies, and those of a general interest, are given priority.

Published four times a year. Subscription rate for 1989 is DKK 480.00 including postage (GBP 42.00).

Editor:  
Professor  
Sven-Axel Bengtson,  
Lund

# ECOLOGY OF FRESHWATERS: MAN AND MEDIUM

NEW  
SECOND  
EDITION

**B. Moss** DSc, *Reader in Environmental Sciences, University of East Anglia, Norwich.*

This new edition of an established textbook on the ecology of freshwaters which traces the progression of water from rain, through upland streams, flood-plain rivers, lakes and estuaries, has been completely revised and almost rewritten. In this edition, greater emphasis has been placed on flowing waters and applied ecology, and a feature of the book is that applications, such as pollution, water management and conservation have been integrated into the book as a whole, and not relegated to a separate section.

The **Biologist** said (of the first edition) ... *'In about 300 pages and at a reasonable price, this most readable book covers the subject well. Though written mainly for undergraduate ... and postgraduate students ... its readership should be much wider ... all those concerned with the use and abuse ... of the aquatic environment ... should read this excellent book.'*

**Outline of Contents:**

Introduction — the Pongolo Floodplain; On living in water; From atmosphere to stream — the chemical birth of freshwaters; Upland streams and rivers; Lowland rivers and their floodplains; Lakes, pools and other standing waters — some basic features of their productivity; The plankton and fish communities of the open water; The edges and bottoms of lakes and their communities; Fish production and fisheries in lakes; The birth, development and passing of lakes.

**Second edition. 1988. About 432 pages, 76 illustrations. Paper £18.95. ISBN 0 632 01642 6**

ROYAL ENTOMOLOGICAL SOCIETY OF LONDON  
2 DAY SYMPOSIUM  
at Imperial College, London on 14th - 15th September 1989

## THE CONSERVATION OF INSECTS AND THEIR HABITATS

On current predictions, millions of insect species will soon become extinct unless sensible measures are devised. In this symposium, the causes and scale of the problem will be assessed more precisely than ever before, but the emphasis will be on solving problems and reviewing recent initiatives.

The symposium brings together the world's experts on insect conservation. Speakers include: N.W. Moore, J.P. Dempster, E. Balletto, P. Opler, M.B. Usher, N.M. Collins, J.A. Thomas, M.S. Warren, M.G. Morris, & 12 others from Australasia, Brazil, Hawaii, USA, and Europe.

For the full Programme and Registration Form, please write to:  
**The Registrar,**  
Royal Entomological Society of London,  
41 Queens Gate, London SW7 5HU Tel: 01 584 8361
