Made and printed in Great Britain.

EPILEPSY

Is so uniformly and so remarkably benefited by the use of

GELINEAU'S DRAGEES

(Pot. Brom.; Antim.-Arsen.; Picrotoxin)

that no case should be considered hopeless until these Dragees have been thoroughly tried. RELIEF—AND A GREAT DEAL MORE—is usually obtained even when routine treatment fails completely.

GELINEAU'S DRAGEES

are successfully prescribed by leading Physicians, and are used in Hospitals and Epileptic Colonies. *Their use is also indicated in the nervous and painful crises of Menstruation and in the varying manifestations of Shell Shock.*

In tins of 50 and 150. Full particulars from the general Agents for the British Empire (except Canada, Australia and New Zealand):

WILCOX, JOZEAU & Co.,

The Experimental Study of Reading

By M. D. VERNON.

Large crown 8vo. With 15 illustrations. 8s. 6d. net.

The purpose of this book is to give a concise account of any experimental work, particularly that recently performed, which throws some light on the psychology of reading. The acquirement in reading of a specially adapted series of eye movements is fully described. The reading perceptions of adults, and their relation to perception in general, are outlined, together with the development and disabilities of reading perception in children. Finally, some account is given of the effect upon reading of variations in the printed text.
